Erratum to: Behav Res DOI 10.3758/s13428-016-0776-3

- The section entitled “Additional analyses” should be part of the “Results” section (same as subsection “Replication of original study” and both embedded in the Online experiment part of the paper) and not a separate section.
- Table 4: the “(Intercept)” row should not be part of the title row. Instead, it should be at the same level as “Hand” or “Sequence” (see Table 4).
- Similarly for Table 5: the “(Intercept)” row should not be part of the title row. Instead, it should be at the same level as “Hand” or “Sequence” (see Table 5).
- On Fig. 3 “RT & IKI distributions” should not appear above the figures.

Table 4 Mixed model regression coefficient for RTs

	β	SE	<i>t</i>	95% CI	(sig.)
