Stromal tumor-associated macrophage infiltration could be an independent prognosticator for muscle-invasive bladder cancer (MIBC) patients, and also possesses the potential to guide chemotherapy and immunotherapy decision making in MIBC (<https://doi.org/10.1245/s10434-021-11155-y>).

DISCLOSURE Shengming Jin, Han Zeng, Zhaopei Liu, Kaifeng Jin, Chunnan Liu, Sen Yan, Yanze Yu, Runze You, Hongyi Zhang, Yuan Chang, Le Xu, Jiejie Xu, Zewei Wang, and Yu Zhu declare no potential conflicts of interest.
