In page 1014, there is an error in Eq. (1) that the author inadvertently missed out. The modification is as follows:

Signal Intensity (SI) $\propto M_z \propto M_{z,0} \times (1 - 2\exp(-TI/T_1)) \Rightarrow$ Signal Intensity (SI) $\propto M_z \propto M_{z,0} \times (1 - \exp(-TR/T_1))$.

The result is no problem because we have used the correct equation.
