

For:

**Tribologists
and
Lubrication
Engineers,
Production
Engineers,
Materials
Scientists
in Metals,
Polymers
and
Ceramics,
Physicists
and
Chemists
in Surface
Analysis**

WEAR

An International Journal on the
Science and Technology of
Friction, Lubrication and Wear

Editor:

D. Dowson *University of Leeds, Leeds, UK*

**This international journal
is published monthly**

Wear is the international forum for
multidisciplinary communications on topics such
as:

- Control and prevention of wear processes
- Fundamental knowledge of wear phenomena
as applied to engineering, design, and
materials
- New materials and their characteristics in
terms of surface structure, wear, corrosion and
oxidation resistance, low friction without lubri-
cation, high temperature strength
- New engineering concepts and innovation in
materials (plastics, composites, ceramics)
- Controlled wear by abrasion
- Wear of cutting and forming tools
- Lubricants and the mechanisms of lubrication
- Surface phenomena
