

Index

A

- Abdominoperineal resection
 - anatomical points, 49
 - complications, 50
 - general anesthesia, 48
 - midline incision, 49
 - objective of, 49
 - perspective, 50–52
- Anal fissurectomy, 81–83
- Anal surgery
 - anal fissurectomy, 81–83
 - examination under anesthesia (EUA), 72–73
 - fistulotomy and LIFT, 84–86
 - hemorrhoidectomy, 92–95
 - ischioirectal abscess drainage, 76–78
 - lateral internal sphincterotomy, 79–81
 - mucosal advancement flap, 89–92
 - perianal abscess drainage
 - anatomical points, 74–75
 - complications, 76
 - general anesthesia, 74
 - mushroom catheter placement, 74
 - objective of, 74
 - perspective, 75
 - prone jackknife position, 74
 - seton placement, 86–89
- Anastomotic leakage, colorectal surgery, 3
- Anterior resection
 - anatomical points, 42
 - complications, 44–45
 - general anesthesia, 41
 - objective of, 41
 - perspective, 42–44
 - restoration of continuity, 45–48

Appendectomy

- laparoscopic
 - anatomical points, 14
 - complications, 15–16
 - general anesthesia, 13
 - objective of, 13
 - perspective, 14, 15
- open
 - abscess formation, 12
 - anatomical points, 11
 - fistula/sinus formation, 12
 - general anesthesia, 10
 - incisional hernia, 13
 - infective complications, 11–12
 - multi-system organ failure, 12
 - nerve injury, 13
 - objective of, 10
 - patient positioning, 10
 - prolonged ileus, 13
 - small bowel obstruction, 13
 - systemic sepsis, 12
 - transverse (Lanz) skin incision, 10
 - ureteric injury or iliac arterial injury, 13

B

- Bladder dysfunction, 5
- Bowel dysfunction, 5

C

- Circumcision
 - anatomical points, 110
 - anesthesia, 110
 - complications, 111–112
 - perspective, 111

- Colonoscopy, 8–10
- Colorectal surgery, 1
 - abdominoperineal resection
 - anatomical points, 49
 - complications, 50
 - general anesthesia, 48
 - midline incision, 49
 - objective of, 49
 - perspective, 50–52
 - abscess formation, 3
 - anastomotic leakage, 3
 - anterior resection
 - anatomical points, 42
 - complications, 44–45
 - general anesthesia, 41
 - objective of, 41
 - perspective, 42–44
 - restoration of continuity, 45–48
 - bladder dysfunction, 5
 - bowel dysfunction, 5
 - colonic pouches, 4
 - colonoscopy, 8–10
 - colostomy and mucous fistula
 - anatomical points, 17
 - complications, 19
 - general anesthesia, 16
 - Lloyd-Davies position, 16
 - perspective, 17–18
 - compartment syndrome, 5
 - deep venous thrombosis and nerve palsies, 5
 - elective Hartmann's procedure
 - anatomical points, 29
 - complications, 31
 - general anesthesia, 28
 - midline incision, 28–29
 - objective of, 28
 - perspective, 29, 30
 - restoration of continuity, 45–48
 - wound closure, 29
 - emergency Hartmann's procedure
 - anatomical points, 32
 - complications, 33
 - general anesthesia, 31
 - midline incision, 32
 - objective of, 31–32
 - perspective, 33, 34
 - wound closure, 32
 - infected wound, post-colonic resection, 3, 4
 - ischemic colon post-op volvulus, 3, 4
 - laparoscopic and robotic-assisted laparoscopic (RAL), 56
 - laparoscopic appendectomy
 - anatomical points, 14
 - complications, 15–16
 - general anesthesia, 13
 - objective of, 13
 - perspective, 14, 15
 - large bowel resection right hemicolectomy
 - anatomical points, 23
 - complications, 25
 - general anesthesia, 22
 - objective of, 23
 - limb ischemia, 5
 - loop colostomy
 - anatomical points, 20
 - complications, 22
 - general anesthesia, 19
 - objective of, 19–20
 - perspective, 20, 21
 - loop ileostomies, 4
 - mortality, 5
 - multi-system failure, 3
 - open appendectomy
 - abscess formation, 12
 - anatomical points, 11
 - fistula/sinus formation, 12
 - general anesthesia, 10
 - incisional hernia, 13
 - infective complications, 11–12
 - multi-system organ failure, 12
 - nerve injury, 13
 - objective of, 10
 - patient positioning, 10
 - prolonged ileus, 13
 - small bowel obstruction, 13
 - systemic sepsis, 12
 - transverse (Lanz) skin incision, 10
 - ureteric injury or iliac arterial injury, 13
 - peritonitis, 3
 - peroneal nerve palsy, 5
 - right hemicolectomy
 - anatomical points, 26
 - complications, 26–28
 - general anesthesia, 25
 - objective of, 25
 - perspective, 26, 27
 - restoration of continuity, 45–48
 - rigid sigmoidoscopy and/or rectal biopsy, 6–7
 - segmental colonic resection
 - colostomy without primary anastomosis, 35–38

- with primary colonic anastomosis, 35–38
 - restoration of continuity, 45–48
 - sexual dysfunction, 5
 - systemic sepsis, 3
 - total procto-colectomy and restorative ileo-anal or ilio-rectal) pouch reconstruction
 - complications, 55–56
 - objective of, 53
 - perspective, 53–55
 - Colostomy and mucous fistula
 - anatomical points, 17
 - complications, 19
 - general anesthesia, 16
 - Lloyd-Davies position, 16
 - perspective, 17–18
 - Cosmetic deformity, 112
- D**
- Deep venous thrombosis, 5
- E**
- Epididymal cyst resection, 118–120
- H**
- Hartmann's procedure
 - anatomical points, 29, 32
 - complications, 31, 33
 - general anesthesia, 28, 31
 - midline incision, 28–29, 32
 - objective of, 28, 31–32
 - perspective, 29, 30, 33, 34
 - restoration of continuity, 45–48
 - wound closure, 29, 32
 - Hemorrhoidectomy, 92–95
 - Hydrocele repair, 116–118
- I**
- Ischiorectal abscess drainage, 76–78
- K**
- Karydakis procedure, 104–106
- L**
- Large bowel resection right hemicolectomy
 - anatomical points, 23
 - complications, 25
 - general anesthesia, 22
 - objective of, 23
 - Lateral internal sphincterotomy, 79–81
 - Loop colostomy
 - anatomical points, 20
 - complications, 22
 - general anesthesia, 19
 - objective of, 19–20
 - perspective, 20, 21
- M**
- Meatal stenosis, 112–114
 - Meatal ulceration, 112
 - Mucosal advancement flap, anal surgery, 89–92
- N**
- Nerve palsies, 5
- O**
- Orchidectomy, 120–122
- P**
- Perianal abscess drainage
 - anatomical points, 74–75
 - complications, 76
 - general anesthesia, 74
 - mushroom catheter placement, 74
 - objective of, 74
 - perspective, 75
 - prone jackknife position, 74
 - Peritonitis, 3
 - Peroneal nerve palsy, 5
 - Pilonidal sinus surgery
 - abscess incision and drainage surgery, 100–102
 - excision and laying open, 102–104
 - Karydakis procedure, 104–106
 - Purulent discharge, 102
- R**
- Right hemicolectomy
 - anatomical points, 26
 - complications, 26–28
 - general anesthesia, 25
 - objective of, 25
 - perspective, 26, 27
 - restoration of continuity, 45–48
 - Rigid sigmoidoscopy and/or rectal biopsy, 6–7

S

Seton placement, anal surgery, 86–89
Systemic sepsis, 102

T

Testicular open biopsy, 122–124
Testicular torsion, 114–116

U

Urinary retention, 102

V

Varicocele repair, 126–128
Vasectomy surgery, 124–126

W

Wound necrosis, 112
