

INDEX

A

abstraction, 18, 141 ff., 222, 231
accounting specification, 147 ff.
adaptability, 224, 226-7, 230
adaptive enterprise, 219, 222-3, 229
adaptive system, 22, 23
adaptiveness, 223, 228
adequacy, 238 ff.
agent, 19 ff., 189-193
Alexander, Christopher, 219, 220,
 224 ff., 230, 233
ambiguity, 238 ff.
analysis and design, 237 ff.
anticipatory system, 20 ff.
arrow thinking, 32
arrow-diagram logic, 27
associations, elementary, 211 ff.; see
 also generic relationships,
 information modeling

B

behavio(u)r, 1-310
behavioral interface specification, 175
behavioural equivalence in CBAS, 109
Bellcore, 16
bend counit, 80, 84
bend unit, 80, 84
black box, 62
Brand, Stewart, 219, 220, 224
business contracts, 271, 273
business process reengineering, 151

business processes, 230
business requirements, 209; see also
 business specification
business satisfaction, 216 ff.
business specification, 22, 142 ff.,
 209 ff., 230, 232-3, 271 ff.
business strategy, 271

C

CafeOBJ, 106
capability, 22
capsule class, 76
Carroll, Lewis, vii
CASE tool, 1, 6, 7, 9, 13
category theory, ix-x, 23, 28, 78 ff.,
 105 ff.
cellular automata, 189-192
center, 225, 231, 233
change, 219, 223-225, 230
chaos, 189, 190, 192
clarity, 1-310
class diagram, 239 ff.
classical economics, 271
Cleanroom, 62, 64
closure, 18-20
code generation, 1, 3, 6, 7, 12
cognitive misdirection, 237 ff.
communication diagram, 304
complex adaptive systems; see
 systems, complex systems
complex systems, 192; see also
 systems

complexity, vii ff.
 Component-based Algebraic
 Specification (CBAS), 110
 composition, viii ff., 18-9, 111, 142
 ff.; see also generic relationships
 connector, 76 ff.
 constraint language, 125
 constraint on class, 127
 construction practices, 220, 223-5,
 227
 context support, 219, 220, 230, 233
 context, 219, 220, 223, 228 ff.
 context-and-coordination, 223, 227,
 228
 context-free grammar, 2-6, 9, 10, 13
 CORBA, 18
 core semantics, 50
 cybernetics, 24

D

deontic articulation, 22
 design practices, 220, 225, 227
 design, 219, 221, 223
 diagram operation, 34
 diagram predicate, 35
 Dijkstra, E.W., vii ff., 146 ff.
 dual type, 80
 duality, 84
 duplex channel, 80
 duplex port, 80

E

ease of change, 156
 eclectic (notation), 240
 E-Commerce, 271 ff.
 edge of chaos, 189-193
 Eiffel, 175, 184
 elegance, viii, ix, 141 ff.

E-Macrocommerce, 271 ff.
 emergence, 20, 189-192
 emergent behavior, see emergence
 E-Microcommerce, 271 ff.
 enterprise, 20-24, 219 ff., 271 ff.; see
 also business specification
 epistemology, 219, 221, 223, 231
 essential software architecture, 291
 evaluation, 80
 event partitioning, 291
 existential articulation, 22

F

feature interaction, 15, 16, 23
 feedback (reference relationship),
 143-144
 feedback, 77, 87
 flow graphs, 75 ff.
 formal methods, 1, 2, 6, 7; see also
 mathematics
 formalisation strategy, 49
 formalisation, 47; see also
 mathematics
 frame, 178
 frightening size and complexity, 150
 functional decomposition, 291
 functor, 78
 fundamental insights, x-xi

G

game theory, 271 ff.
 generic relationships, 142 ff.; see also
 information modeling
 generic relationships, some defining
 invariants, 158
 graph-based logic, 30
 GRM, ix, 146, 157
 guns for hire, 220

H

habitus, 233
 hacking a hut, 142
 Haeckel, Stephan, 227
 hidden algebra, 106
 higher order nodes, 86
 human-computer interaction, 219, 222
 hyperincursion, 24

I

identification, 77, 80, 87
 identity, 77, 80
 ideosyncrasies, vii
 implementation architecture, 291
 inadvertent and inevitable errors, 222
 inconsistency, 238 ff.
 information management project,
 142-143
 information modeling, 141 ff., 209 ff.,
 260 ff., 271 ff., 282, 286
 inquiry, 223, 231, 233
 interaction graphs, 75 ff.
 interface partitioning, 291
 invariant, 19, 131, 141 ff., 157, 177;
 see also generic relationships
 invariant, meta-model for, 128
 invariant, semantics of, 131
 invariants first, operations later, 157
 invariants, usage by a Subject Matter
 Expert, 145
 invisible hand, ix
 isolated model, 18, 19

J

Java, 175
 JML, 175
 JSD, 62

juxtaposition, 77, 83

L

Larch, 175, 185
 layered context perspective, 219, 227,
 229, 230

M

management theory, 223; see also
 organizational theory
 market economy as composition,
 viii ff.
 mathematics, x, 1 ff., 15 ff., 27 ff., 65
 ff., 78 ff., 105 ff., 162 ff.
 meta-modelling, 45 ff.
 methodology, 237 ff.
 mission statement, 298
 model extension, 56
 model strengthening, 54
 model transformations, 164
 model-based specification, 176
 modeling language, 3, 5, 6; see also
 UML
 models, 220, 221, 226
 Module Interconnection Language, 196
 monoid structure, 79
 mortgage origination in house, 211 ff.
 movement of cash, 147 ff.
 mutual awareness, 219, 220, 229, 231

N

node operators, 77, 82
 nodes as data, 85

O

object-oriented development, 237, 238,

256
 OCL, 46, 54 ff., 125
 OCL, meta-model for, 128
 OCL, semantics of, 131
 ontology, 17 ff., 259 ff.
 OO methods, 61ff.
 organizational theory, 271; see also
 management theory
 outcomes, 228

P

package concept, 198
 participatory design, 222, 226
 performers, relative unimportance of,
 216
 platform, 20
 pleasure to read, 146, see also elegance
 postcondition, 145, 153 ff., 178
 postponing decisions, 146, 157
 powerful features, vii
 practices, 219-221, 230
 pre- and postconditions, 211 ff.
 precision over correctness, 155
 precondition, 145, 153 ff., 178
 prediction, 219, 223, 226
 prisoner's dilemma, 271
 process algebra, 62, 65
 process chain, 21, 22
 projection operator, 110
 projection, 18, 19
 protocol class, 76
 protocol type, 80
 psychoanalysis, 24
 PUML, 46
 purposefulness, 223, 228, 232

R

RAL, 161

ramification, 77, 80, 88
 realization relationship, 143-144
 Real-Time, 75
 referential articulation, 20
 refinement, 20, 24, 46
 reflective system, 22, 23
 relation algebra, 63, 64
 relationship "shapes", 157, see also
 generic relationships, realization
 relationship
 relationships between centers, 225
 relationships between contexts, 229,
 231
 relationships between people, 228
 relationships, 231
 relationships, see also generic
 relationships, structure over
 content
 restriction, 18, 19
 RM-ODP, viii ff., 91 ff., 146 ff., 284

S

scenario, 62, 68
 semantic data modeling, 36
 semantics, 1-310
 sending messages to a paycheck, 146
 Sense-and-Respond, 223, 227, 230
 sequence diagram, 245-250
 sequential composition, 77, 78, 82
 service description, 18, 21
 set theory, 18, 19
 shearing layers, 220, 224, 225, 228 ff.
 simplicity, 212 ff.; see also
 abstraction
 situated design, 222, 231
 sketch, 33
 SME (subject matter expert), 145, 209
 ff.
 Smith, Adam, viii ff.

social system, 223, 228, 231, 232
 social theory, 221
 software architecture, 196; see also
 platform
 solution, “low-tech”, 142
 solution, “no-tech”, 142
 spaces (physical, social, virtual), 227
 ff.
 specification process, 210 ff.
 specification, 1-310
 state diagram, 250-253
 string-based logic, 30
 structural constraint, 123
 structure model, 76
 structure over content, 155
 structure specification, 76
 structuring, proper, 211; see also
 abstraction
 subject domain, 293
 subject domain-oriented
 decomposition, 291
 Suchman, Lucy, 222, 231
 superposition, 22
 system function, 298
 system of centers, 225, 226, 232
 system of contexts, 227, 232
 system, 232, 290; see also RM-ODP
 systems theory, 223, 232, 271

T

temporal logic, 161
 theory morphism, 20, 23
 topology, 19
 topos, 33
 trace, 62 ff.
 traceability table, 295
 trajectories, 22, 23
 transaction accounting entries, 149 ff.
 transformational reuse, 1, 2, 5-13

transposition, 77, 80

U

UML, 18, 45 ff., 75, 161, 195 ff.,
 237 ff., 287
 UML, meta-model for, 123
 UML, semantics of, 123, 307
 UML-RT, 75 ff.
 understandability, 144 ff.; see also
 abstraction, RM-ODP
 Unified Modeling Language, see UML
 uniform commercial code, 271, 275
 universal (notation), 239, 241
 use cases, 222, 237 ff., 241-245, 298

V

value ladder, 20, 21
 value for customers, 223, 231
 variant, 143-144
 visibility rules, 198
 visual modeling, 27
 visualization, 39

W

war of attrition, 271 ff.
 well-formedness, 52
 weltanschauung, 20
 Wolfram, Stephen, 190-191
 workflow, 229, 231
