

---

## SUBJECT INDEX

- adaptive
  - control, 210
  - genetic programming, 255
  - prediction, 210
  - systems, 209
- approximate reasoning, 4
- artificial neural networks, 11
  
- backpropagation, 13, 140
- biological neural networks, 9
  
- chaos, 218, 222
- cluster
  - analysis, 164
  - merging, 98
  - validity, 95
- cooperative systems, 24
  
- data
  - analysis, 133, 191
  - cleaning, 142
  - preprocessing, 147
  - driven identification, 161
- dynamic processes, 232
  
- EP. *See* evolutionary programming
- ES. *See* evolution strategies
- evolution strategies, 18
- evolutionary
  - computation, 17, 174
  - programming, 18
- extended fuzzy  $\delta$  rules, 62, 68
  
- feedback neural network, 11
- feedforward neural network, 11, 13
- filtering, 340
- FS. *See* fuzzy systems
  
- fuzzy
  - clustering, 93, 197
  - c-means algorithm, 170
  - control, 4
  - $\delta$  rules, 62
  - integrals, 182
  - logic, 4, 189, 205
  - measures, 4, 182
  - modeling, 92
  - models, 7, 91, 92, 284
  - neural network, 37, 77, 210
  - neuron, 77
  - partitions, 168
  - reasoning, 4, 8, 37
  - relation equations, 59
  - rules, 5, 110, 210
  - sets, 4
  - systems, 4, 35, 59, 286
  
- GA. *See* genetic algorithm
- GA operation:
  - crossover 22, 261, 317
  - mutation, 23, 264, 317
  - selection 21, 261, 318
- genetic algorithms, 17, 311
- genetic programming, 18, 256, 267
- GP. *See* genetic programming
  
- identification, 44
- industrial processes, 232
- intelligent
  - data analysis, 133
  - systems, 228
  
- local linear model trees, 290
- locally recurrent neural networks, 231, 234

- membership functions, 110
- neo-fuzzy-neuron, 332
- neural network, 9, 35, 59, 133, 199, 203, 232
- neurofuzzy, 36, 283
- neurofuzzy learning algorithm, 115
- neuro-fuzzy-chaos, 209
- NN. *See* neural network
- noisy signals, 340, 346
- nonlinear
  - function approximation, 41
  - functions, 109
  - system identification, 283
- nuclear power stations, 320
- optimal control, 324
- prior knowledge, 289
- process
  - analysis, 189
  - industry, 190
- RBF (radial basis functions), 340
  - filter, 341
  - network, 340
- redundancy, 94
- rubber industry, 201
- rule base simplification, 101
- self-organising neural networks, 140
- signal
  - filtering, 331, 340
  - prediction, 331
  - processing, 331
  - restoration, 331, 332
- similarity, 91
- soft computing, 331
- steel industry, 194
- system identification, 255
- time series, 215, 222
  - prediction, 48
- water supply system, 324
