In this article the statement in the Funding information section was incorrectly given as 'This work was supported by Russian government decree 1144-R (May 11, 2022), as part of the program for the development and introduction of innovative technologies in mineral prospecting and extraction, workplace safety, bioremediation, and the creation of new products by the complex processing of coal so as to reduce environmental impacts and threats to human health (contract 075-15-2022-1201, September 30, 2022)' and should have read 'The study was conducted within the framework of the comprehensive scientific and technical program of a full innovation cycle "Development and introduction of prospecting and mining technologies, industrial safety measures, bioremediation, and

the development of new coal-based products with a decrease in environmental impact and human health risks", approved by the Decree of the Government of the Russian Federation No. 1144-r dated May 11, 2022, Agreement No. 075-15-2022-1201 dated September 30, 2022, with financial support from the Ministry of Science and Higher Education of the Russian Federation'.
