

Index

A

- Action knowledge, 178, 180, 182
- Additive model, 2, 56–67, 243
- Anatomical connectivity, 88, 124
- Anterior ectosylvian sulcus, AES, 1, 8–9, 11, 331, 334–338, 340–341, 358
- Artificial vision, 174–175, 181, 371
- Audiovisual speech, 78, 98, 101–107, 109, 111, 113, 311
- Audition, 3, 104, 142, 156, 164, 177, 191, 197, 212, 223, 226, 304, 357, 363–364, 366, 369, 371
- Auditory
 - belt, 143–145, 166–167
 - cortex, 3, 9, 14, 58, 62–63, 78, 89, 123–133, 142–147, 163, 176, 201, 357, 371
 - hierarchy, 3, 124, 180
 - visual, 8, 11, 14, 201, 224, 333, 335, 337–339, 341, 343

B

- Bayesian modeling, 22, 35–37, 39, 43, 48
- Bimodal neurons, 11–12, 14–17
- Blindness, 4, 197, 351–372

C

- Coherence, 72, 78, 145, 155, 306, 308, 315–317, 320
- Computational modeling, 1–2, 21–49, 277
- Corticotectal, 340
- Crossmodal, 1–3, 11, 13–15, 22, 56–63, 65–68, 71–74, 76–78, 84, 96, 100, 113, 123–133, 160–161, 164, 167–169, 173, 177, 179–180, 235, 255–256, 260, 262, 264–266, 268, 280–281, 283, 353, 357–362, 368, 371
 - plasticity, 359–361
 - projections, 13–15

D

- Dark-rearing, 4, 336–338
- Development, 4, 39, 85, 89, 147–149, 164, 169, 173, 180–181, 252, 256, 267, 303, 305–306, 312, 314, 317, 319–321, 329–345, 354, 356–362, 364, 368–369
- Diffusion tensor imaging, DTI, 88

E

- Effective connectivity, 88–89, 295
- Electroencephalography, EEG, 2, 55–57, 60–65, 67, 72–74, 77–78, 84, 199, 295
- Emotion, 161, 273–274, 285–294
- Enhancement, 10, 15, 39, 62, 64, 73–75, 87, 129–131, 146, 167, 238, 319, 330, 333, 337–339, 341
- Event-related potential, ERP, 3, 23, 56–58, 60–62, 65–67, 72, 74, 198–199, 357
- Evolution, 180, 252

F

- Face processing, 112, 273–295
- Face-voice, 3, 142–146
- Facial identity, 4, 274–288, 293–294
- Feedback, 45–46, 101, 146–147, 167, 216–217, 219, 224, 236, 278, 360, 362
- Functional connectivity, 88, 360
- Functional magnetic resonance imaging, fMRI, 1–3, 23, 44, 55–56, 58, 60, 63–64, 72, 83–90, 124–129, 132, 156, 160, 165, 177, 179, 198–199, 204, 226, 231–246, 262, 277, 281–283, 287, 292, 358
- Functional methods, 22, 88, 357, 367

G

Gamma-band activity, GBA, 2, 71, 73–77, 79, 145
 Granger causality mapping, GCM, 89

H

Haptic, 3–4, 24–25, 27–28, 43, 45, 85–87, 89, 212–226, 231–246, 251–268, 273–295, 362, 367
 Hierarchical processing, 156, 181
 Human, 2–4, 21–22, 26, 34, 36–39, 43–48, 56–64, 84, 98, 102, 105–108, 113, 115, 124–125, 127–129, 131, 139–140, 142–143, 147–148, 157–163, 166, 169, 174, 176–178, 201, 214, 237, 253, 256, 258, 263, 276–277, 283, 291–292, 294, 303–324, 331–332, 334, 343–344, 352, 363, 366, 369
 electrophysiology, 2, 56–63, 170

I

Independent component analysis, ICA, 88
 Infants, 148, 305–306, 308–312, 315, 317–319, 321, 323
 Intersensory, 148, 294, 303–308, 312–316, 318, 320

K

Knowledge representations, 157, 178, 180–181

M

Magnetoencephalography, MEG, 1–2, 55–58, 60–65, 67, 72, 75
 McGurk effect, 23, 74, 98, 106, 167, 329
 Memory, 36, 71, 77, 169, 172, 176, 180, 191–205, 255–257, 259–261, 264, 266–267, 276, 280, 283, 352, 356–358, 360
 Monkey, 1, 3, 7–9, 14, 40, 113, 115, 125, 128, 140–143, 148, 201, 216, 312–314, 330–334
 Multimodal perception, 22, 28, 39–41
 Multisensory
 continuum, 2, 15–18, 330
 enhancement, 39, 238, 244, 319, 339
 integration, 1–3, 13–15, 17, 22, 56, 59, 64, 71–74, 77–79, 85–88, 96–99, 101, 103, 108–109, 143, 147, 162–165, 167, 172, 237–240, 268, 330, 333–340, 344, 362, 367–369, 372
 interactions, 2, 55–68, 71–79, 156, 160, 192, 197, 199–202, 204, 206, 330–331, 336, 339–341, 343

object, 2, 4, 21–49, 86–87, 89–90, 164, 173, 181, 303–324, 344–345, 367
 perceptual narrowing, 148, 305–306, 311, 344
 processing, 3–4, 7–8, 11–15, 17, 22–24, 28, 62, 72–73, 77–78, 83, 146, 283, 294, 331, 336–337, 341, 345, 360
 Music, 2, 77, 95–116

N

Neuroanatomy, 142
 Neuroimaging, 3–4, 56, 58, 84, 87–88, 111, 154–157, 159, 173, 198, 233, 235–237, 252–256, 277, 280–281, 283, 294–295, 355–357
 Neuronal convergence, 2, 83, 85, 231, 237–246
 Neuronal integration, 2–3, 64, 237
 Neuroscience, 212, 252, 256, 276, 284, 352
 Non-informative vision, 266–267

O

Object
 actions, 95–116, 164, 170, 174, 180–182
 motion, 174, 261–262, 322
 recognition, 30, 62, 73, 164, 192, 199, 201–202, 204, 233–235, 246, 253–264, 267–268, 274, 360, 367–368

P

Parallel pathways, 3
 Perception
 audiovisual, 155–182
 audiovisual temporal
 simple stimuli, 100–102
 complex stimuli, 102–107
 factors affecting, 107–115
 haptic, facial identity, 278–284
 measuring temporal, 99–100
 multisensory object, 21–49, 303–324
 multisensory temporal, 98–99
 multisensory texture, 211–227
 visual cortical pathways, 232–233
 visual, facial identity/expression, 274–277, 285–288
 visuo-haptic, 251–268
 Perceptual narrowing, 148, 305, 312, 344
 Performance
 behavioral, 36, 76
 bimodal, 221, 260
 haptic, 255, 266–267, 281

- human, 22, 36
 - memory, 193–194, 196–197, 204, 255
 - primate, 21
 - unimodal, 260
 - Phase synchrony, 72, 78
 - Primate, 1, 4, 13, 21–23, 28–29, 36, 39, 43–44, 46–47, 125, 139–149, 162–163, 173, 204, 231–237, 240, 305, 331–332, 334–335, 343, 360, 370
 - Processing hierarchies, 3–4, 22, 124
 - Prosopagnosia, 276, 278
- R**
- Randomization tests, 66
 - Receptive field, 147, 202, 333–334, 336–338, 340–344
 - Regional convergence, 2, 83, 85
 - Roughness, 212–219, 221–226
- S**
- Scene recognition, 265
 - Sensory awareness, 95, 123, 181
 - Sensory substitution, 4, 351–372
 - Sequence learning, 321, 323–324
 - Shape constancy, 4, 256–262
 - Shape recognition, 360
 - Single-trial, 3, 191–205
 - Social communication, 277
 - Somatosensory, 1, 8–14, 73, 77–78, 124, 129, 147, 160, 192, 200, 202, 212, 225–226, 233–237, 255, 330, 332–335, 340, 342, 357–359, 362, 364
 - Sound-induced flash illusion, 73–74
 - Spatial colocation, 318
 - Spatial maps, 368
 - Spatial perception, 169, 253, 256, 267–268
 - Spatial updating, 263–265
 - Spatiotemporal, 1, 56, 62–63, 73, 261, 280, 311, 316–317, 320, 324, 340–343
 - Speech, 2, 17, 56, 59–61, 75, 78, 85, 89, 95–116, 124, 139–141, 143, 147, 161–162, 168, 172–173, 176–177, 309–312, 320–321, 329, 364, 371
 - Statistics, 2, 10, 29–30, 34, 41, 43–44, 57, 61, 65–68, 75–76, 84–86, 88, 108, 128, 157–158, 179–180, 195, 199–200, 219, 238, 241–242, 268, 283, 289–290, 321, 323–324, 337, 339
- Subthreshold neurons, 15
- Superior colliculus, 10–11, 39, 64, 167, 330
