asymptotic phase, 6

B

Bäcklund-Darboux
transformation, 19
base projection, 39
basis of \mathcal{S}_k , 15
bump function, 28, 30

C

C^0 contraction, 42
 C^0 norm, 42
Cauchy problem, 14, 32
Cauchy sequence, 43, 53
center manifold theory in infinite
dimensions, 4
center-unstable, center-stable,
and center manifolds
of \tilde{S}_ω , 36
center-unstable, center-stable,
and center manifolds
of S_ω , 36
circle of fixed points, 22
contraction map, 48
coordinate representation, 78

D

Darboux transformations, 11
Defocusing nonlinear Schrödinger
equation, 10
dependence on data, 14, 32

E

enlarged system (EPNLS), 23
existence of fibers, 89

existence of invariant manifolds,
2
existence of stable, unstable and
center manifolds, 3
explicit representations for in-
variant manifolds and
fibers, 19
exponential dichotomies, 7

F

families of linear maps, 73
family of fibers, 64, 109, 158
fiber representations, 63
fiber theorem, 18
fibers of the transversal bundle,
38
fibration theorem, 63
fibrations of stable and unstable
manifolds, 5
focusing nonlinear Schrödinger
equation, 11

G

generalized Liapunov-type num-
bers, 7
global existence, 14
graph transform, 38, 41, 42, 44,
52, 92
growth rates, 25

H

\tilde{H} norms, 21
 H_k norm, 21
Hilbert space, 53

I

inertial manifolds, 8

infinite-dimensional
 dynamical system, 1
 inflowing invariance, 7, 17
 inflowing invariant center-stable
 manifold, 62
 invariant manifolds in
 infinite-dimensional
 Hamiltonian systems, 8
 invariant manifolds in infinite di-
 mensions, 1
 invariant manifolds of \tilde{S}_ω , 35
 invariant subbundle, 75
 invariant subbundle lemma, 73

linear functional equation, 75
 Lipschitz seminorm on Σ , 39
 local coordinates, 78, 125
 local invariance condition, 104
 local well-posedness, 14
 locally invariant manifold, 35
 locally invariant subbundle, 101

M

mean value theorem, 39
 metric characterization of the
 fibers, 117
 modified KdV equation, 11

N

nonlinear Schrödinger
 (NLS) equation, 9
 normal complement, 68
 normal complements of TM , 65
 normal forms for partial differen-
 tial equations, 8
 normal hyperbolicity, 6

O

overflowing invariance, 7, 17, 63
 overflowing invariance condition,
 108
 overflowing invariant
 center-unstable
 manifold, 62

P

persistence and
 differentiability of in-
 variant
 manifolds under pertur-
 bation, 6
 persistent invariant
 manifold theorem, 18
 persistent overflowing invariant
 manifold, 52
 perturbatively damped
 and driven nonlinear
 Schrödinger equation
 (PLNS), 13
 plane of constants, 15
 projection on fibers, 40

R

rate lemmas, 65
 regularized Laplacian, 13
 resonance circle, 21
 resonance circle S_ω , 15

S

Sinh-Gordon equation, 10, 11
 s-linear operator norm, 116
 smoothness of fiber, 109
 smoothness of graph σ , 52
 smoothness of stable, unstable
 and center manifolds, 5
 smoothness of the fibers with
 respect to their base
 points, 124
 Sobolev space of periodic func-
 tions, 14

solid torus neighborhood of S_ω ,
 37
 soliton equations, 10
 space of sections of $N_\kappa|_M$, 38
 stable fiber, 20
 stable space $E^s(\vec{q}_\gamma)$, 15
 stable, unstable, and center manifolds
 of equilibrium points, 4
 statement of persistence and fiber theorems, 17
 statement of the fiber theorem, 64
 strictly overflowing invariant, 30

T

tangent and transversal bundles
 of M , 29
 tangent bundles of M^u , 65
 tangent spaces, 17
 transversal bundles, 71
 trivial bundle splitting, 68

U

unstable fiber, 20, 64
 unstable space $E^u(\vec{q}_\gamma)$, 15

W

whiskers, 20
