The author acknowledges an honest error in the tables of the appendix of this article. Table 4 actually refers to

the results of Experiment 3, and Table 5 refers to the results of Experiment 2. In addition, in Table 6, for the Reconstruction results, the standard deviations and means were placed in the wrong columns. An updated Table 6 is available below.

Table 6 Summary descriptives for the conditions of interest in Experiment 4

Word frequency	List position											
	1		2		3		4		5		6
