# "ULTRA THIN"

**One-mil thick  
silicon wafers!**

**We should say  
one-mil THIN  
wafers!**

**Two-, three- and four-inch diameter  
double-sided polished wafers with:**

- less than 3 microns surface flatness
- less than 2.5 microns taper

Also available in 1-, 1½-, 2¼-inch diameter and other thicknesses. Thickness variation on wafer lot can be maintained to  $\pm .0001$ ".

VSI makes the most dimensionally stable thin wafers. In addition, our throughput capabilities exceed 3,000 thin wafers/week. All processing, from crystal growth to polishing, is done on VSI premises.

For your  
thin wafer needs,  
call the leader!
