Correction to: Canadian Journal of Public Health (2019) 110:216–221
<https://doi.org/10.17269/s41997-018-0160-4>

The published version of Fig. 1 contained a mistake in the colour scale for the vertical lines and corresponding labels for the $P_{\max}$ values. The green and red lines / text should be reversed, with illegal alone cannabis having a $P_{\max}$ value of \$14.09, and legal alone cannabis having a $P_{\max}$ value of \$16.28. (See corrected Fig. 1 below.)

The authors regret this error in the published manuscript.
