Formula (14) should read as follows:

$$\beta_C = \frac{1}{2} \left[ \frac{T_C}{T_E} + \frac{T_E}{T_C} - \frac{T_C T_E}{T_M^2} (\delta i_c)^2 \right] - \frac{T_C}{T_M} \approx \frac{1}{2} \left( \frac{T_C}{T_E} + \frac{T_E}{T_C} \right) - \frac{T_C}{T_M}.$$
