In response to national initiatives to improve value in cancer care, we aimed to identify and characterize cancer-specific quality measures promoting the avoidance of low-

value care (<https://doi.org/10.1245/s10434-021-11303-4>). Concurrently, we identified gaps that may guide future measure development.

DISCLOSURES Brandon L. Ellsworth, Allan K. Metz, Nicole M. Mott, Ruby Kazemi, Michael Stover, Tasha Hughes, and Lesly A. Dossett declare no conflicts of interest.
