

Index

1,3-Butadiene, pulmonary toxin, 52 146
2,4-Decadienal, pulmonary toxin, 52

A

Acrolein, pulmonary toxin, 50
ADHD (attention deficit hyperactivity disorder), pollutants, 2
Aerobic degradation pathway, polychlorinated biphenyls (PCBs) (diag.), 143
Aged residue effects, PCBs, 139
AIDS patients, *Pseudomonas aeruginosa*, 85
Allergens, in house dust, 18
Anaerobic degradation pathway (diag.), 143
Anesthetics, pulmonary toxins, 53
Antioxidants, benefit in pulmonary toxicity, 59
Antioxidants, pulmonary toxicity protection, 41 ff.
Anti-pollutant applications, non-thermal plasmas (NTPs) chemistry, 120
ARDS (adult respiratory distress syndrome), reactive oxygen species (ROS), 43
Asbestos, pulmonary toxin, 55
Assessment of risk, *Pseudomonas aeruginosa*, 72 ff.
Asthma reduction, home visits, 25
Asthma, allergens & microbes, 18
Asthma, induced by oxidative stress, 59

B

Babies and ADHD, pollutants, 2
Babies, house dust exposure, 1
Bacteria, free-living pseudomonads, 72
Bacteria, in house dust, 18
Bacterial infections, nosocomial pneumonia (table), 75
Benzene, pulmonary toxin, 49

Bioaccumulation factors, PCB effects (table), 151

Bioaccumulation, PCBs, 147, 148
Bio-active agents, electron transfer functionalities, 42
Bioconcentration, PCBs, 147, 148
Biodegradation, PCBs, 142
Biofilms, *Pseudomonas aeruginosa*, 92
Biomagnification, PCBs, 147, 149
Bleomycin, pulmonary toxin, 53
Burkholderia, human pathogenicity, 74
Burn-wound infections, *Pseudomonas aeruginosa*, 80

C

Cancer, PAHs (polyaromatic hydrocarbons) and house dust, 11
Carbon disulfide, pulmonary toxin, 51
Carbon monoxide, pulmonary toxin, 47
Carbon tetrachloride, pulmonary toxin, 50
Carpet contamination, lead, 4
Carpet contamination, PAHs & PCBs, 8
Carpet contamination, pesticides, 6
Carpet contamination, vacuum cleaning, 21
Carpet vs. uncovered floors, contamination and cleaning, 20
Cellular injury, ROS, 43
Chemical and biological warfare agents (CBW), disposal by NTPs chemistry, 128
Chemical contaminants, house dust (table), 9
Chemical contaminants, infant exposure, 2
Chemical mechanisms, non-thermal plasmas chemistry, 119
Children home exposure, pesticide volatility, 7
Children, blood lead levels, 6
Children, *Pseudomonas aeruginosa* infection, 83

Children's environmental exposure, hygiene hypothesis, 19
 Chlordane, non-Hodgkins lymphoma, 8
 Chlorine, pulmonary toxin, 48
 Chloroform, pulmonary toxin, 50
 Chronic infant health, pollutants, 2
 Classification of pseudomonads, genera (table), 73
 Classroom pollutants, dust, 5
 Cleaning carpets vs. floors, contamination, 20
 Cleaning products, safety, 23
 Coal burning, PAHs in house dust, 13
 Cocaine, pulmonary toxin, 56
 Contaminant reduction, home visits, 25
 Contaminants, in house dust, 3
 Contamination by metals, classroom dust (table), 5
 Contamination prevention, hand washing, 23
 Contamination, vacuum cleaning, 20
 COPD (chronic obstructive pulmonary disease), relative to oxidative stress, 59
 Cystic fibrosis, *Pseudomonas aeruginosa*, 84

D

Diacetyl, pulmonary toxin, 52
 Disease in infants, pollutants, 2
 Disease transmission, *Pseudomonas aeruginosa*, 97
 Disease-free water, *Pseudomonas aeruginosa* (table), 91
 Disinfection, *Pseudomonas aeruginosa*, 96
 Distribution, PCBs, 137 ff.
 Drinking water contamination, *Pseudomonas aeruginosa*, 87
 Drinking water risks, *Pseudomonas aeruginosa* (table), 104
 Dust mites, in house dust, 18

E

Ear infections, *Pseudomonas aeruginosa*, 81
 EDCs (endocrine disrupting chemicals), house dust, 14, 17
 Electron transfer groups, reduction potentials, 42
 Electron transfer groups, relation to bio-active agents, 42
 Electron transfer, pulmonary toxicity mechanism, 43
 Electron transfer, pulmonary toxicity, 41 ff.
 Electron transfer, redox cycling & oxidative stress, 42
 Endocarditis, *Pseudomonas aeruginosa*, 77

Environmental contamination, pulmonary toxicity, 41 ff.
 Environmental distribution, PCBs, 139
 Environmental factors, PCB degradation effects (diag.), 146
 Environmental fate of PCBs, study methods, 141
 Environmental fate processes, PCBs (diag.), 142
 Environmental fate, PCBs, 137 ff.
 Environmental pollution, NTPs chemistry, 117 ff.
 Epichlorohydrin, pulmonary toxin, 50
 Ethanol, pulmonary toxin, 51
 Ethylene oxide, pulmonary toxin, 46
 Exposure reduction, home visits & surveys, 24
 Exposure to house dust, infants, 1 ff.
 Exposure to house dust, research needed, 29
 Exposure, to banned pesticides, 8
 Eye infections, *Pseudomonas aeruginosa*, 82

F

Farm worker exposure, pesticides, 7
 Formaldehyde, pulmonary toxin, 47

G

Gaseous pollutant removal, NTPs chemistry, 121
 Gastrointestinal infections, *Pseudomonas aeruginosa*, 79
 Global distribution, PCBs, 137 ff., 139
 Granulocytopenic patients, *Pseudomonas aeruginosa*, 86

H

Hand washing, contamination and disease prevention, 23
 Health cost reduction, home visits, 25
 Healthy-human infections, *Pseudomonas aeruginosa* (table), 75
 Home cleaning, removing pollutants, 19
 Home pollutant problems, discussion, 28
 Home surveys, toxicant exposure reduction, 24
 Home visits, toxicant exposure reduction, 24
 Hot water pollutant extraction, carpet vacuuming, 22
 House dust and allergens, infants and children, 2
 House dust and exposure, research needed, 29
 House dust contaminant, phthalates, 13

- House dust contaminants, pesticides & metals, 3
 House dust contamination, various chemicals (table), 9, 15
 House dust pollutants, exposure, 2
 House dust residues, PAHs (table), 12
 House dust, allergens & dust mites, 18
 House dust, Bacteria, viruses, mold, 18
 House dust, EDCs, 14, 17
 House dust, home cleaning, 19
 House dust, monitoring & sampling methods, 4
 House dust, monitoring and exposure, 1 ff.
 House dust, monitoring pollutants, 3
 House dust, mutagens, 3
 House dust, pesticides, 6
 House dust, three-spot vacuum test, 21
 House dust, toxicants, 6
 Human health effects, *Pseudomonas aeruginosa* (table), 75
 Human pathogenicity, *Pseudomonas* spp., 74
 HVS3 (high-volume low-surface), pollutant sampling, 4
 Hydrogen cyanide, pulmonary toxin, 47
 Hydrogen sulfide, pulmonary toxin, 48
 Hygiene hypothesis, children's environmental exposure, 19
 Hypochlorous acid, pulmonary toxin, 48
- I**
 Illness in spas, *Pseudomonas aeruginosa* (table), 98
 Immunocompromised humans, *Pseudomonas aeruginosa* (table), 76
 Indoor air pollution, house dust, 3
 Indoor air purification, NTPs chemistry, 124
 Infant exposure, house dust, 1 ff.
 Infant hand washing, preventing contamination, 23
 Infants, relative toxicant exposure, 2
 Infectious diseases, hand washing, 23
 Infective dose, *Pseudomonas aeruginosa*, 102
 Insecticides, pulmonary toxins, 56
- L**
 Lead in dust, child lead blood levels, 6
 Lead measurement, carpets, 4
 Leukemia, organochlorines in house dust, 11
- M**
 Medical importance, *Pseudomonas* spp., 73
 Meningitis, *Pseudomonas aeruginosa*, 83
- Metal contamination, classroom dust (table), 5
 Metal contamination, dust, 6
 Metals and metal compounds, pulmonary toxins, 54
 Metals, house-dust monitoring, 5
 Microbial reductive dechlorination, PCBs (table), 145
 Mold, in house dust, 18
 Monitoring methods, house dust, 4
 Monitoring pollutants, dust, 3
 Mutagens, house dust, 3
- N**
 Naphthalene, pulmonary toxin, 57
 n-Hexane, pulmonary toxin, 51
 Nitroaromatic compounds, pulmonary toxins, 58
 Non-Hodgkins lymphoma, toxicants in carpet, 8
 Nosocomial infection, *Pseudomonas aeruginosa*, 74, 76
 Nosocomial pneumonia, bacterial causes (table), 75
 NTPs chemistry generation, pollution abatement, 119
 NTPs chemistry mechanism, pollution abatement, 119
 NTPs chemistry, anti-pollutant applications, 121
 NTPs chemistry, bond energies (table), 120
 NTPs chemistry, disposal of CBW agents, 128
 NTPs chemistry, indoor air purification, 124
 NTPs chemistry, origin & definition, 118
 NTPs chemistry, removing gaseous pollutants, 121
 NTPs chemistry, removing odorous pollutants, 122
 NTPs chemistry, removing VOC pollutants, 123
 NTPs chemistry, solid waste disposal, 129
 NTPs chemistry, use in sterilization, 127
 NTPs chemistry, wastewater treatment, 125
 NTPs, pollution abatement, 117 ff.
- O**
 Organic matter, PCB adsorption, 147
 Organochlorine contaminants, house dust (table), 9, 15
 Organochlorines in house dust, leukemia, 11
 Osteomyelitis, *Pseudomonas aeruginosa*, 77
 Oxidative stress, asthma & illness, 59
 Oxidative stress, cause for COPD

- Oxidative stress, pulmonary toxicity, 42
 Ozone, pulmonary toxin, 45
- P**
- PAH (polyaromatic hydrocarbon)
 concentrations, house dust
 (table), 12, 15
 PAHs, house dust, 3
 PAHs and house dust, cancer, 11
 PAHs in house dust, coal burning, 13
 PAHs, carpet contamination, 8
 PAHs, pulmonary toxins, 57
 Paint thinner, pulmonary toxin, 51
 Paraquat, pulmonary toxin, 56
 Particulates, pulmonary toxins, 54
 Pathogens, pseudomonads, 72
 PCB (polychlorinated biphenyl), volatilization, environmental entry, 140
 PCBs carpet contamination, 8
 PCBs, adsorption to organic matter, 147
 PCBs, aerobic degradation pathway (diag.), 143
 PCBs, anaerobic degradation pathway (diag.), 143
 PCBs, bioaccumulation, bioconcentration, biomagnification, 147
 PCBs, bioaccumulation-affecting factors (table), 151
 PCBs, biodegradation and transformation, 142
 PCBs, determining environmental fate, 141
 PCBs, distribution & environmental fate, 137 ff.
 PCBs, effects of aged residues, 139
 PCBs, environmental fate processes (diag.), 142
 PCBs, factors affecting degradation (diag.),
 PCBs, global distribution, 139
 PCBs, microbial reductive dechlorination (table), 145
 PCBs, occurrence and production, 138
 PCBs, physicochemical properties (diag.), 139
 PCBs, sources of entry (diag.), 140
 PCBs, uses, 138
 PCBs, volatilization, 146
 Persulfate & perchlorate, pulmonary toxins, 55
 Pesticide carpet contamination, track in, 7
 Pesticide exposure, banned pest products, 8
 Pesticide lawn use, home contamination, 7
 Pesticide volatility, ingestion vs. inhalation, 7
 Pesticides, farm-worker exposure, 7
 Pesticides, in house dust, 6
 Phenols, pulmonary toxins, 52
 Phosgene, pulmonary toxin, 47
 Phthalates, house dust contaminant, 13
 Phthalates, pulmonary toxins, 57
 Physicochemical properties, PCBs (diag.), 139
 PNDEs (polybrominated diphenyl ethers),
 house dust contamination (table), 15
 Pneumonia, *Pseudomonas aeruginosa*, 78
 Pollutant abatement, NTPs chemistry
 mechanism, 119
 Pollutant extraction, by carpet vacuuming, 22
 Pollutant problems in homes, discussion, 28
 Pollutants abatement, NTPs chemistry, 117 ff.
 Pollutants and disease, infants, 2
 Pollutants in house dust, exposure, 2
 Pollutants in house dust, infants, 1 ff.
 Pollutants, home cleaning, 19
 Pollution abatement tool, NTPs chemistry, 118
 Potable water, *Pseudomonas aeruginosa*
 contamination (table), 88
 Pseudomonad classification, genera (table), 73
 Pseudomonads, bacteria group, 72
Pseudomonas aeruginosa contamination,
 water, 87-91
Pseudomonas aeruginosa illness, pools
 & tap water, 99
Pseudomonas aeruginosa illness, spas
 & tubs (table), 98
Pseudomonas aeruginosa, AIDS patients, 85
Pseudomonas aeruginosa, aqueous media
 survival (table), 94
Pseudomonas aeruginosa, biofilms, 92
Pseudomonas aeruginosa, cancer
 & granulocytopenic patients, 86
Pseudomonas aeruginosa, disinfection, 96
Pseudomonas aeruginosa, drinking water risks
 (table), 104
Pseudomonas aeruginosa, ear & eye
 infections, 81
Pseudomonas aeruginosa, healthy-human
 infections (table), 75
Pseudomonas aeruginosa, human health
 effects, 75
Pseudomonas aeruginosa, immunocompromised
 humans (table), 76
Pseudomonas aeruginosa, in drinking
 water, 87
Pseudomonas aeruginosa, infection of
 children, 83
Pseudomonas aeruginosa, infective
 dose, 102
Pseudomonas aeruginosa, lung infection
 & cystic fibrosis, 84
Pseudomonas aeruginosa, meningitis, 83
Pseudomonas aeruginosa, nosocomial
 disease, 76
Pseudomonas aeruginosa, nosocomial
 infection, 74

- Pseudomonas aeruginosa*, occurrence & survival, 86
- Pseudomonas aeruginosa*, pneumonia, 78
- Pseudomonas aeruginosa*, pool contamination (table), 89
- Pseudomonas aeruginosa*, risk assessment, 101
- Pseudomonas aeruginosa*, risk in water, 72 ff.
- Pseudomonas aeruginosa*, septicemia, endocarditis & osteomyelitis, 77
- Pseudomonas aeruginosa*, skin & burn-wound infections, 80
- Pseudomonas aeruginosa*, sources, 93
- Pseudomonas aeruginosa*, survival, 94
- Pseudomonas aeruginosa*, transmission mode, 84
- Pseudomonas aeruginosa*, UV disinfection (table), 96
- Pseudomonas aeruginosa*, water quality standards, 101
- Pseudomonas aeruginosa*, water transmission, 97
- Pseudomonas aeruginosa*-induced disease, recreational water (table), 90
- Pseudomonas* bacteremia, septicemia, 77
- Pseudomonas* spp., characteristics, 72
- Pseudomonas* spp., human pathogenicity, 74
- Pseudomonas* spp., medical importance, 73
- Pulmonary injury, ROS, 43
- Pulmonary toxin, ozone, 45
- Pulmonary toxins, ethylene oxide, sarin & sulfur mustard, 46
- Pulmonary toxins, formaldehyde, phosgene, carbon monoxide & hydrogen cyanide, 47
- Pulmonary toxins, hydrogen sulfide, sulfur dioxide, chlorine & hypochlorous acid, 48
- Pulmonary toxins, metals & particulates, 54
- Pulmonary toxins, structures (diag.), 44
- Pulmonary toxicity mechanism, electron transfer, 43
- Pulmonary toxicity, antioxidant protection, 41 ff.
- Pulmonary toxicity, electron transfer, 41 ff.
- Pulmonary toxicity, ROS and oxidative stress, 42
- Pulmonary toxins, acrolein, epichlorohydrin, chloroform & carbon tetrachloride, 50
- Pulmonary toxins, anesthetics & therapeutic agents, 53
- Pulmonary toxins, asbestos, silica, persulfate & perchlorate, 55
- Pulmonary toxins, benzene, toluene, styrene, trichloroethylene, 49
- Pulmonary toxins, diacetyl, phenols, 1,3-butadiene, 2,4-decadienal, 52
- Pulmonary toxins, ethanol, n-hexane, paint thinner, carbon disulfide, 51
- Pulmonary toxins, naphthalene, PAHs, phthalates & quinones, 57
- Pulmonary toxins, nitroaromatic compounds & radiation, 58
- Pulmonary toxins, pesticides, tobacco, cocaine, 56
- ## Q
- Quinones, pulmonary toxins, 57
- ## R
- Radiation, pulmonary toxin, 58
- Radicals and pulmonary toxicity, possible mechanism, 41 ff.
- Reactive nitrogen species, similarity to ROS, 45
- Reactive oxygen species (ROS), cellular injury & ARDS, 43
- ROS, pulmonary toxicity, 42
- Recreational water, *Pseudomonas aeruginosa* contamination & disease, 88, 90
- Redox cycling and electron transfer, toxicity mechanism, 43
- Reducing infant exposure, house dust, 1 ff.
- Risk assessment, *Pseudomonas aeruginosa*, 101
- Risk assessment, *Pseudomonas aeruginosa*, 72 ff.
- ## S
- Safer cleaning products, home cleaning, 23
- Samplers, high volume for pesticides, 4
- Sampling and monitoring, house dust, 4
- Septicemia, *Pseudomonas bacteremia*, 77
- Silica, pulmonary toxin, 55
- Skin infections, *Pseudomonas aeruginosa*, 80
- Soil degradation, PCBs (diag.), 146
- Solid waste disposal, NTPs chemistry, 129
- Sources of entry, PCBs (diag.), 140
- Sterilization, using NTPs chemistry, 127
- Styrene, pulmonary toxin, 49
- Sulfur dioxide, pulmonary toxin, 48
- Surface water, *Pseudomonas aeruginosa* contamination, 89
- ## T
- Transformation, PCBs, 142
- Therapeutic agents, pulmonary toxins, 53
- Three-spot test, vacuuming dust contaminants, 21
- Tobacco, pulmonary toxin, 56
- Toluene, pulmonary toxin, 49

Toxicant exposure in infants, relative intensity, 2
Toxicants in carpet, non-Hodgkins lymphoma, 8
Toxicants, metals in dust, 6
Toxicity mechanism, electron transfer-reactive oxygen species-oxidative stress, 42
Trichloroethylene, pulmonary toxin, 49
Urinary tract infections, *Pseudomonas aeruginosa*, 78

U

UV light, *Pseudomonas aeruginosa* disinfection (table) 96

V

Vacuum cleaners and contaminants, cleaning, 20
Viruses, in house dust, 18
VOC pollutant removal, NTPs chemistry, 123
Volatilization of PCBs, environmental entry, 140
Volatilization, PCBs, 146

W

Wastewater treatment, NTPs chemistry, 125
Water quality standards, *Pseudomonas aeruginosa*, 101
