IIInd Conference for Socio-Cultural Research Vygotsky–Piaget Geneva, 11–15 September 1996

The conference will pursue three main objectives.

It will be an homage to Piaget and Vygotsky on the centennial of their birth.

It will contribute to the reconfiguration of the human sciences around a sociocultural perspective in contrast to the paradigms of neurosciences on the one hand, spiritualist psychology on the other.

It will provide a forum for discussing and developing the sociocultural approach.
