Published 2011, Vol 43, pp 910-915

The description of the alphabet WM span task on p. 912 of the published article is incorrect. On each trial of the content-embedded alphabet task that was administered in this study, a short list of words was presented sequentially for 1.5 s each, and participants had to mentally rearrange them to output them in alphabetical order. Complete procedural details are available from the second author. Most important, all of the statistical outcomes reported in the original article are correct, and all of the qualitative conclusions still hold.

The online version of the original article can be found at <http://dx.doi.org/10.3758/s13428-011-0112-x>.
