Received 5 December 2006

The values of the fructosyltransferase activity in Table 2 on page 471 of the original article [1] were not given correctly in U L^{-1} . The corrected Table 2 is given below.

Table 2. Effect of Immobilization pH on the Activity of Biocatalysts Based on FTase Supported on Dowex Marathon MSA in 0.1 M Citrate/Phosphate Buffer

pH	Activity/(U L^{-1})	
	A	B
5.7	14150	5940
6.2	10820	3870
6.9	5500	2480
7.1	4700	2040

A – biocatalyst prepared by direct attachment of the enzyme, B – biocatalyst prepared by simultaneous attachment and crosslinking.
