INDEX

- ABU, *see* asymptomatic bacteriuria
Acanthamoeba castellanii, 89
Acinetobacter spp.
 in urinary tract infection, 280
Actinomyces spp.
 in prostatitis, 293
Acute pyelonephritis, 284
Aggregation substance
 Asa373 adhesin of *E. faecalis*, 79
 in *Enterococcus faecalis*, 75-82
 RGD motifs in, 78
 and sex pheromone plasmid, 76
AirS two-component system, 6, 137-141
 cognate regulator in, 138,
 in uropathogenic *E. coli*, 137-141
Aminoglycosides, 285
Antibiotic sensitivity testing, 302
Antibiotic therapy
 of acute pyelonephritis, 284
 of asymptomatic bacteriuria, 285-286
 of catheter related UTI, 284-288
 of recurrent cystitis, 282-283
 of uncomplicated bacterial cystitis, 280-281
 of urethral syndrome, 283-284
 of urinary tract infection, 279-286
Antibody profiles
 to MRSA
 in healthy persons, 275-277
 in septic patients, 275-277
ASB, *see* asymptomatic bacteriuria
Asymptomatic bacteriuria, 285-286,
 see also ABU or ASB
 antibiotic therapy of, 285-286
 in diabetic women, 249-253, 309-313
 frequency of, 11
 risk factors for, 311-313
Asymptomatic bacteriuria (*cotn' d*)
 virulence factors of *E. coli* in, 252-253
Azithromycine, 283
Bacterial lectins
 in urinary tract infection, 183-190
Bacteroides spp.
 in prostatitis, 292-293, 296
Bacteroides ureolyticus
 in prostatitis, 292-293, 297
Basement membrane, *see also* BM
 adherence to
 by S fimbriae of *E. coli*, 195
 by type 1 fimbriae of enteric bacteria, 195
 by *Y. pestis*, 197
Betalactam antibiotics, 281, 285
Bifidobacterium spp.
 in prostatitis, 293, 295
Biofilm formation
 induction by environmental factors, 159-165
 by *S. epidermidis*, 6, 103-109, 151-156, 159-165
 phase variation in, 152-153
Blood group antigens
 ABO-status, 204, 206-211
 B-antigen, 204, 207
 Lewis blood group, 204, 206-211
 and virulence of uropathogenic *E. coli*, 201-210
 P₁-antigen, 204-211
Candida albicans
 adherence to host tissues, 160
 hyphae formation by, 169
 phenotypic switching in, 170
 in vivo expression technology, 171
 SAP genes and virulence in, 170-173

- stage-specific virulence gene
 - activation, 172
 - urinary tract infection, 1, 2
 - virulence gene expression in, 167-174
- Candida glabrata*
 - in prostatitis, 295
 - in urinary tract infection, 1, 2
- Candida* spp.
 - in prostatitis, 292-295
- Catheter associated UTI, 284-285
 - diagnosis of, 285
 - Klebsiella* in, 197
 - Proteus* in, 197
- CDT, *see* Cytolethal dystending toxin
- Cell activation
 - LPS-independent
 - by P-fimbriated *E. coli*, 14-15
- Cephalosporin
 - third generation, 284
- Chemokine responses
 - to *E. coli*, 15-16
- Chip technology
 - in UTI, 6
- Chlamydia trachomatis*
 - in asymptomatic urogenital infection, 2, 345-349
 - detection by PCR and LCR, 6,347-348
 - in prostatitis, 2,292-294
 - in symptomatic urogenital infections, 326,345-349
 - in urethral syndrome, 283
- Ciprofloxacin, 281
- Citrobacter freundii*
 - invasion into host cells, 225-233
 - internalization pathway of, 227
 - internalization receptor for, 229
 - in prostatitis, 292-293,295-296
 - type 1 pili of, 228,232
- Clostridium* spp.
 - in prostatitis, 293
- CNF1, *see* Cytotoxic necrotizing factor
- Collagen, type IV binding
 - by Dr fimbriae, 194, 196
 - by MrkD adhesin, 194
 - by *Shigella dysenteriae*, 191
- Collagen type V binding
 - by MrkD adhesin, 194, 196
- Collagens
 - adhesion to
 - by CB-FimH, 194
 - by YadA, 194
- Corynebacterium* spp.
 - in prostatitis, 292-293,296
- Cotrimoxazole, 281,283-284
- Cross-reactivity
 - of *P. penneri* LPS
 - with *P. vulgaris* LPS, 342
- Curli, 90,219-224, *see also* Thin aggregative fimbriae,
- Cytokine responses
 - to P-fimbriated *E. coli*, 13, 19
 - to type 1-fimbriated *E. coli*, 13
- Cytolethal dystending toxin, *see also* CTD
- Cytolethal dystending toxin (*cont'd*)
 - in porcine diarrhea *E. coli*, 331-332
 - in uropathogenic *E. coli*, 3,335-337
- Cytotoxic necrotizing factor I, *see also* CNF I
 - cellular effects of, 46
 - in porcine diarrhea *E. coli*, 331-332
 - structure-function relationship of, 47-48
 - of uropathogenic *E. coli*, 3,25,45-49,335-337
- Decay accelerating factor, 143-149
- Diabetes mellitus
 - asymptomatic bacteriuria in, 249-253,309-313
 - cytokine secretion in women with, 255-261
 - virulence factors of *E. coli* in women with, 252-253
- Diagnosis of UTI, 280-286,311
- Differential gene expression
 - in fimbrial regulation, 116
- Display systems
 - with FimH-molecule, 7
 - with flagella-protein, 7
 - with OmpS, 135
- Doxycycline, 283, 349
- Enterobacter* spp.
 - in urinary tract infection, 280
- Enterococcus faecalis*
 - aggregation substance of, 75-82
 - in prostatitis, 293, 295
 - sex pheromone plasmid of, 76
 - in urinary tract infection, 326

- Enterocystoplasty, *see* Reconstructed bladder
- Escherichia coli*
- AirS two-component system in, 137-141
 - binding to ECM, 194-195
 - CDT production by, 331-332, 335-337
 - CNF1 production by, 2, 25, 45-49, 331-332, 335-337
 - collagen binding by, 194-196
 - cytokine responses to, 13, 19
 - hemolysin production by, 3, 25-26, 55, 57-61, 127-131
 - fibronectin binding by, 194
 - F1C-fimbriae of, 213-216
 - high pathogenicity island in, 69-72
 - group II capsule of, 95-99
- Escherichia coli* (*cont 'd*)
- K1 capsule of, 95
 - K5 capsule of, 95-99
 - laminin binding by, 194
 - main uropathogen, 1, 280
 - OMPs-display-system in, 133-136
 - pathogenicity islands in, 2, 25-30, 58, 60
 - P-fimbriae of, 5, 25, 119, 332-333, 335-337
 - P-related fimbriae of, 26, 55
 - RpoS in virulence of, 90
 - S-fimbriae of, 25, 119, 332-333, 335-337
 - type 1 fimbriae of, 63-67, 188
 - urinary tract infection in dogs, 302-303
 - urinary tract infection in man, 280, 326
- Eubacterium* spp.
- in prostatitis, 293, 295
- Extracellular matrix, *see also* ECM, 193-198
- binding to
 - by *E. coli* type-1 fimbriae, 194-195
 - by *E. coli* P fimbriae, 194-195
 - by *E. coli* S fimbriae, 194-195
 - by *Klebsiella* type-3 fimbriae, 194-195
 - by Pla of *Y. pestis*, 194, 196
 - by Rck and PagC of *S. typhimurium*, 194, 196
 - by YadA of *Y. enterocolitica*, 194-195
- FhuA protein
- as antibiotic transporter, 37
 - ferrichrome binding site of, 38
 - as iron transporter, 35
- Fibronectin binding
- by CsgA protein of curli, 194
 - by FimH of *E. coli*, 194
 - by PapE and PapF of *E. coli*, 194
 - by S fimbriae of *E. coli*, 194
- FimA protein, 4, 63
- FimF protein, 66
- Fim G protein, 66
- FimH protein, 4
- ECM binding by, 195
 - fibronectin binding by, 66
 - fine sugar specificity of, 186-190
 - pathoadaptive mutation of, 189
- Fine sugar specificity
- of *E. coli* FimH, 186-190
- FIS protein, 98
- Fluoroquinolones, 281, 283-284
- Fosfomycine, 281
- Fusobacterium* spp.
- in prostatitis, 293
- F1C-fimbriae
- adherence studies, 215
 - glycolipid receptor for, 213-216
 - and urinary tract infection by *E. coli*, 213
- G-fimbriae
- type IV collagen binding by, 5
- Gal a1-4 Gal
- receptor molecule, 4, 13
- Gardnerella vaginalis*
- in urinary tract infection, 280
- Global regulators
- Crp, 114
 - H-NS, 114
 - LeuX, 27, 29
 - Lrp, 114
 - StpA, 114
- Group II capsule of *E. coli*
- biosynthesis of, 97
 - K5 capsule
 - organisation of gene clusters for, 96

- regulation of expression, 95-99
 - RfaH involvement in regulation, 98
- Hha protein, 6, 127-131
 - complex with H-NS, 128
 - modulation of haemolysin expression by, 130
- H-NS protein, 6, 98, 127-131
 - complex with Hha, 128
 - modulation of hemolysin expression by, 130
- High pathogenicity island,
 - in high-virulent *Yersinia*, 26.69
 - in uropathogenic *E. coli*, 69-72
- IHF protein, 98
- IL-6 secretion, 5
 - in diabetic women with ASB, 258-260
- IL-8
 - induced by P-fimbriae, 5, 13
 - receptor for, 5
 - deficiency in mice, 18, 19
 - deficiency and recurrent
- IL-8 (*cont'd*)
 - pyelonephritis, 20
 - secretion in diabetic women with ASB, 258-260
- Immunodominant proteins of MRSA, 276-278
- Immunostimulation with Urostim, 325-329
- Invasion factor of *Citrobacter freundii*, 5, 225-233
- Iron transport
 - FhuA mediated ferrichrome transfer, 35-37
 - yersiniabactin siderophore system, 70-72
- Iron uptake system
 - AirS two-component system, 137-141
 - of *E. coli* K-12, 3
 - iron-repressible proteins, 26
 - of pathogenic *Yersinia*, 3, 70-72
 - of uropathogenic *E. coli*, 3
- Klebsiella oxytoca*
 - serotypes of, 238-239
 - serum resistance of, 238-239
 - siderophore production by, 238-239
- Klebsiella pneumoniae*
 - and multiresistance, 2
 - serotypes of, 238-239
 - serum resistance of, 238-239
 - siderophore production by, 238-239
 - urinary tract infection by, 326
- Klebsiella* spp.
 - urinary tract infection by, 280
- Laminin binding
 - by FimH of *E. coli*, 194
 - by Pla of *Y. pestis*, 194
 - by Rck and PagC proteins of *S. typhimurium*, 194
 - by YadA of *Y. enterocolitica*, 194
- Legionella pneumophila*
 - RpoS in virulence of, 89
- Lipopolysaccharide, *see also* LPS of *P. penneri*, 177-180, 340-343
- Lrp protein, 6, 87
- Membrane sphingolipids
 - in signal transduction, 13
- Mobiluncus* spp.
 - in prostatitis, 293
- MRSA, *see* Methicillin resistant *Staphylococcus aureus*
- Mycoplasma hominis*
 - in prostatitis, 292
 - in urinary tract infection, 2, 280
- Nitrofurantoin, 283
- Norfloxacin, 281
- Nucleoid associated proteins
 - role in virulence gene expression, 114
- O-specific polysaccharides of *P. penneri*, 340-343
- OmpS protein, 133-136
 - application in localization of receptor binding by PapG, 135
 - display-system, 135
 - structure of, 134
- Pathogenicity islands, *see also* PAI of enterohaemorrhagic *E. coli*, 2

- of uropathogenic *E. coli*, 2, 25-30
- P-fimbriae, *see also* P (Pap)-pili, 25, 113, 119
 - fibronectin binding by, 5
 - on pig diarrhea isolates, 332-333
 - on uropathogenic *E. coli*, 335-337
- P-related fimbriae, *see also* Prf, 26, 55
- Pap operon
 - transcriptional analysis of, 119-122, 125
- PapB protein, 6
 - DNA binding by, 124
 - structure and function of, 123-126
- PapI protein, 6
- Peptostreptococcus* spp.
 - in prostatitis, 292, 293-294, 296-297
- PIA antigen, *see also* Polysaccharide intercellular adhesin
 - in *S. aureus*, 4
 - in *S. carnosus*, 107
 - in *S. epidermidis*, 4, 106-107, 151-156
- Polysaccharide intercellular adhesin, *see* PIA
- Porphyromonas* spp.
 - in prostatitis, 292-293, 295
- Prevotella* spp.
 - in prostatitis, 292-293, 295
- Propionibacterium* spp.
 - in prostatitis, 292-293, 295-297
- Prostatitis
 - aerobic bacteria in, 2, 289-297
 - anaerobic bacteria in, 289-297
 - categories of, 289-290
- Proteases
 - in *Candida albicans* virulence, 4
- Proteases (*cont'd*)
 - in *Proteus* virulence, 4
- Proteome analysis
 - for characterization of PAIs, 29
- Proteus mirabilis*
 - urinary tract infection by
 - in dogs, 302
 - in man, 280
- Proteus penneri*
 - as emerging uropathogen, 2
 - genetic diversity of, 315-318
 - lipopolysaccharide patterns of, 179
 - new serogroups of, 339-343
 - outer membrane proteins of, 179
 - virulence assays for, 179-180
- Proteus* spp, 280
- Proteus vulgaris*
 - O-antigens of, 243-246
 - epitope specificity of antisera to, 245-246
 - immunochemical analysis of, 245-246
- Providencia stuartii*
 - in prostatitis, 292, 296
- Pseudomonas aeruginosa*
 - and multiresistance, 2
 - rpoS in virulence, 88, 91
 - in urinary tract infection, 280
- Pseudomonas* spp.
 - UTI in dogs, 302
- RAPD-PCR
 - for analysis of *P. penneri*, 321-324
- Reconstructed bladder
 - adherence of *E. coli* in patients with, 263-270
 - virulence determinants of *E. coli* in patients with, 268-270
- Recurrent cystitis, 282-283
- Regulatory cross-talk,
 - and decay accelerating factor-binding adhesins, 143-149
 - and phase switching of type 1 fimbriae, 146-149
 - in Pap-pili expression, 117
- REP-PCR
 - for investigation of *P. penneri*, 315-318
- RfaH protein, 6, 98
- RpoS, 6, 85-91, *see also* Sigma factor, σ^s
- S-fimbriae
 - of uropathogenic *E. coli*, 25, 119, 335-337
 - on pig diarrhea isolates, 332-333
- Salmonella typhimurium*
 - rpoS in Virulence of, 89-90
- Sigma factor σ , *see also* RpoSs
 - physiological function of, 86
 - promoter recognition by, 86
 - role in bacterial virulence, 88-90
- Sfa* operon
 - transcriptional analysis of, 119-122
- SigB transcription factor, 159, 163
- Significant bacteriuria, 302

- Sphingomyelinase activation, 14
- Staphylococcus aureus*
 biofilm formation by, 2
ica operon in, 108
 methicillin resistant, see also MRSA
 immunodominant proteins of,
 273-278
 urinary tract infection by, 280
- Staphylococcus carnosus*
ica operon in, 107
 PIA production by 107
- Staphylococcus epidermidis*
 biofilm formation by, 2, 103, 151,
 154-156, 159, 164
 in catheter associated infection, 103-
 109
ica operon in, 106, 151, 159
 modulation of PIA expression, 151-
 156
 polysaccharide intercellular adhesin,
 106, 151-154, 159, see also
 PIA
 in prostatitis, 292-293, 296
 SigB function in, 163
- Staphylococcus saprophyticus*
 in urinary tract infection, 280
- Staphylococcus* spp.
 and urinary tract infection in dogs,
 302-303
- Streptococcus a-haemolyticus*
 in prostatitis, 292-293, 296
- Streptococcus* spp.
 and UTI in dogs, 302-303
- Subtractive hybridization
 for the characterization of PAIs, 29,
 53-56
- Therapy, see Antibiotic therapy
- Thin aggregative fimbriae, 90, 219-224
 see also Curli,
 frequency on urinary *E. coli*, 221
- Tissierella* spp.
 in prostatitis, 293
- tRNA genes
 as parts of pathogenicity islands, 27
- TNF- α
 concentration of
 in diabetic women with ASB,
 259-261
- Trimethoprim, 281
- Type 1 fimbriae, see also Type 1 pili
 of *Citrobacter freundii*, 5, 225, 232
 collagen adherence by, 64
 functional variability of 63-67
 plasminogen activation by, 66
 plasminogen receptor function of, 66
- Uncomplicated bacterial cystitis, 280-281
- Ureaplasma urealyticum*
 in prostatitis, 2, 292-295
 in urethral syndrome, 283
 in urinary tract infection, 2, 280
- Urethral syndrome, 283
- Urine cultures, 281-282
- Urinary tract infection
 in diabetic women, 249-253
 in dogs, 301-304
 in patients with reconstructed
 bladder, 263-270
- Uropathogenic character
 of porcine diarrhea *E. coli*, 331-333
- Urostim immunostimulator
 clinical studies with, 325-329
- Virulence factors
 of uropathogenic *E. coli*
 isolated from cats, 305-307
 isolated from dogs, 305-307
 isolated from man, 305-307,
 335-337
- Veilonella* spp.
 in prostatitis, 293, 295
- Yersinia enterocolitica*
 high pathogenicity island of, 69
rpoS in virulence of, 89
 ECM binding by YadA, 194-197
- Yersinia pestis*
 ECM binding by Pla, 194, 196
- Yersinia pseudotuberculosis*
 high pathogenicity island of, 69
- Yersiniabactin, 26, 70-72
- α -haemolysin toxin
 of *E. coli*, 3, 25, 26, 55, 57-61
 and in vivo virulence, 60
- β -1,6 N-acetyl glucosamine polymer
 in biofilm formation, 4
- $\gamma\delta$ T cells
 in antimicrobial defense, 17
- σ^s , see RpoS
