ASO Visual Abstract: Technical Standards for Cancer Surgery—Improving Patient Care through Synoptic Operative Reporting

Tina J. Hieken, MD, FACS¹, William R. Burns, MD, FACS², Amanda B. Francescatti, MS³, Arden M. Morris, MD, MPH, FACS⁴, Sandra L. Wong, MD, MS, FACS⁵, and on behalf of the Cancer Surgery Standards Program of the American College of Surgeons

¹Department of Surgery, Mayo Clinic, Mayo Clinic Alix School of Medicine, Rochester, MN; ²Department of Surgery, Johns Hopkins University School of Medicine, Baltimore, MD; ³American College of Surgeons, Chicago, IL; ⁴Department of Surgery, Stanford University School of Medicine, Stanford, CA; ⁵Department of Surgery, The Geisel School of Medicine at Dartmouth, Dartmouth-Hitchcock Medical Center, Lebanon, NH

The *Operative Standards for Cancer Surgery* manuals define critical elements of optimal cancer surgery based on data and expert opinion. Following these surgical standards

and employing synoptic operative reporting may elevate and harmonize cancer patient care (<https://doi.org/10.1245/s10434-022-11330-9>).
