Erratum

Baoxia Liu, Tjeerd M. H. Dijkstra, & Augustinus H. J. Oomes. The beholder's share in the perception of orientation of 2-D shapes. *Perception & Psychophysics*, **64** (8), 1227-1247.

On p. 1234, an incorrect figure was printed in place of Figure 6. The caption, however, was correct. The correct figure, with the caption, appears below:

Figure 6. The ratio between biases and circular standard deviations (CSDs) under cardinal and oblique orientations as a function of roundness for all the observers. The circles are the ratio for circular standard deviation; the crosses are the ratio for biases. Only roundness less than or equal to 5 (i.e., aspect ratio larger than or equal to 1.2) is shown. The error bars for the ratio between circular standard deviations are the 95% confidence interval, and the horizontal bar is the mean of the ratios for circular standard deviation.
