The equation (2.1) should read as $\nabla \times \mathbf{h} = \mathbf{J} + \varepsilon_0 \dfrac{\partial \mathbf{E}}{\partial t}$.

The equation (2.2) should read as $\nabla \times \mathbf{E} = -\mu_0 \dfrac{\partial \mathbf{h}}{\partial t}$.

The equation (2.3) should read as $\mathbf{E} = -\mu_0 \left(\dfrac{\partial \mathbf{u}}{\partial t} \times H_0\right)$.

The equation (2.5) should read as $(\lambda+\mu)\nabla(\nabla.\mathbf{u}) + (\mu + K)\nabla^2\mathbf{u} + K(\nabla \times \boldsymbol{\phi}) - \nu\nabla\theta + \mathbf{F} + \mathbf{G} = \rho \dfrac{\partial^2 \mathbf{u}}{\partial t^2}$.

The equation (2.6) should read as $(\alpha + \beta + \gamma)\nabla(\nabla.\boldsymbol{\phi}) - \gamma\nabla \times (\nabla \times \boldsymbol{\phi}) + K(\nabla \times \mathbf{u}) - 2K\boldsymbol{\phi} = \rho j \dfrac{\partial^2 \boldsymbol{\phi}}{\partial t^2}$.

The equation (2.11) should read as $\mathbf{F} = \mu_0(\mathbf{J} \times \mathbf{H}_0)$, $\mathbf{G} = \rho g(w_x, 0, -u_x)$.
