

LOOK AGAIN...

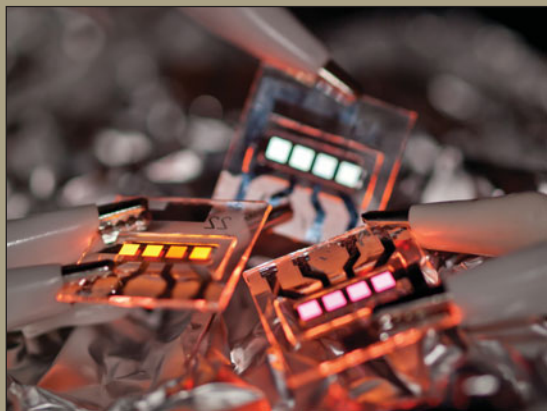

Just for Fun!

See if you can find the 8 differences in each set of images.

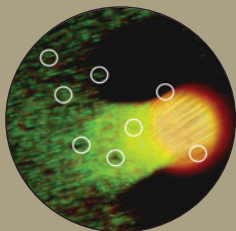

Customize your color!

Organic light-emitting diodes consisting of carbon-based small molecules. By combining different emitting molecules, nearly every color of the visible spectrum can be obtained.

Caroline Murawski, Technical University Dresden, Germany

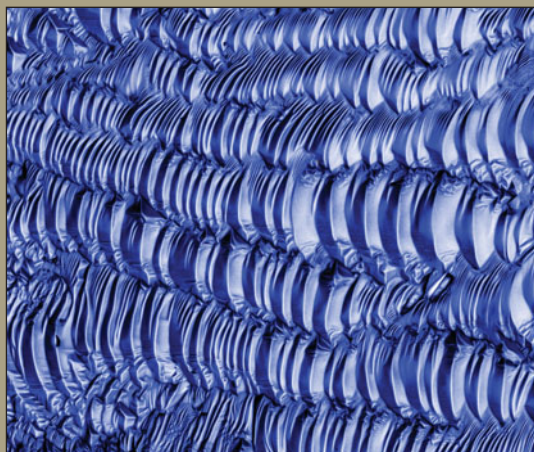

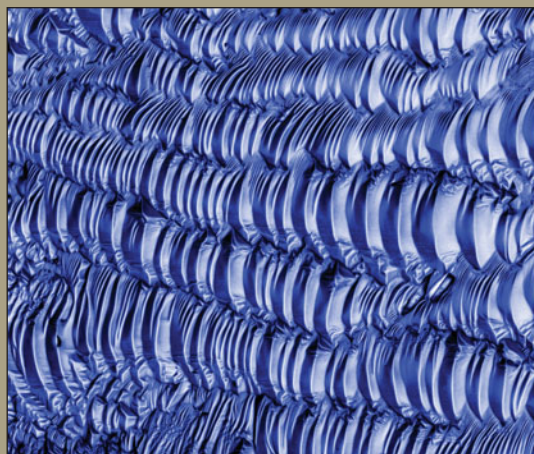

August 2013 answer key

GaAs fracture surface

Scanning electron microscope (SEM) image of a fracture surface on a GaAs wafer. False color was added using Adobe Photoshop CS4.

Kevin A. Grossklous, University of Michigan, USA

The answers will be in the December 2013 issue.

Images on the top were submitted to the Materials Research Society "Science as Art" competition. Images on the bottom were modified in Adobe Photoshop for this "Look Again" activity.
