

Index

A

Abstinent alcoholics, 132
Alcohol, 193, 197, 209, 227, 261, 279, 308, 314
 dehydrogenase, 77, 82, 83, 86
 metabolizing enzymes, 75
 stress in animals, 229
 stress in humans, 233
 testicular suppression, 286
 withdrawal, 129
Alcoholic beverages, 147
Alcoholism, 128, 135, 138
Alpha and LH beta gene transcription, 102
Amenorrhea, 263, 264
Amethystic actions of TRH, 138
Anovulation, 266, 268
Antagonism, 29, 41
Anticraving actions, 140
Arcuate nucleus, 301
AVP/OT system, 211

B

Behavior, 308
Bourbon congener, 154
 estrogenicity, 148
Brain, 310
Brain TRH systems, 163

C

cDNA, 246
Central nervous system, 308
Chronic alcoholic males, 326

Circadian rhythm, 185
Cloning, 246
Crosstolerance studies, 29, 40
CYP2E1, 178, 179, 182
Cytosolic retinol dehydrogenase, 77
Cytotoxic, 10

D

Depression, 137

E

Endocrine axes, 28
Endocrine, 5
Endocrine function, 26, 30
Estrogen receptor, 150
Ethanol, 6, 7, 10, 49, 75, 85, 97, 311
 exposure, 255
 inducible cytochrome p4502E1, 177
 ingestion, 1, 2
 inhibition, 83
ETOH, 51, 53, 54, 59, 61, 98–100, 103, 107, 109, 113, 114, 211
Excitatory amino acid system, 64

F

Fetal alcohol syndrome, 85
 growth/development, 312
FOCUS cell proliferation, 254
FOCUS HCC cells, 252
FSH, 103, 109

G

Gastrointestinal tract, 314
GC/MS, 152
Gene expression, 82
Gene family members, 178
Gene structure, 177
Genetic polymorphisms, 185
GH, 329
GH-regulated hepatic function, 331
GH secretions, 55, 59, 60
Gonadal effects, 98
Growth hormone-related, 325
Growth hormone, 184

H

Health consequences, 228
Heart, 315
Hepatic hormone metabolism, 329
Hepatic vitamin A, 85
Hormones, 147
 analog, 161
 axis, 114
Human HCC cells, 250, 255
Hypothalamic LHRH, 109
 neurons, 295
 peptides, 53

I

In vivo animal studies, 149
IRS-1, 247
IRS-1 ethanol exposure, 250
IRS-1 tyrosyl phosphorylation, 252

K

Kidney, 316

L

LH secretions, 55, 59
LH serum, 99
LHRH secretion, 61
Liver, 181, 315
 cell growth, 247
 function, 325

Lung, 316

Luteal-phase dysfunction, 266, 268

M

Microsomal retinol dehydrogenase,
 80
mRNA in diabetes, 181
 μ and κ opioid receptors, 23
 μ , κ , and δ opioid receptors, 26
 μ -agonist, 298, 300

N

Neural tube, 88
Neural tube development, 86
Neuroanatomical substrates, 166
Neurobehavioral, 138
Neuroendocrine function, 21, 23
Neuroendocrine responses, 49, 128
Neurohypophysial terminals, 212
Neuromodulatory action, 295
Neurosecretory system, 210
Neurotransmitter mediation, 29, 38
Norepinephrine-prostaglandin E₂
 system, 62

O

Ontogeny, 28
Opioids, 279, 301
 endocrine interactions, 28
 endocrine pharmacology, 23
 induced testicular suppression,
 284
 mediated, 21, 286
 peptides, 295
 system, 67
Organ system effects, 314
Ovarian maturity, 57
Oxytocin, 209, 210

P

P and NP rats, 163
p36 protein kinase substrate, 255
Paraventricular nuclei, 295, 297
Parturition, 311

- Peptide release, 212
Peripubertal period, 53
PGs, 308, 311, 314
Phytoestrogen congeners, 151, 152
Phytoestrogens, 147, 148
Pituitary response to TRH, 129,
132, 135, 137
 gonadotropin function, 99
 LH content, 100
 transmembrane signal
 processing, 107
Poikilothermy, 198
Prolactin, 113
Prostaglandins, 307
Protein by acetone, 182
Puberty, 1, 2, 5, 51
Putative neurochemical
 mechanisms, 166
- R**
- Rat liver, 250
Receptor substrates insulin, 246
Receptor substrates liver, 245
Reproduction, 97, 311
 dysfunction in women, 263
 endocrine system, 2
 function in social drinkers, 271
 hormones in women, 261
Retinal reductase, 80
Retinoic acid regulation, 82
Retinoic acid synthesis, 75, 76
Retinoid teratogenesis, 85
Retinol oxidation, 83
Retinol-oxidizing enzymes, 81
- S**
- Sertoli cell, 10
Serum pituitary hormone levels, 51
Sex hormone changes, 326
Sex hormone homeostasis, 325, 327
Sex steroids, 329
Sexually dimorphic liver function,
328
Steroid hormone release, 57
Stress, 227, 228
Stressor, 228
Supraoptic nuclei, 295, 297
- T**
- TA-0910, 161, 165
Testicular function, 279
Testicular suppression, 280
Thermal status, 196
Thermoregulation, 193
Thermoregulatory set point, 199
 mechanisms, 194
 response to alcohol, 200, 202
Thyrotropin-releasing hormone,
127–129
TIF formation, 281
TRH, 138, 161
Tyrosyl phosphorylation, 245
- U**
- Umbilical/placental vasculature, 312
- V**
- Vasopressin, 209, 210
