This list of works referred to in the text covers a few of the more important and accessible writings about teamwork but is by no means comprehensive, and particularly excludes the field of education. The reason for this is the need to keep the present work as a *practice* text, and I have avoided giving chapter and verse for every statement. However, through the works mentioned here, it is possible to obtain access to much of the literature, and I have marked useful introductory texts with an asterisk *, texts containing practical team-building exercises with a dagger †, and works containing surveys of useful background material or which are particularly influential with a double-dagger ‡.
