A

Abscess drainage, 95, 154
Acoustic
 enhancement, 9
 impedance, 3, 10
 shadowing, 9
Adenopathy
 malignant, 30
 mediastinal, 26, 31, 41
Adjuvant therapy, 156
Air-filled alveolar tissue, 105
Airway anatomy, 13, 24
 central, 13
 upper, 13–15
Airway infiltration, 98
American Joint Committee on Cancer (AJCC), 48
Anesthesia, 127–128
Aortic arch, 72, 135
Aorto-pulmonary window (APW LN), 68, 135
Apicoposterior, 23
Argon plasma coagulation (APC), 71, 89,
 94–95, 154
Atelectasis, 48, 76–79, 81, 103, 105
Attenuation, 2–3, 6, 65
Autofluorescence (AF), 70–72, 91
Automated sputum cytology, 100
Axial resolution, 3–4
Azygos vein, 69, 134

B

Balloon catheter, 62–63, 65
Basal segmental bronchus, 135, 139
Beam-width artifact, 10
Biopsy
 bronchoscopic, 119, 138–139
 buttonhole, 74
 channel, 62, 64
 endobronchial, 28, 31
 forceps biopsy, 29–30
 localization for, 75
 needle, 119, 139
 percutaneous needle, 138
 tools, 104
 transbronchial (TBBx), 30, 40, 104, 109, 112–113,
 114, 149
 transbronchial lung (TBB), 139, 156
 ultrasound-controlled transbronchial needle, 73
Bleeding, 38, 40, 69, 75, 79, 96, 141
Brachiocephalic artery, 135
Brachytherapy, 66, 71, 76, 84–85, 89,
 95–96, 154
 EBUS-controlled, 114
Bronchia alveolar lavage, 149
Bronchial cytology, 28

Bronchial tree

 left, 22–23
 lower lobe, 23
 main stem bronchus, 22
 upper lobe and lingula, 23
 right, 18–22
 bronchus intermedius, 20
 lower lobe basilar segments, 21–22
 main stem bronchus, 18–19
 middle lobe, 20–21
 upper lobe bronchus, 19–20
Bronchial wall, 64–67, 70–71, 89–91, 94–95, 99, 154–155
Bronchoalveolar lavage, 28, 31
Bronchogenic
 cyst, 139
 malignancy, 26, 29, 37
Bronchoscope, 13–14, 20–21, 23, 25, 32–36, 40–41, 64, 66, 68,
 70, 105–106, 114, 121–122, 125–131, 133–135
 damage, 36
 technique, 25, 81
 therapy, 79
 trauma, 40
 ultrasonography, use of, 121
 video, 129
Bronchoscopy, 13–26, 30–31, 36, 40–41, 62, 69, 79, 85, 89, 91,
 93–95, 97, 104, 111, 114, 122, 124, 127, 136, 141, 149
 nondiagnostic, 158
 regular, 69, 95, 97
 virtual, 114

C

Carcinoid tumor, 82
Cartilage ring, 131
Cervical mediastinoscopy, 149–150, 157
Chemotherapeutic agent, 84, 161
Chemotherapy, 26, 50, 93, 138
Chest computed tomography, 89, 158
Chondrosarcoma, 139
Clinical staging, 46, 54, 56, 61, 72
Clopidogrel, 40
Color flow, 7–8
Complete remission (CR), 71, 91, 93
Computed tomography (CT), 16, 26, 61, 67, 103, 119
Continuous wave, 7
Cough reflex, 128
Cryotherapy, 89, 94
CT-guided fine needle aspiration (CT-FNA), 104
CT imaging, 97, 114
Cytology brushing, 29

D

Diagnostic and therapeutic decision, 85
Diagnostic modalities, 39

Diff-Quik, 132
 Distal airways, 145
 Doppler
 effect, 7
 frequency shift, 7
 function, 68, 72
 imaging, 8
 sonographic assessment, 140
 Duty factor, 3
 Dyspnea, 79

E

EBUS, *see* Endobronchial ultrasound (EBUS)
 Echo, 2–3, 5–10, 65–66, 77–78, 105
 Echo-camera, 121
 Echogenic dimpled tip, 125
 Echogenicity, 6, 68
 Elastography, 84
 Electromagnetic navigation, 114–115
 Electrosurgery, 89, 94
 Endobronchial high dose radiation, 66
 Endobronchial images, 120, 129
 Endobronchial therapy, 95
 Endobronchial tumors, 28
 Endobronchial ultrasound (EBUS)
 assessment, 91, 94
 atelectasis, 76
 -controlled brachytherapy, 114
 convex, 96
 convex probe (CP-EBUS), 119–123, 128, 129–130,
 136–137, 139–142
 -guided TBBx, 105, 111, 114
 images, 76, 85, 91, 99, 134
 radial, 96
 -scope, 73
 transbronchial fine needle aspiration
 (EBUS TBNA), 158–160
 Endoluminal
 anatomy, 13
 high dose radiation (HDR), 66, 71, 90
 high dose radiotherapy, 71
 techniques, 94
 therapy, 94
 Endoscopic Ultrasound, 157–158
 Endoscopy, 14, 150, 155
 Endotracheal tube, disadvantage of, 128
 Esophageal cancer, 98–99, 146
 See also Thyroid
 Esophageal scanning, 147
 Esophageal trajectory, 147
 Euler-Liljestrand reflex, 72
 Excessive radiation exposure, disadvantages of, 114
 Exploratory thoracotomy, 158
 Extended working channel (EWC), 65, 76, 85, 108, 114

F

Fiber-optic technologies, 122
 Fistula, 96
 Flexible bronchoscope, 25, 32, 62, 106, 121–122

Flexible bronchovideoscope image, 129
 Fluorescence
 method, 100
 guidance, 30, 37, 104–105, 108
 image, 105
 Fluoroscopy-induced radiation, 111
 Focal zone, 3–5
 Fraunhofer zone, 5
 Fresnel zone, 5
 Futile thoracotomy, 149, 157–158
