

Magnetism 2016 to be held April 4–5 in the United Kingdom

<http://magnetism2016.iopconfs.org>

Magnetism 2016 will be held April 4–5 in Sheffield, UK. It is organized by the Institute of Physics Magnetism Group. Co-chairs are Dan Allwood of The University of Sheffield and Gonzalo Fernandez of the University of York.

The conference focuses on magnetism research and in the past has included sessions on spintronics, domain walls, dynamics, vortices, skyrmions and

topological systems, spin ice, biological and organic magnetism, superconductors, magnetocalorics, and *ab initio* theory.

The conference includes oral sessions; invited talks, including IEEE Distinguished Lectures; poster sessions; and an exhibition for industry. It is primarily for the United Kingdom and Republic of Ireland, but participation from outside the United Kingdom and

Republic of Ireland and from industry is encouraged.

The abstract submission deadline is January 15. Early registration ends March 3, and registration ends March 24. The accommodation deadline is March 21. More information can be accessed from the conference website at <http://magnetism2016.iopconfs.org> or by email at conferences@iop.org.

JEMS 2016 to be held August 22–26 in the United Kingdom

<http://jems2016.iopconfs.org>

The 8th Joint European Magnetic Symposia (JEMS) will be held August 22–26 in Glasgow, Scotland, UK. It is organized by the Institute of Physics Magnetism Group. Co-chairs are Robert Stamps and Stephen Lee.

The symposia will focus on a broad range of topics addressing fundamental

and applied magnetism as well as novel magnetic materials. Plenary, semi-plenary, and invited speakers will give lectures on important recent advances in addition to the contributed talks within each symposium. The event will also feature poster sessions and an exhibition. Participation by students and early career

scientists is welcomed and encouraged.

The abstract submission deadline is March 18. Early registration ends July 10 and registration ends August 12, 2016. More information can be accessed from the symposia website at <http://jems2016.iopconfs.org> or by email at conferences@iop.org. □

Advance your results.
