CONTRIBUTORS

Jessica Ball, M.P.H., PhD, is a Professor in the School of Child and Youth Care at the University of Victoria. She is the director of a grant-funded program of research and education on the cultural nature of child and family development (www.ecdip.org) and has led several innovative education programs and research projects involving community-university partnerships to cogenerate concepts and practices. Dr. Ball is the author or coauthor of over 100 journal articles and book chapters and three books.

Susan Dahinten, RN, PhD is an Associate Professor in the School of Nursing at the University of British Columbia. Dr. Dahinten's research program addresses the intersection of family and community factors that influence the health and developmental trajectories of children and youth, and the evaluation of public health screening programs and family-focused interventions designed to support healthy childhood development.

Laurie Ford, Ph.D. is an Associate Professor in the Department of Educational and Counselling Psychology and Special Education and a Research Fellow with the Human Early Learning Partnership (HELP) at the University of British Columbia. A former special education teacher, Laurie is a School and Child Clinical Psychologist. Her primary research interests are in early childhood assessment, family, neighborhood, and community factors that promote early school success and family/professional relationships.

Hillel Goelman, PhD, is Professor in the Department of Educational and Counselling Psychology, and Special Education and is an Associate Member of the Department of Paediatrics and the School of Public and Population Health at the University of British Columbia in Vancouver, BC, Canada. Dr. Goelman also serves as the Chair of the Interdisciplinary Studies Graduate Program at UBC. His research interests are in early childhood intervention programs, developmental trajectories of typical and atypical children, and interdisciplinary studies on children and childhood.

Martin Guhn, PhD, is a Michael Smith Foundation for Health Research Postdoctoral Fellow at the University of British Columbia, with a background in Human Development, Psychology, and Music. His main research interests are in the joint influences of social, cultural, and demographic factors on children's development and health; bioecological theories of development;

school reform; and validity theory for population-level child development assessment.

Michaela Gummerum, PhD, is a Lecturer (Assistant Professor) of Psychology at the University of Plymouth, UK. Her research focuses on children's and adolescents' social development, particularly the development of fair and moral behavior, cognitions, and emotions, development of relationship concepts, and economic socialization. She approaches these topics from a cross-cultural and interdisciplinary perspective.

Susan Herrington teaches in the School of Architecture and Landscape Architecture at the University of British Columbia. Her book, 'Cornelia Hahn Oberlander: Making the Modern Landscape,' will be published in 2012 by the University of Virginia Press. The book is a biography of the Landscape Architect who designed the first adventure playground in Canada at Expo '67.

Virginia E. Hayes, RN, PhD is Professor Emerita at the University of Victoria School of Nursing and recently retired as Senior Practice Leader for Nursing Research at the Children's & Women's Health Centre of British Columbia. Her research program centers on issues for children with chronic conditions and disabilities and their families in community and acute care settings. She led an interdisciplinary team that examined the impact of training community-based child health practitioners in early assessment of infants to promote early intervention for neuromotor delays.

Lucy Le Mare (PhD), a Developmental Psychologist, is an Associate Professor in the Faculty of Education at Simon Fraser University. Emphasizing the centrality of social relationships and cultural-historical context, her research focuses on risk and resilience processes and school adjustment in diverse populations (e.g., children-in-care; intercountry adoptees; and Indigenous children).

Mari Pighini completed her PhD in 2008 while working with The CHILD Project. Her graduate work focused on parents with children with disabilities and their experiences while transitioning between preschool and school services. Mari continues her work with vulnerable children and families through her postdoctoral research and work with the Including All Children: Expanding Partnerships Project funded by the Social Development Partnerships Program.

Jayne Pivik, PhD, is a community psychologist with a background in Developmental Psychology and environmental influences on health. Her research interests are in identifying how communities can positively influence child/youth health, development and well-being; services and interventions promoting child and youth development; human-environmental interactions; methods for engaging children and youth in services that impact them; and equitable access for individuals with disabilities and the

elderly. She is Founder and CEO of Apriori Research (www.aprioriresearch.com) and an Honorary Associate of the Human Early Learning Partnership, University of British Columbia.

Mary Russell, PhD, is Professor of Social Work at the University of British Columbia, where she has been teaching since 1974, primarily in the areas of research methodology and family violence. Most recently, she has been engaged in developing online courses on family violence. Her research interests include children and poverty, and family violence.

Suretha Swart is a PhD candidate in School Psychology at the University of British Columbia, with a background in clinical psychology and child and youth mental health. Her current research and clinical interests revolve around supporting students with Fetal Alcohol Spectrum Disorder (FASD) and other disabilities in schools.

Anne Synnes, MD, is a clinical neonatologist at British Columbia's Women's Hospital, medical director of the Neonatal Follow-Up program, Clinical Associate Professor at the University of British Columbia, and member of the Child and Family Research Institute. Her clinical research interests are evaluating the clinical outcomes of neonatal intensive care unit (NICU) graduates and changing NICU practices to improve outcomes.

Lillian Tse received her Master of Science in Nursing from University of British Columbia in 2005. She was the recipient of the 2003 Sheena Davidson Fund for her study on Parents' Perceptions about a Behavioural Sleep Intervention. Tse is currently a public health nurse specialized in the health and development of young children.

Silvia Vilches is completing her PhD in Social Planning, focusing on the experiences of lone mothers with welfare reform under neoliberal regimes. Her past work focuses on community capacity development, the community benefits of early childhood education, gender issues in the social and economic structures available to low-income families, and equity issues for Aboriginal peoples and for gay, lesbian, bisexual, two-spirited, and transgendered people.
