Adrenomedullin: biochemistry
- Discovery of adrenomedullin 1
- PAMP 7
- Production of adrenomedullin in cultured cells 8
- Structure of adrenomedullin 3
- Structure of adrenomedullin precursor 5
- Structure of adrenomedullin gene 5
- Tissue distribution of adrenomedullin 7

Adrenomedullin as an adipokine
- Adrenomedullin expression during adipocytes differentiation in 3T3-L1 cells 155
- Adrenomedullin expression in adipose tissues 162
- Receptor and biological functions of adrenomedullin in adipocytes 162
- TNF-alpha upregulates adrenomedullin expression in in 3T3-L1 cells 158

Adrenomedullin expression and secretion
- Adrenomedullin expression and secretion in various cells 61
  - Adipocytes 70
  - Blood cells 70
  - Cardiac cells 66
  - Epithelial cells 67
  - Fibroblasts 65
  - Keratinocytes 68
  - Neurons, glia and related cells 71
  - Other AM-secreting cells 73
  - Tumor cells 72
  - Vascular endothelial cells and smooth muscle cells 62
- Common features of adrenomedullin expression and secretion 73
- Hypoxia and oxidative stress 75

Adrenomedullin gene

Factors regulating adrenomedullin gene expression 45
Inflammatory cytokines and NO 45
Interaction with other neuroendocrine factors 47
Ischemia and oxidative stress 46
Mechanical and physical stimuli 46
Oncogene and carcinogens 48
Genomic structure of the human adrenomedullin gene 41
Polymorphisms of human adrenomedullin gene 50
Microsatellite DNA polymorphism of human adrenomedullin gene 50
Single nucleotide polymorphism of human adrenomedullin gene 51
Promoter activity of 5'-flanking region of human adrenomedullin gene 43

Adrenomedullin knockout mouse and transgenic mouse
Arteriosclerosis 169
Blood pressure regulation 170
Vasculogenesis 168

Adrenomedullin receptor and signal transduction
cAMP/protein kinase (PKA) pathway 25
vasodilation 25
mitogenic action 26
anti-oxidant action 27
Characterization of adrenomedullin receptor 18
CRLR/RAMP interaction:receptor modification and the mechanism of ligand specificity 24
Discovery of CRLR/RAMP system 22
NO/cGMP/protein kinase G(PKG) pathway 30
PI3 kinase pathway 31
Protein tyrosine kinase extracellular regulated kinase (ERK) pathway 29

Structure-activity relationship of adrenomedullin 20
Unknown signal transduction pathways for apoptosis and migration 31
anti-apoptotic effect 31
anti-migration effect 33

Biological Action of adrenomedullin
Central nervous system 91
Endocrine 88
adrenal gland 89
pancreas 90
pituitary 88
reproductive effects 91
Heart 85
Kidney 86
Others 93
Bone 94
digestive apparatus 94
immunity and inflammation 95
lungs 93
neoplasm 95
reproductive organs 94
Vasculature 83

Circulating adrenomedullin
Adrenomedullin assays 105
Mature and glycine-extended adrenomedullin 107
Origin and metabolic sites of adrenomedullin 105
origin of circulating adrenomedullin 106
metabolic clearance of adrenomedullin 107
Plasma adrenomedullin levels in cardiovascular diseases 110
congenital heart disease 121
heart failure 114
hypertension 110

myocardial infarction 116
pulmonary hypertension 120

Pleiotropic effect of adrenomedullin: lessons from pure adrenomedullin knockout mouse
Antioxidant effect and organ protection 178
Fetus growth 176
Regulation of blood pressure and organ protection 177

Role of adrenomedullin in cardiovascular diseases
Acute myocardial infarction 139
Arteriosclerosis 141
Heart failure 135
Adrenomedullin actions in heart failure 137
Adrenomedullin production and its regulation 136
Plasma adrenomedullin levels in heart failure 135
Hypertension 131
Plasma adrenomedullin in essential hypertension 131
Plasma adrenomedullin in patients with pheochromocytoma and other forms of secondary hypertension 133
Possible role of AM in hypertension 134
Pulmonary hypertension 140
Renal disease 142
AM production and its actions in kidneys 142
Plasma AM in chronic glomerulonephritis 143
Plasma AM in chronic renal failure and end-stage renal disease 143
Sepsis 145

Therapeutic application of adrenomedullin
Acute administration of adrenomedullin 188
Heart failure 188
Hypertension and chronic renal failure 190

Pulmonary hypertension 191
Chronic administration of adrenomedullin 191
Heart failure 192
Hypertension 191
Myocardial infarction 194
Pulmonary hypertension 194

Therapeutic potentials of adrenomedullin for heart failure and pulmonary hypertension
Adrenomedullin therapy for heart failure 199
diuretic and natriuretic effect 203
inhibition of aldosterone secretion 203
inotropic effect 202
various cardioprotective effects 204
vasodilation 200
Adrenomedullin in pulmonary hypertension 204
intravenous administration 205
inhalation therapy 207
