- Adaptor, cascade, 9
 - parallel, 8
 - series, 8
- Algorithm for low-pass prototype, 55
- Amplitude response, 13

- Band-pass, building blocks, 75, 76, 77
 - equivalent network, 78
 - transfer function, 74
- Band-width scaling parameter, 14
- Bilinear transform, 14

- Continued fraction expansion, 21

- Damped discrete integrator, 3, 5, 18
- DDI, 3, 5, 18

Delay,13

Distributed network, 6,7

Equal emphasis polynomial,35

Equidistant linear-phase response,29

Finite-band approximation,113

First-order digital section,12

Flat delay, 32

Generalized approximation,105

Group delay,13

High-pass filter,38,112

 transformation, 41,70

Hilbert transform,48,51,79,81

Hurwitz polynomial 21

LDI, 3,5,18,73

Leap-frog, 3,19

Linear switched-capacitor section,11,12

Linear-phase bandwidth,53,59

Lossless discrete integrator, 3,5,18,73

Low-pass, 18,43

Low-sensitivity filters, 2

Maximally-flat delay,21

Minimum-phase function,46

Non-minimum-phase function,105

Open-circuited stub, 6,7

Optimal, band-pass ladder,73

 high-pass design,46

 low-pass design, 45

 low-pass realizable function,52

Optimum compromise,46,47

Passive ladder model,3,4

Phase response,13

Prototype band-pass function,82

 function,45,51

 loss function,49

 lowpass function,51

Quadratic switched-capacitor section,10

Quasi-minimum-phase function,46

Realizable band-pass function,86

Rhodes polynomial, 29

Scaling parameter,22

Second-order digital section,12

Short-circuited stub 6,7

Stability,114

State-variable filter, 3,4

Transmission zeros,20,111

Unit element, 6,7

Wave digital filter, 6

Zero bandwidth approximation,124
