The article by V. V. Goncharuk “SOS: Drinking Water” (no. 5, 2010) page 465 (in the English version—page 258), the inscription to the table “Complex assessment of drinking bottled waters (31 brands) cyto- and genotoxic indicators” contains a disappointing mistake. Instead of “Black zone the “Unsafe waters” exert a strong cyto- and genotoxic effect on test organisms” should read “Black zone category—“Very dangerous toxic waters””.
