## **Fechner Centennial Symposium on Foundational Problems of Psychophysics Bonn, West Germany June 24-27, 1987**

In honor of the G. Th. Fechner centennial, the Psychological Institute of the University of Bonn is organizing a symposium on foundational problems of psychophysics to be held in Bonn June 24-27, 1987. The aim of the symposium is to evaluate current trends in psychophysical theory—with an emphasis on visual perception—from the perspectives of perception, psychophysics, neurophysiology, computer vision, and abstract measurement theory.

Speakers will include: M. Akita (Kyoto), D. Albert (Heidelberg), W. H. Batchelder (Irvine), R. Boynton (San Diego), H. Colonius (Oldenburg), J. Drösler (Regensburg), J. Cl. Falmagne (New York), G. Geissler (Leipzig), R. L. Gregory (Bristol), R. A. M. Gregson (Armidale), A. Hajor (Giessen), T. Indow (Irvine), H. Irtel (Regensburg), B. Julesz (Murray Hill), R. D. Luce (Harvard), J. Lukas (Regensburg), D. I. A. MacLeod (San Diego), L. Narens (Irvine), E. Pöppel (München), T. Poggio (MIT), W. Prinz (Bielefeld), R. N. Shepard (Stanford), L. Spillmann (Freiburg), D. Vorberg (Marburg), B. Wandell (Stanford), J. Yellott (Irvine).

The registration fee is \$75 (\$35 for students). For further information, please contact: Rainer Mausfeld, Department of Methodology and Statistics, Psychological Institute, University of Bonn, Roemerstr. 164, D-5300 Bonn 1, West Germany.

## ***Seeing Contour and Color* Third International Symposium of the Northern Eye Institute IBRO Satellite Symposium Manchester, England August 9-13, 1987**

These annual symposia are held in Manchester under the auspices of the Northern Eye Institute, and published by Pergamon Press as a series of proceedings on "Vision and Visual Health Care." The 1987 meeting will be a satellite symposium of the Second World Congress of Neurosciences (Budapest, August 16-21, 1987) sponsored by the International Brain Research Organization (IBRO).

The 1987 theme will be the physiological basis of, and possible interactions between, the neural processing of pattern and color. The general spirit of the meeting will be to promote the interdisciplinary exchange of information.

Proposed sessions will include retinal, LGN, and cortical processing mechanisms and associated theoretical models; the psychophysics of pattern and color vision; perceptual constancies; and the clinical applications of psychophysical and electrophysiological tests.

All registered participants will be welcome to submit a communication in the form of a poster. In each section of the meeting, internationally renowned speakers will describe current research findings, some submitted contributions may be selected for oral presentation, and posters will be discussed.

For further details and registration forms, please contact: Richard Gregory, Department of Biochemistry, Medical School, Stopford Building, University of Manchester, Oxford Road, Manchester M13 9PT, U.K. (Telephone: 061-273-8241, Ext. 43).
