

# Index

- AAS, general 193
- acetaminophen, results 54
- acetylcholine, in radioreceptor analyses 70
- acetyl salicylic acid 17, 54
- acid anhydrides, by AAS 200
- adhesives 90
- ADPC, by AAS 195
- adrenergic antagonists 82
- adrenergic receptors 71
- adriamycin, in histochemistry 18
- AFID, detector 164
- aflatoxins, in histochemistry 4, 18
- Alcolmeter S-D2 53
- aldehydes, by AAS 206, 207
- aliphatic amines, by AAS 204
- alkaloids, by AAS 214
- alkannin, by AAS 212
- alkylbenzene sulphonate, by AAS 211
- alprenolol, results 54
- aluminium
  - in renal dialysis 40
  - results 54
- amethocaine, structure 160
- amines, by AAS 204, 205
- amino acids
  - by AAS 207
  - capillary GC 224, 251
- p*-aminobenzoic acid, by AAS 208
- amiodarone, results 54
- amitriptyline
  - MS 117
  - radioreceptor analyses 71
  - results 54
- ammonia, by AAS 202
- amoxapine, results 54
- amphetamine
  - abuse 41
  - GC/EI/MS 128
  - method in urine 48
  - results 54
- amphetamine thiocyanate, GC/EI/MS 129
- amyl nitrite, abuse 90
- amylobarbitone
  - MS 122, 134
  - results 54
- anacrotine 238
- analytical techniques, in clinical toxicology 45
- androsterone, in urine 248
- anilides, in cooking oil 243
- anion surfactants, by AAS 194
- anthranilic acid, by AAS 206
- antiarrhythmics, in plasma/serum 48
- anticoagulant, abuse 41
- anticonvulsants, in plasma/serum 48
- antiserum, fluorochrome-labelled 23
- arsenic, results 54
- aspirin, results 54
- atenolol, results 54
- atropine, radioreceptor assays 83
- autofluorescence 16
- azapropazone, results 54
- band-pass filters (BP filters), 14, 15
- barbitone
  - MS 134
  - poisoning, treatment 39
  - results 54

- barbiturates
  - by AAS 208
  - by EMIT 53
  - MS 133
  - in plasma/urine 48
  - structure 135
- Beam test, for cannabis 266
- benzocaine, structure 160
- benzodiazepines
  - MS 133
  - NCI 121
  - in plasma/urine 48
  - radioreceptor analysis 73
  - receptors 71
- benzo( $\alpha$ )pyrene, in histochemistry 4, 7, 18
- benzoyllecgonine 176
  - by EMIT 181
- biacetyl, by AAS 211
- bile acids, in serum, capillary GC 245
- binding, of radioligands to receptors 68
- botulinum toxin 26
- brain
  - as receptor source 69
  - stem death 40
- Brodie's reagent 266
- bromazepam, results 54
- bromides
  - by AAS 197, 203
  - results 54
- bromisovalum, by AAS 204
- bupivacaine, structure 161
- buprenorphine, in receptor sites 80
- butabarbital, MS 134
- butane, abuse 90
- butethal, MS 134
- butobarbitone, results 55
- butriptyline, results 55
  
- CABA 173
- cadmium, results 55
- caffeine, results 55
- camphor, results 55
- cannabichromene *see* CBC
- cannabicyclol *see* CBCy
- CBC, structure 258
- CBCy, structure 258
- CBD
  - in breath 262
  - structure 257
- CBG, structure 258
- CBN
  - metabolites by TLC 274
  - structure 257
- cannabidiol *see* CBD
- cannabigerol *see* CBG
- cannabinol *see* CBN
- cannabinoids
  - analysis, chapter 257
  - colour tests 266
  - extraction 265
  - GC 279
  - gel filtration for purification 276
  - HPLC and RIA 84
  - in physiological media 278
  - separation by HPLC 277
  - in urine 48

  - metabolism 262
  - metabolites by TLC 274
  - paper chromatography 271
  - simple tests 261
  - thin-layer chromatography 271
  - use of column chromatography 275
- capillary column gas chromatography
  - chapter 9
- capillary columns
  - care of 234
  - efficiency 218
  - installation 223
  - preparation 232
- capillary GC, of cannabinoids 280
- carbamazepine, results 55
- Carbocaine, structure 161
- carbon disulphide, by AAS 202
- carbon monoxide
  - poisoning 40
  - results 55
- carboxyhaemoglobin, analysis in blood 48
- catechol, by AAS 209
- chemical interference, in AAS 193
- chemical ionisation 116
- chessboard, in histochemistry 30
- chinoxaline, by AAS 209
- chloral, results 61
- chloral hydrate
  - presumptive tests 46
  - results 55
- chloramphenicol, results 55
- chlorates, by AAS 200
- chlorazepate, radioreceptor analysis 75
- chlordiazepoxide, radioreceptor analysis 75
  - results 55
- chloride, by AAS 197
- chlormethiazole, results 55
- chlormezanone, results 55
- 2-chloro-4 aminobenzoic acid (CABA) 173
- 1-chlorophenazine, by AAS 197

- 2-chloroprocaine, structure 160  
 chloroquine, results 55  
 chlorpheniramine maleate, by AAS 210  
 chlorpromazine  
   in histochemistry 16–18  
   number of metabolites 77  
   radioreceptor analyses 71  
   results 55  
   RIA 145  
 chlortetracycline, in histochemistry 5, 18  
 cholinesterase, in serum 48  
 chronic poisoning, diagnosis 40  
 CI 115  
 Citanest, structure 160  
 cinchocaine, structure 160  
 clinical toxicology  
   analytical techniques 45

 clobazam, results 55  
 clomipramine, results 55  
 clonazepam, radioreceptor analysis 75  
   results 55  
 clonidine, results 55  
 clorazepate, results 55  
 cocaine  
   (and metabolites), HPLC 177  
   in urine 48  
   metabolism 176  
   results 56  
   structure 160  
 codeine  
   MS 109  
   results 56  
 condensers, in microscopy 11  
 colchicine, by AAS 213  
 colour contrast 16  
 column chromatography, for cannabis 275  
 controls, in histochemistry 31  
 cooking oils, contaminated 243  
 $\alpha$ -cortolone, in urine 248  
 curb 37  
 cyanides  
   by AAS 198  
   results 56  
 cyclobarbitol, MS 134  
 cyclobarbitone, results 56  
 cypermethrin 239
- data system, mass spectrometry 107  
 daunorubicin, in histochemistry 18  
 DCI 119  
 DDT, MS 126  
 Decicaine, structure 160  
 deltamethrin 239  
 derivatisation, in MS 127  
 derivative formation, in GC 235  
 derivatives in GC  
   local anaesthetics 170  
   preparation 235  
 desalkylflurazepam, results 56  
 desipramine  
   GC 151  
   MS 126  
   results 56, 57  
   RIA and isotopes 144  
 desorption chemical ionisation 119  
 detectors, in HPLC 148  
 dextropropoxyphene, results 56, 60  
 diagnosis, of poisoning 38  
 dialysis, in treatment of poisoning 39  
 diastereoisomers, of thioridazine and its sulphoxide 150  
 diazepam  
   in blood and urine 48  
   radioreceptor analyses 71–5  
   results 56  
 dibenzazepin, structure 139  
 dibucaine, structure 160  
 dichloromethane, abuse 90  
 dichroic mirrors 15  
 didesethyl fluorazepam, MS 108  
 difluisac, results 56  
 digoxin  
   in plasma/serum 48  
   results 56  
 dihydroalprenolol 83  
 dihydrocodeine, results 56  
 dinitro-ortho cresol, results 56  
 2, 4 dinitrotoluene, as a hepatocarcinogen 239  
 1,2 diols, by AAS 213  
 diphenhydramine, results 56  
 1,2 diols, by AAS 56  
 diprenorphine, radioreceptor analyses 81  
 diquat, results 56  
 direct immunofluorescence techniques 24  
 disopyramide, results 56  
 diuresis, in treatment of poisoning 39  
 dopaminic receptors 71  
 dothiepin, results 56  
 double-focusing mass spectrometer 105  
 doxycycline, in histochemistry 18  
 drugs, involved in fatal poisonings 17  
 Duquenois test, for cannabis 267  
 Duquenois–Levine test, for cannabis 261  
 Duranest, structure 161

- procainamide, results 60
- procaine
  - assay 170
  - by AAS 214
  - structure 160
- procyclidine, results 60
- promazine, GC-EI MS 132
- promethazine, structure 140
- propane, abuse 90
- propranolol
  - availability as a radioligand 71
  - results 60
- propoxyphene, results 60
- propylene oxide, exposure to 250
- proton magnetic resonance, of cannabinoid metabolites 297
- Protosol, for counting 72
- protriptyline, results 60
- pyrethroids, by capillary GC 239
- pyrrolizidine alkaloids, by capillary GC 237
- quadrupole mass analyser 104
- quality assurance, in clinical toxicology 51
- quinalbarbitone, results 60
- quinidine, results 60
- quinine
  - by AAS 214
  - results 60
- quinuclidinyl benzilate, binding 82
- radioligand 70
- radioreceptor analyses 67
  - for neuroleptics 145
  - protocol 73
  - preparation 68, 69
  - specificity 76
- radioreceptor assays, methods 68
- RB 200 25
