ERRATUM

J. Myerson, S. Hale, Y. Zheng, L. Jenkins, & K. F. Widaman (2003). The difference engine: A model of diversity in speeded cognition. *Psychonomic Bulletin & Review*, **10**(2), 262-288.

In each of the cases listed below, a minus sign following an r in the equation in the published article should have been an exponent of $1/2$.

On p. 271:

Equation 9 should be

$$SD = (r^{1/2} \sigma_c / \alpha) (RT - t_r).$$

In the very next paragraph, $m = r - \sigma_c / \alpha$ should be

$$m = r^{1/2} \sigma_c / \alpha.$$

On p. 273:

Immediately after Equation 10, $m = r - \sigma_c / \alpha$, should be

$$m = r^{1/2} \sigma_c / \alpha.$$

On p. 276:

At the bottom of the left column, Equation 9 should be

$$SD = (r^{1/2} \sigma_c / \alpha) (RT - t_r).$$

At the top of the right column, Equation 11 should be

$$SD = r^{1/2} (s_c \sigma_c / s_c \alpha) (RT - s_r t_r).$$

On p. 277:

Just before Equation 12, $m = r - \sigma_c / \alpha$ should be

$$m = r^{1/2} \sigma_c / \alpha.$$
