The Second International Conference on Visual Search Durham, England September 3-6, 1990

The Applied Vision Association is organizing the second international conference devoted totally to the multidisciplinary topic of visual search. This is to be held at the University of Durham on September 3-6, 1990. The conference will attempt to address all aspects of visual search processing from theory to practice, and will include (but not be limited to) the following sessions: Attention and Segmentation, Eye Movements, Computer Vision, Search Modeling, Applied Aspects of Search. There will also be a workshop. The conference proceedings will be published.
