## About the Authors

**Raj Senani** received B.Sc. from Lucknow University, B.Sc. Engg. from Harcourt Butler Technological Institute, Kanpur, M.E. (Honors) from Motilal Nehru National Institute of Technology (MNNIT), Allahabad and Ph.D. in Electrical Engg. from the University of Allahabad.

Dr. Senani held the positions of Lecturer (1975–1986) and Reader (1986–1988) at the EE Department of MNNIT, Allahabad. He joined the ECE. Department of the Delhi Institute of Technology (now named as Netaji Subhas Institute of Technology) in 1988 and became a full Professor in 1990. Since then, he has served as Head, ECE Department, Head Applied Sciences, Head, Manufacturing Processes and Automation Engineering, Dean Research, Dean Academic, Dean Administration, Dean Post Graduate Studies and Director of the Institute, a number of times.

Professor Senani's teaching and research interests are in the areas of Bipolar and CMOS Analog Integrated Circuits, Electronic Instrumentation and Chaotic Nonlinear Circuits. He has authored/co-authored 135 research papers in various international journals and 4 book chapters for monographs published by Springer. He is currently serving as Editor-in-Chief for IETE Journal of Education and as an

Associate Editor for the Journal on Circuits, Systems and Signal Processing, Birkhauser Boston (USA) since 2003, besides being on the editorial boards of several other journals and acting as an editorial reviewer for 30 international journals.

Professor Senani is a Senior Member of IEEE and was elected a Fellow of the National Academy of Sciences, India, in 2008. He is the recipient of Second Laureate of the 25th Khwarizmi International Award for the year 2012. Professor Senani's biography has been included in several editions of Marquis' Who's Who series (published from NJ, USA) and a number of other international biographical directories.

**D.R. Bhaskar** received B.Sc. degree from Agra University, B.Tech. degree from Indian Institute of Technology (IIT), Kanpur, M.Tech. from IIT, Delhi and Ph.D. from University of Delhi. Dr. Bhaskar held the positions of Assistant Engineer in DESU (1981–1984), Lecturer (1984–1990) and Senior Lecturer (1990–1995) at the EE Department of Delhi College of Engineering and Reader in ECE Department of Jamia Millia Islamia (1995–2002). He became a full Professor in January 2002 and has served as the Head of the Department of ECE during 2002–2005.

Professor Bhaskar's teaching and research interests are in the areas of Analog Integrated Circuits and Signal Processing, Communication Systems and Electronic Instrumentation. He has authored/co-authored 64 research papers in various International journals and 3 book chapters for monographs published by Springer. He has acted/has been acting as a Reviewer for several international journals. Professor Bhaskar is a Senior Member of IEEE. His biography is included in a number of international biographical directories.

**A.K. Singh** received M.Tech. in Electronics and Communication Engineering from IASED and Ph.D., in the area of Analog Integrated Circuits and Signal processing, from Netaji Subhas Institute of Technology (NSIT), University of Delhi. Dr. Singh held the positions of Lecturer and Senior Lecturer (June 2000–August 2001) at the ECE Department, AKG Engineering College, Ghaziabad. He joined ECE Department of Inderprastha Engineering College, Ghaziabad, India as a Senior Lecturer in August 2001 where he became Assistant Professor in April, 2002 and Associate Professor in 2006.

At present, he is a full Professor at the ECE Department of HRCT Group of Institutions, Faculty of Engineering and Technology, Ghaziabad, India. His teaching and research interests are in the areas of Bipolar and MOS Analog Integrated Circuits and Signal Processing. Dr. Singh has authored/co-authored 36 research papers in various International journals and 2 book chapters for monographs published by Springer.

**V.K. Singh** obtained B.E. and M.E. degrees in Electrical Engineering from MNR Engineering College, Allahabad and Ph.D. in Electronics and Communication Engineering from Uttar Pradesh Technical University, India. He worked as a

Research Assistant (1979–1980) at EE Department of MNR Engineering College Allahabad, as Teaching Assistant (1980–1981) and Assistant Professor at EE Department of GB Pant University; as a Lecturer (1986–1992) and Assistant Professor at Institute of Engineering and Technology (IET) Lucknow (1992–2004) where he became a full Professor in 2004. He has served as Head of the ECE Department at IET Lucknow between 1986–1988 and 2007–2010 where currently he is functioning as Dean of Research and Development since 2007. His teaching and research interests are in the areas of Analog Integrated Circuits and Signal Processing and he has published 16 research papers in various international Journals.

# Index

## A

Active R biquad, 107–110, 126  
Active-R oscillators, 139, 148, 151–152  
Active-R single resistance controlled oscillators (SRCO), 148–152  
Amplifiers, 2, 7, 9–11, 17, 20, 25, 26, 28, 30–31, 33, 34, 45, 53, 72, 113, 211, 233  
Analog circuit, 1–3  
  design, 213  
Analog dividers, 191–192, 208  
Analog filters, 110  
Analog multipliers (AM), 164, 165, 168–173, 175, 181, 207, 208, 237  
Analog signal processing, 1, 9, 12, 19

## B

Biquads, 82–107, 109, 115–116, 118, 126, 205  
Bootstrapping, 224, 225  
Building blocks, 236–238

## C

Cable driver, 182  
Canonic single resistance controlled oscillators (SRCO), 135–137, 157, 175  
Capacitive feedback, 32, 36  
CCCS. *See* Current-controlled-current-sources (CCCS)  
CCVS. *See* Controlled source implementations (CCVS)  
Chaotic oscillators, 193–197  
Chua diode, 194, 195  
Chua's oscillator, 193–197  
Circuit building blocks, 9–20

CMRR, 227, 231, 232  
Compensating capacitor, 28, 30, 42  
Compensation, 25–28, 36, 38, 39  
Controlled source implementations (CCVS), 35  
Controlled sources, 2, 7, 30, 35  
Current-controlled current conveyor (CCCC), 201, 211–213  
Current-controlled current feedback operational amplifiers (CFOA), 232–233  
Current-controlled-current-sources (CCCS), 35  
Current conveyors, 11–14, 26, 62, 72, 81, 131, 132, 153, 189, 193, 201, 223, 232  
Current difference buffered amplifiers (CDBA), 18, 201, 207–208  
Current differencing transconductance amplifier (CDTA), 13, 19–20, 201, 210, 211, 213  
Current feedback, 26, 30  
  amplifiers, 153, 214, 233–234  
  conveyor, 233  
Current feedback operational amplifiers (CFOA), 1–3, 12–15, 20  
  architecture, 224–229  
  pole, 148–152  
Current followers, 32, 36, 37  
Current follower transconductance amplifier (CFTA), 201, 211, 213  
Current mirror, 232  
Current mode (CM)  
  biquad, 83–107  
  circuits, 11, 13, 152  
  oscillators, 156

**D**

DC precision, 31  
 Deboo's integrator, 38  
 Decoupling of gain and bandwidth, 30–31  
 Differential difference complementary current feedback amplifier (DDCCFA), 235–237  
 Differential input buffered transconductance amplifier (DBTA), 201, 212, 213  
 Differential voltage Current feedback amplifier (DVCFA), 233, 234  
 Differentiators, 2  
 Double scroll attractor, 195

**E**

Electronically-gain variable amplifier, 181, 182  
 Explicit current output, 152–157, 175

**F**

Floating generalized impedance convertor (GIC), 64  
 Floating generalized impedance simulator, 60–65  
 Floating impedances, 53, 54, 63–65, 74, 76, 77, 204  
 Four terminal floating nullor (FTFN), 13, 17, 201, 204–205, 213  
 Frequency dependent negative conductance, 49, 67, 70  
 Frequency dependent negative resistance, 49, 56–60, 65, 70, 73, 74, 76, 77  
 Frequency stability, 132, 139, 143, 144, 160, 161, 167  
 Full power bandwidth (FPBW), 9  
 Fully differential biquad, 115–116  
 Fully-differential current feedback operational amplifiers (CFOA), 229, 230  
 Fully differential integrator, 113–115  
 Fully uncoupled oscillator, 157, 158, 160

**G**

Gain bandwidth conflict, 7–8  
 Generalized positive impedance converters, 55  
 Generalized positive impedance inverters, 55, 62, 63  
 Grounded capacitors, 62, 64, 67–70, 132, 137–139, 144, 148, 156, 157, 171, 174–176  
 Gyrator, 52, 54–56

**H**

Higher order filter, 55, 62, 63, 68–71

**I**

IC implementation, 83, 94  
 Impedance converters, 55, 63  
 Impedance inverters, 54, 55, 63  
 Inductance simulation, 50, 52, 53, 61  
 Instrumentation amplifier, 2, 6–8  
 Integrated circuits, 15  
 Integrators, 2  
 Inverse active filters, 110–112  
 Inverse transformation, 5

**K**

Kerwin Huelsman Newcomb (KHN) biquad, 84, 85, 87, 97

**L**

LC Ladder prototype, 118–122, 125  
 Linear voltage-controlled oscillators (VCOs), 161, 163–167, 173, 175  
 Lossless floating inductance simulator, 52, 62, 65–68  
 Lossy floating inductance simulator, 65–68  
 Lossy grounded inductor, 56–60  
 Low component count, 188

**M**

Mixed mode, 195–197  
 biquad, 83, 107, 126  
 Mixed translinear cell (MTC), 14  
 Modified current feedback operational amplifiers (CFOA), 232, 237  
 Modular filter structure, 119, 121–125  
 Monostable, 206  
 MOSFET-C filters, 16, 112–118, 126  
 MOSFET-C sinusoidal oscillator, 173–175  
 Multifunction biquad, 86, 100, 101  
 Multiphase oscillator, 151, 152  
 Multivibrators, 2, 205, 206

**N**

Negative capacitance, 56, 60, 61, 77  
 Negative impedance inverter, 55  
 Negative inductance, 56, 60, 61, 77  
 Network transformation, 70  
 Nonlinearity cancellation, 73, 173  
 Norton amplifier, 16

**O**

Offset voltage, 26, 31, 32, 47, 224–225
