

President Thanks 1988 MRS Volunteers

The Materials Research Society has had a year of exceptional growth and solid achievement. In meeting today's needs and in creating the foundations for future progress, MRS has set dynamic records. Vital to these accomplishments is the energetic and inspired leadership provided by those members who have volunteered both time and expertise to serve the various MRS activities. MRS is fortunate in the dedication of all of its volunteers, and I want to thank *all* those who have served as committee members or chairs, or elsewhere in the whole spectrum of MRS activities. I would like especially to congratulate and thank those involved as leaders, whose names appear below. Their invaluable service has been a key to this most successful year for the Materials Research Society.
