## **Publications Office Accepts Manuscripts on Disk**

The Psychonomic Society Publications Office is now able to accept manuscripts on IBM PC or compatible floppy disks, and authors of accepted manuscripts are encouraged to make use of this new capability. The use of such disks, in conjunction with typewritten manuscripts, should both reduce journal production costs and shorten publication lag time.

To use this new system, send your disk containing the file to the journal's editor *with* the final typewritten revision of your accepted manuscript. Note that the electronic version should match exactly the hard-copy version of the manuscript.

Use an ASCII format on a 36-kilobyte, double-sided, double-density IBM PC or compatible disk, and be sure to indicate the name of the software used. Also, although not required, it would be helpful if the electronic version was adjusted to eliminate (1) hyphens at the ends of lines; (2) right-hand justifications; and (3) specialized word processor commands, such as those that create underlines, boldface, centering, tabs, and indents, or those that insert excessive space into the text, such as page commands.

## **The Second European Meeting on the Experimental Analysis of Behavior (EMEAB II) Liège, Belgium July 26-30, 1988**

The Second European Meeting on the Experimental Analysis of Behavior (EMEAB II) will be held at the University of Liège, Belgium, July 26-29, 1988. A satellite symposium on drug addiction will be held on July 30, 1988.

The aim of the meeting is to bring together, from different scientific traditions, researchers who are interested in the methods and concepts of modern behaviorism.

Papers on the following themes will be considered for presentation at the meeting: Timing and time perception • Verbal behavior • Rational thinking in animals and humans • Behavioral medicine • Drug addiction • Conceptual and epistemological problems • Developmental studies • Comparative studies • Schedule control of behavior • Psychophysiological and psychopharmacological studies.

For further information, call or write to: M. Richelle or H. Lejeune, EMEAB II, University of Liège, 5 boulevard du Rectorat B 32, Sart-Tilman 4000 Liège, Belgium (Phone: 41/562016 or 562017).
