

Subject Index

- Aberrant vessels 92, 99, 123
- Anderson-Hynes pyeloplasty 9, 56, 58, 99, 123
- Atypical smooth muscle cells 1, 4, 5
- Autonomic nerve fibres 4, 7, 8, 9

- Background subtraction 51
- Basket, stone 109
- Bolus volume 20, 21, 24-27, 29-32, 40

- Calculus 95, 96, 101, 107, 109, 111, 117
 - dissolution of 101, 109
 - extraction of 101, 109, 111
 - oxalate 101, 117
 - phosphate 109, 117
 - staghorn 117
 - struvite 101, 109
- Calyceal contractions 17, 18
 - amplitude 17
 - frequency 17
- Candidiasis 105
- Catheter 65, 75, 81, 104, 123
 - bladder 81
 - nephrostomy 81
 - pig-tail 104
 - ureteric 123
- Caveolae 4
- Children 56, 92-100, 101, 116, 127, 129
- Cholinesterase 3, 11, 14
- Collagen 4, 9, 13
- Computed tomography 102
- Congenital abnormalities 94, 117
- Contractility, upper urinary tract 7, 14, 17, 18, 25
- Culp pyeloplasty 58, 99
- Cystic dysplasia of the kidney 94, 97
- Cystography 66, 70, 117

- Deconvolution 51
- Diagnostic methods, experimental validation of 79-91
- Diethylene triaminepentaacetic acid (DTPA) see ^{99m}Tc-DTPA
- Diuresis renography 9, 34, 55-61, 68, 79, 80, 86, 89, 118, 119, 124, 125
 - clinical applications of 56
 - comparison with
 - mean transit times 56, 59
 - morphological studies 56
 - perfusion studies 56
 - experimental validation of 79, 86
 - method of 55
- DTPA, see ^{99m}Tc-DTPA
- Dyskinesia, PUJ 92

- Elastic fibres 11, 13
- Electron microscopy 4, 11, 13
- Enuresis 128
- Excretion urography, see Intravenous urography
- Experimental
 - obstruction 26-32, 79
 - validation of diagnostic methods 79-91

- Fetal folds 93
- Foley pyeloplasty 58
- Frusemide 36, 41, 47, 55, 58, 80
- Functional activity
 - hydronephrotic urinary tract 32-43
 - normal urinary tract 16-26
- Fungal infection 105

- Gamma camera 49, 51, 80
- Ganglion cells 7
- Golgi membranes 4, 7, 11

- Haematuria 65, 97, 117
- Haemorrhage 77
- ¹²³I-hippuran 51, 55
- ¹³¹I-hippuran 49
- Histochemical studies 3
- Hypertension 95, 117

- Infection, urinary 65, 95, 97, 117
- Innervation, upper urinary tract 4
- Intercellular junction 4, 9
- Intermittent hydronephrosis 66
- Intravenous urography 34, 43-48, 80, 84, 115, 117, 123, 125
 - acute 48
 - diuresis 47
 - standard 46, 47

- Kidney
 - canine 79
 - ectopic 94, 129
 - horseshoe 99, 118
 - malrotated 99
 - multicalyceal 16
 - pelvic 94, 112, 118, 122, 129
 - porcine 16
 - solitary 105, 117
 - unicalyceal 25

- Mannitol 27-29
- Manometer 63, 69, 71, 75, 81
- Megaureter 62, 70
- Micturating cystourethrography 70, 117

- Mixing chamber 49, 50
- Myogenic conduction 8, 9
- Nephrectomy 13, 78, 97, 123, 128
- Nephrostomy
 - percutaneous 101-114
 - technique of 102
 - complications of 111
- Normal upper urinary tract
 - functional activity of 16-24
 - innervation of 4-7
 - physiology of 24-26
 - structure of 1-4
 - urodynamics of 16
- Nuclear medicine 49-61
- Obstructed upper urinary tract
 - acute 44
 - chronic 44
 - experimental 26-32
 - functional activity of 32-43
 - structure of 9-12
 - urodynamics of 28
- Pacemaker 7, 8, 25
- Pain 9, 101, 104, 116, 117, 123, 125
 - abdominal 97, 104, 117
 - loin 47, 97, 104, 117
- Paediatric problems 92-100
- Parenchymal transit time studies 49-54, 56, 59
 - clinical applications 53
 - comparison with diuresis renography 56, 59
 - deconvolution of 51
 - method 51
- Pelviureteric volume 81, 82
- Percutaneous nephrostomy, see nephrostomy
- Perinephric abscess 108
- Peristalsis normal 37
 - mildly abnormal 38
 - severely abnormal 39
- Peristaltic contractions, propagation of 8, 24
 - in hydronephrosis 36
- Polyp, ureteric 93, 123
- Pressure-flow studies 33, 34, 44, 62-78, 79, 86, 118
 - clinical applications of 62
 - complications of 65
 - contraindications to 77
 - equipment for 64, 69
 - experimental validation of 79
 - historical aspects 62
 - indications for 65
 - interpretation of 65, 75
 - performance of 70
 - results of 66
 - technique of 62, 68
- Pressure, hydrostatic 16
- Pressure, renal pelvic 20, 21, 39, 81, 84, 88, 89
- Pump
 - double headed infusion 72
 - Harvard 81
- Pyelography, percutaneous antegrade 65, 117
- Pyeloureterostomy, see Anderson-Hynes pyeloplasty
- Pyeloplasty 9, 56, 58, 99, 123
- Pyonephrosis 104, 108, 112, 123
- Radionuclides 44, 47, 48, 49-61, 128
- Reflux, vesicoureteric 61, 66, 70, 117, 118, 123
- Renacidin 109
- Renal drainage 104
- Renal parenchyma 93
- Renography 34, 49, 115, 116
- Retroperitoneal drainage 101, 106
- Serum renal function tests 80, 82, 87
- Smooth muscle cells 1, 3, 4, 5, 11, 13, 14
 - atypical 1, 4, 5
 - typical 3, 4
- Sarcoplasm 4
- Stenosis, ureteric 92, 101
- Stone, see Calculus
- Stricture
 - pelviureteric 92, 108
 - dilatation of 108
- Structure, upper urinary tract 1-15
 - hydronephrotic 9-12
 - normal 1-4
- ^{99m}Tc-DTPA 51, 55, 80
- Tetrodoxin 9
- Torulopsis 105
- Trauma 95
- Typical smooth muscle 3, 4
- Ultrasound 44, 97, 102, 116, 117
- Unicalyceal kidney 25
- Upper urinary tract
 - dilated segment 9
 - undilated segment 11
- Uraemia 116, 117
- Ureter
 - high insertion of 92
 - ligation 79
- Ureteric polyp, see Polyp
- Ureteric stenosis, see Stenosis
- Urinoma 104, 106, 123
- Urodynamics
 - multicalyceal urinary tract 16-43
 - normal upper urinary tract 16
 - hydronephrotic urinary tract 28
- Vesicoureteric reflux, see Reflux
- Volume, renal pelvic 81, 82
- Wound infection 123
