

## INDEX

Absolute temperature . . . . .	35	Bond . . . . .	19
Absorption spectrum . . . . .	169	— energy . . . . .	36, 41
AC source . . . . .	189	Boundary layer . . . . .	264
Acceleration . . . . .	45, 51	Brillouin effect . . . . .	219
Accelerator . . . . .	304	Brown effect . . . . .	224
—, cascade . . . . .	319	Budde effect . . . . .	223
—, Sames . . . . .	320	Caloric effect . . . . .	223
Acceptor . . . . .	264	Calorie . . . . .	35, 51
— atom . . . . .	237	Candoluminescence . . . . .	216
Actinic effect . . . . .	223	Cascade accelerator . . . . .	319
Active element . . . . .	354	Cathode glow . . . . .	217
Alpha-particles . . . . .	15	Centigrade, degree . . . . .	51
Alpha-radiation . . . . .	15, 24	Centre of symmetry . . . . .	25
Alternating current . . . . .	39, 146	Cerenkov effect . . . . .	218
Alternating current discharge . . . . .	119	Chadwick-Goldhaber effect . . . . .	225
Ampere . . . . .	38, 124	Characteristic spectral line . . . . .	169
Amplification . . . . .	330	Charge . . . . .	51, 146
Amplifier, transistor as . . . . .	333	—, electron as unit of . . . . .	11
Angular velocity . . . . .	45	Charging phenomena . . . . .	61, 63
Anode glow . . . . .	217	Chemical analysis . . . . .	98
Antenna effect . . . . .	79, 155	— bond . . . . .	24
Antenna radiation . . . . .	216	— effect . . . . .	139
Arc discharge . . . . .	114	— emission . . . . .	248
Atom . . . . .	6, 24, 164	— energy . . . . .	36, 51, 56
Atomic energy . . . . .	41, 51, 57	— reaction . . . . .	18
— number . . . . .	14	Chemiluminescence . . . . .	175, 216
— structure . . . . .	7, 10	Chemo-electric converter . . . . .	88
— weight . . . . .	12, 13	Chemo-electrification . . . . .	154
Axis of symmetry . . . . .	25	Chemo-voltaic transducer . . . . .	96
<b>Barkhausen-effect</b> . . . . .	161	Claydon effect . . . . .	223
— oscillator . . . . .	345	Cold-cathode tube . . . . .	249
Barnett-effect . . . . .	157	Cold emission . . . . .	249
Beam switching devices . . . . .	333	Colour centres . . . . .	225
Becquerel-effect . . . . .	155	Compton effect . . . . .	221
Benedick-effect . . . . .	161	Conductance . . . . .	146
Beta charging . . . . .	156	Conduction band . . . . .	104, 146
— radiation . . . . .	15, 24, 259	Conduction band potential . . . . .	231
Betatron . . . . .	294, 321	Conduction current . . . . .	147
Biochemical effect . . . . .	161	Conductivity . . . . .	103, 110, 112, 147
Bio-electrification . . . . .	154	Conductor . . . . .	147
Bioluminescence . . . . .	175, 216	Contact electrification . . . . .	67, 153
Biot-Savart effect . . . . .	161	— force . . . . .	48, 51
Stefan Boltzman law . . . . .	220	— potential . . . . .	234, 235, 264
Bombardment with fast ions . . . . .	269	Control . . . . .	304

- Convection current . . . . . 147  
 Corona discharge . . . . . 115  
 Cosmic radiation . . . . . 212  
 Cotton-Mouton effect . . . . . 221  
 Coloumb . . . . . 38  
   — force . . . . . 41, 49, 51  
 Coulometric analysis . . . . . 141  
 Counter-field emission . . . . . 269  
 Cryoluminescence . . . . . 215  
 Cryotron . . . . . 133  
 Crystal class . . . . . 25  
   — conductivity . . . . . 159  
   — diode . . . . . 238  
   — lattice . . . . . 20, 25  
   — luminescence . . . . . 215  
   — system . . . . . 25  
 Crystalline structure . . . . . 20  
 Current . . . . . 147  
   — circuit . . . . . 39, 51  
   — density . . . . . 147  
  
 Dark discharge . . . . . 115  
 Debye effect . . . . . 158  
 De Broglie wave . . . . . 215  
 Decatron . . . . . 257  
 Deflection . . . . . 219, 279  
 Degree centigrade . . . . . 51  
   — Kelvin . . . . . 52  
 Dielectric constant . . . . . 49, 64, 147  
   — heating . . . . . 161  
   — induction . . . . . 155  
   — polarization . . . . . 64, 73, 74  
 Diffraction . . . . . 304  
 Direct chemo-electric effect . . . . . 73  
 Direct current . . . . . 148  
 Direct current discharge . . . . . 119  
 Direction of current . . . . . 148  
 Discharge form . . . . . 117  
   — phenomena . . . . . 100  
 Disintegration . . . . . 91  
 Dislocation . . . . . 103  
 Donor . . . . . 264  
 Doppler-Fizeau effect . . . . . 219  
 Dorn effect . . . . . 153  
 Drift velocity . . . . . 101, 148  
 Dynatron circuit . . . . . 346  
  
 Edison effect . . . . . 160, 241  
 Electric current . . . . . 38  
   — dust filter . . . . . 76, 77  
   — field . . . . . 37, 52, 305  
   — lenses . . . . . 285  
   — light source . . . . . 191  
   — Electrical energy . . . . . 37, 52, 56  
     — field energy . . . . . 37  
     — force . . . . . 48  
   Electricity . . . . . 10  
   Electrification . . . . . 64, 65, 148  
   Electroluminescence . . . . . 175, 217  
   Electroluminescent panel . . . . . 202  
   Electrolysis . . . . . 6  
   Electrolyte . . . . . 111  
   Electrolytic conduction . . . . . 111  
   Electrolytic conductivity . . . . . 157  
   Electromagnetic field . . . . . 121  
     — induction . . . . . 78, 155  
     — radiation . . . . . 167  
   Electron . . . . . 9, 10, 24  
     — acceleration . . . . . 293  
     — beam devices . . . . . 312  
     — cloud . . . . . 19  
     — configuration . . . . . 16, 25  
     — density . . . . . 354  
     — diffraction camera . . . . . 301  
     — microscope . . . . . 297  
     — optics . . . . . 279, 282, 304  
     — pair . . . . . 30, 225  
     — source . . . . . 260  
     — telescope . . . . . 296  
     — as unit of charge . . . . . 11  
     — volt (eV) . . . . . 36, 52  
   Electronic charging . . . . . 156  
     — transducer . . . . . 93  
   Electrostatic induction . . . . . 75, 155  
     — machines . . . . . 82  
     — memories . . . . . 349  
   Electrostrictive effect . . . . . 160  
   Electrothermal effect . . . . . 160  
   Element . . . . . 6, 10, 24  
   Elementary-particle source . . . . . 259  
   Elster and Geitel effect . . . . . 159, 224  
   Emission of exo-electrons . . . . . 267  
     — phenomena . . . . . 62  
     — spectrum . . . . . 168  
   Energy . . . . . 29, 30, 32, 44, 52  
     — band . . . . . 103  
     — converter . . . . . 81  
     — equivalent . . . . . 31  
     — gap . . . . . 148  
     — level . . . . . 164, 212  
     — and matter . . . . . 30  
     — particle . . . . . 31  
   Equation, Larmor's . . . . . 215  
   Equipotential surface . . . . . 304  
   Esclangon effect . . . . . 219  
   v. Ettinghausen effect . . . . . 160

- Excitation energy . . . . . 165, 212  
 — phenomena . . . . . 61  
 Excited state . . . . . 165, 212  
 Exo-electron . . . . . 240  
 Extrinsic semiconductor . . . . . 151
- Faraday cylinder . . . . . 322  
 Faraday effect . . . . . 161, 221  
 Fermi level . . . . . 234, 264  
 Ferrites . . . . . 132  
 Ferroelectric substance . . . . . 131  
 Ferromagnetic substance . . . . . 131  
 Field emission . . . . . 249  
 — -emission microscope . . . . . 250, 300  
 — strength . . . . . 149  
 Flame resistance . . . . . 221  
 Fluorescent lamp . . . . . 200  
 Focus . . . . . 305  
 Force . . . . . 44, 52  
 — of gravity . . . . . 52  
 Frank-Condon effect . . . . . 219  
 Fraunhofer diffraction . . . . . 219  
 Frequency . . . . . 39, 53  
 Fresnel double refraction . . . . . 219  
 Fuel cell . . . . . 89
- Galvanic cell . . . . . 72, 88  
 Galvano-electric effect . . . . . 71  
 Galvano-electrification . . . . . 154  
 Galvanoluminescence . . . . . 176, 217  
 Galvano-magnetic effect . . . . . 78, 155  
 Gamma-radiation . . . . . 15, 25, 187, 212  
 Gamma radiator . . . . . 192  
 Gamma-radiography . . . . . 211  
 Gas-amplification factor . . . . . 264  
 Gaseous state . . . . . 21  
 Gauss effect . . . . . 158  
 Geiger effect . . . . . 218  
 Geiger-Müller tube . . . . . 258  
 Geiger point counter . . . . . 322  
 Generation . . . . . 354  
 Glow discharge . . . . . 114  
 Gravitation . . . . . 53  
 — effect . . . . . 153  
 Gravitational constant . . . . . 49  
 — energy . . . . . 33  
 — force . . . . . 48  
 Graviton . . . . . 34, 53  
 Grothus-Draper law . . . . . 223  
 Ground state . . . . . 165, 212  
 Gudden-Pohl effect . . . . . 217
- Haber effect . . . . . 249, 267
- Half-life . . . . . 265  
 Hall effect . . . . . 133, 155, 159  
 Hallwachs effect . . . . . 79  
 Hard radiation . . . . . 212  
 Heat-electric converter . . . . . 86  
 Helion . . . . . 15  
 Hertz-Wiedemann-Ebert effect . . . . . 159  
 Hole . . . . . 80, 108  
 Homogeneous electric field . . . . . 305  
 Hot-wire meter . . . . . 136
- Ignitron . . . . . 250, 354  
 Impulse mass . . . . . 42  
 Impurities . . . . . 102  
 Incandescence . . . . . 215  
 Increase of mass . . . . . 42  
 Induction . . . . . 64  
 Inductive heating . . . . . 160  
 Inert-gas configuration . . . . . 18, 25  
 Inertia . . . . . 33  
 — effect . . . . . 66, 153  
 Infrared . . . . . 183, 213  
 — radiator . . . . . 189  
 Initial anode current . . . . . 246, 265  
 Insulator . . . . . 18, 105, 149  
 Intensity . . . . . 53  
 — control . . . . . 305  
 Interference . . . . . 224  
 Interstitial atom . . . . . 102  
 Intrinsic semiconductor . . . . . 151  
 Ion bombardment . . . . . 258, 268  
 — source . . . . . 261  
 Ionic bond . . . . . 19, 25  
 — charging . . . . . 156  
 — lattice . . . . . 19  
 Ionization . . . . . 265  
 — phenomena . . . . . 62  
 — potential . . . . . 228, 230, 265  
 Ionized state . . . . . 169, 213  
 Isotope . . . . . 14
- Johnson Rahbek effect . . . . . 160  
 Joshi effect . . . . . 224  
 Joule . . . . . 53  
 Junction . . . . . 265  
 — diode . . . . . 238
- Kelvin, degree . . . . . 52  
 Kenotron . . . . . 354  
 Kerr effect . . . . . 220  
 Kinergetic device . . . . . 354  
 Kinetic energy . . . . . 32, 53  
 Klystron oscillator . . . . . 346

- Kohrausch's law . . . . . 158  
 Konotron . . . . . 309  
 Kramer effect . . . . . 240  
  
 Larmor's equation . . . . . 215  
 Laser . . . . . 194, 195  
 Lattice defect . . . . . 102  
 Laws of photo-electric emission . . . . . 253  
 Lead accumulator . . . . . 140  
 Lenard effect . . . . . 153  
 Light beams and electron beams . . . . . 278  
 Light optics . . . . . 282  
 Line spectrum . . . . . 168  
 Linear velocity . . . . . 45  
 Lippmann effect . . . . . 160  
 Liquid state . . . . . 20  
 Luminophores . . . . . 206  
  
 Macrocosm . . . . . 26  
 Magnetic anisotropy . . . . . 159  
 — effect . . . . . 123  
 — field . . . . . 38, 53  
 — field emission . . . . . 268  
 — lenses . . . . . 286  
 — moment . . . . . 25  
 — core memory . . . . . 352  
 — electric transducer . . . . . 96  
 Magnetohydrodynamic converter . . . . . 88  
 Magneto-inductive machines . . . . . 83  
 Magnetoresistive effect . . . . . 107  
 Magnetostriction escillator . . . . . 345  
 Magnetostrictive element . . . . . 86  
 Magnetron . . . . . 342, 344, 354  
 Maser . . . . . 194  
 Mass . . . . . 33, 53

 Switching function . . . . . 327  
  
 Tellurium-vapour lamp . . . . . 204  
 Temperature . . . . . 54  
 — coefficient . . . . . 151  
 — dependence . . . . . 109  
 — voltage . . . . . 247, 266  
 Terminal velocity . . . . . 266  
 Tetrode principle . . . . . 293  
 Thermal effect . . . . . 135  
 — energy . . . . . 35, 54, 56  
 — potential . . . . . 35  
 — radiator . . . . . 189

- Thermionic emission . . . . . 240  
 Thermistor . . . . . 110, 149, 238  
 Thermocouple . . . . . 70, 139  
 Thermo-dielectric effect . . . . . 70, 154  
 Thermo-elastic effect . . . . . 69, 153, 154  
 Thermo-electric effect . . . . . 69, 154  
 Thermo-electric element . . . . . 86  
 Thermo-electric voltage series . . . . . 70  
 Thermo emission . . . . . 267  
 Thermoluminescence . . . . . 174, 215  
 Thomson effect . . . . . 159  
 Thyatron . . . . . 257, 355  
 Transducer . . . . . 151  
 Transformer . . . . . 127  
 Transistor as amplifier . . . . . 333  
 Transit time . . . . . 244, 266  
 Transit-time effect . . . . . 355  
 Transition temperature . . . . . 109  
 Transmutation . . . . . 16, 91  
 Travelling-wave tubes . . . . . 292, 305  
 Tribo-electrification . . . . . 153  
 Triboluminescence . . . . . 174, 215  
 Tunnel diode . . . . . 343, 355  
 — effect . . . . . 249, 266, 271  
 Tyndall effect . . . . . 220
- Ultrasonic vibration . . . . . 86  
 Ultraviolet . . . . . 186, 213  
 — radiator . . . . . 191
- Vacuum . . . . . 116  
 Valency . . . . . 27  
 — band . . . . . 104, 151  
 — electron . . . . . 16, 27  
 — force . . . . . 49
- Varistor . . . . . 152  
 VDC-capacitor . . . . . 75, 152  
 VDR resistor . . . . . 152  
 Velocity . . . . . 45  
 — control . . . . . 291  
 — controlled tubes . . . . . 292  
 — distribution of the electron . . . . . 246  
 — of light . . . . . 54  
 — modulated devices . . . . . 315  
 — modulated tubes . . . . . 305  
 — sorting . . . . . 355  
 Villard effect . . . . . 157, 223  
 Visible radiation . . . . . 184  
 — spectrum . . . . . 213  
 Voigt effect . . . . . 221  
 Voltage dependence . . . . . 110  
 — source . . . . . 73, 82, 152
- Wertheim effect . . . . . 155  
 Wiedemann-Franz effect . . . . . 157  
 Wien effect . . . . . 158  
 Wood & Ellet effect . . . . . 221  
 Work . . . . . 30, 46, 55  
 — function . . . . . 228, 234, 266  
 Workman-Reynolds effect . . . . . 154
- Xenon lamp . . . . . 205  
 X-radiation . . . . . 186, 192, 218  
 X-ray diffraction . . . . . 207, 214  
 — spectrography . . . . . 207  
 — spectrum . . . . . 214  
 — tubes . . . . . 294
- Zeeman effect . . . . . 221  
 Zener effect . . . . . 158
