

## ERRATUM

Nimon, K., Lewis, M., Kane, R., & Haynes, R. M. (2008). An R package to compute commonality coefficients in the multiple regression case: An introduction to the package and a practical example. *Behavior Research Methods*, **40**, 457-466.

On page 458 of the article, the final line of Table 2 contains an error: The final term should be negative rather than positive. The corrected table is shown below.
