

Index

■ A

- Active Directory Federation services (ADFS)
 - compliance, 591–592
 - Exchange Server 2010 implementation
 - account configuration, 601
 - adding Exchange Management Forest, 593
 - adding hybrid domain for Federation, 602
 - assigning Exchange certificates, 595
 - certificate verification, 597
 - creating Federation interface, 607
 - creating verification text records, 603
 - default certificate over right, 596
 - defining on-site SMTP gateway for hub transport, 605
 - entering mailbox server and client access server, 604
 - running hybrid configuration tool, 600
 - sample output with error, 598
 - selecting EOP mail flow, 606
 - setting external DNS records, 599
 - setting web services external URL on CAS server, 598
 - validating hybrid configuration, 609
 - Exchange server setup, 587–589
 - Federation-Exchange 2010 integration
 - installation, 587
 - pre-Federation checklist, 586
 - setup, 586
 - validation, 587
 - installation
 - adding UPN Suffix, 567
 - overview, 567
 - setting up user UPN, 568–569, 572, 575, 577
 - single login environment, 565
 - Single Sign On example
 - for Office 365, 566
 - verifying Federation configuration, 578
 - mail flow, 589
 - post Federation testing, 609
 - proxy servers
 - adding auto update token certificate, 583
 - configuration, 580
 - installing ADFS 2.0, 580
 - testing Single Sign On, 581
 - turning on Single Sign On, 581
 - troubleshooting
 - database error, 623–625
 - hybrid Federation certificate error, 626–627
 - remote connectivity analyzer, 623
 - SSO user experience, 627–628
 - types, 565
- Active Directory Federation Services (AD FS) Single Sign-On method, 93
- Active Directory integration
 - Active Directory readiness check
 - installing software updates, 613
 - Office 365 Admin account, 611–613
 - research and repair issues, 616–618
 - running the tests, 614
 - ADFS installation (*see* Active Directory Federation services (ADFS))
 - cleaning up AD, 552
 - creating Admin accounts, 552
 - Directory Synchronization installation (*see* Directory Synchronization (DirSync))
 - Federate AD to Office 365, 548
 - Federate Exchange to Office 365, 548
 - installing Directory Synchronization, 562
 - migration approach, 548
 - .NET framework 3.5 installation, 551
 - .NET framework 4.0 installation, 551
 - no integration, 546
 - optional Extended AD, 553
 - options, 545
 - steps for partial implementation, 548–549

- Active Directory integration (*cont.*)
 - synchronization client installation, 562
 - Sync local AD to Office 365 (*see* Directory Synchronization (DirSync))
 - troubleshooting ADFS (*see* Active Directory Federation services (ADFS))
 - troubleshooting DirSync (*see* Directory Synchronization (DirSync))
 - verifying AD, 564
 - verifying Exchange Server status, 549
- ADSIEDIT, 620
- Advance query strings (AQS), 477
- Agent policies configuration
 - antivirus settings, 334–335
 - creation, 333
 - custom policy, 332
 - data transfer, 337
 - icon selection, 332–333
 - policy deployment, 338
 - quarantine settings, 336
 - scanning behavior, 335–336
 - setting up, 334
 - update settings, 336–337
- Authenticated Office 365 user
 - configuring default SMTP server, 530
 - creating Office account, 529
 - inbound connector, 532
 - optional SPF record, 532
 - outbound connection, 531
 - sending permission, 532
 - SMTP smart host, 530
 - trusted user account, 531
- AutoDiscover process, 107
- Auto updates configuration
 - adding automatic updates, 329
 - deployment option, 332
 - new update rule creation, 329
 - rule naming, 330
 - Select All Categories, 330
 - Select All Classifications, 331

■ B

- Branch office design, 21
- Business Connectivity Services (BCS), 263
- Business efficiency, 21
- Business Productivity Online Services (BPOS), 2
- Bypass spam filter
 - adding IP address, 519
 - adding rule, 519
 - Custom Mail Rules, 517
 - external users, 539
 - option, 518
 - SMTP server, 527

■ C

- Canonical name (CNAME) records, 133
- Capital expenditure (CAPEX), 7
- Core business software, 8
- Core services, 21
- Core Services Consolidation, 20
- Cutover mail flow, 97

■ D

- Data loss prevention (DLP), 438
- Deployment process
 - configuring external devices, 114
 - description, 87
 - DNS (*see* Domain Name Service (DNS))
 - e-mail migration
 - DirSync, 113
 - do-nothing case, 113
 - PST export/import, 113
