Retraction Note: Atten Percept Psychophys

<https://doi.org/10.3758/s13414-018-1496-9>

This article has been retracted at the request of all authors. In Experiments 3 and 4 an honest error in the experimental script pointed to the wrong stimulus file on 6.25% of trials, resulting in inaccurate output for each participant. Unfortunately, it negatively impacted the d' scores for the incongruent trials in both experiments. As a result, the authors no longer feel that the conclusions of the article are valid. After correcting the output files we note that the null model was preferred, given the data in Experiments 3 and 4 and the range of models considered. A revised manuscript, reporting the correct data and a conceptual replication, will be submitted to the journal where it will be subject to conventional peer review. We would like to apologize to the scientific community, the editors, and the reviewers for this deeply regrettable mistake.

The online version of the original article can be found at <https://doi.org/10.3758/s13414-018-1496-9>
