Submitted January 10, 2013; accepted for publication January 10, 2013

DOI: 10.3103/S0891416813020080

Page 120, left column, line 1, paragraph 3 from the top and throughout the whole text *measeles* **should read rubella**

Page 120, right column, line 5, paragraph 1 from the top, the phrase ...reversion to the wild type, i.e., hyperattenuation, and the emergence of vaccination linked complications during the creation of vaccines make it necessary... **should read** reversion to the wild type, hyperattenuation and the emergence of vaccination-linked complications make it necessary..

Page 120, right column, line 17, paragraph 1 from the top, the term *full virus vaccine* of type 3 **should read poliovirus vaccine** type 3.

Page 121, left column, line 22, paragraph 4 from the top and throughout the whole text the term *lgCCID₅₀/ml* **should read logTCD₅₀/mL**.

Page 121, left column, line 24, paragraph 5 from the top, the term amplification *into DNA* **should read** amplification *of cDNA*.

Page 126, left column, line 24, paragraph 3 from the bottom the phrase *Cys* in the Matsuba and Cendehill **should read His** in the Matsuba and Cendehill.

Page 126, left column, line 25, paragraph 3 from the bottom *ca39* **should read ca46**.
