

## SUBJECT INDEX

## Subject Index

- Aacuram, see Cepyrarn  
Aateck, see Triaram  
ACD 7029 11  
Aldicarb 14, 23, 38, 55, 56  
— hydrolysis 59—62  
— hydroxylation 56, 57, 62  
— metabolism and degradation pathway 21, 22, 42, 46—50  
— oxidation 62  
— photodecomposition 65  
— synthesis 13  
Aldrin in Norway 96  
Alfalfa 51, 61, 62  
Alkylphenyl and alkoxyphenyl methylcarbamates (see also specific compounds) 4, 8, 9  
Amer. Cyan. 38906 14  
Aminocarb 10, 32, 42, 46, 56  
— hydrolysis 55, 59, 60  
— metabolism and degradation pathway 34—36  
— photodecomposition 65—67  
Aminophenyl methylcarbamates (see also specific compounds) 4, 10  
Amitrole 94, 96  
— degradation 68  
Amobam 19, 53  
Antracol 53  
Apples 116  
Atrazine 94  
Avadex, see Triallate  
Azar 8  
Azinphosmethyl 93, 94  
Azobenzene 94
- BAL 132  
Banol 8  
Barban 16  
— glucuronide 62  
— hydrolysis 61, 63  
— metabolism 50  
Barley 63, 116, 117, 139  
Bayer 32651 11  
Bayer 39731 and 41637 8  
Bayer 42696 and 50282 10  
Bayer 62863 12
- Baygon, see Propoxur  
BCPC 16  
Beans 63  
Beer 117  
Benomyl 19  
Benzodepa 15  
Betanal, see Phenmedifam  
BIBC, see Chlorbugam  
Binapacryl 94, 96  
Bird repellents 2  
Birds (see also specific kinds) 98, 99, 116 ff., 123  
Boots RD 12473 12  
Boots RE 17955 11  
Borates 94, 96  
BP 2, 4, 8, and 11, p. 16  
Broccoli 35, 60, 63, 68  
Bromacil 94, 96  
Bromophos 94  
Burbot 122  
Butacarb 8  
Butoxyphenyl *N*-methylcarbamate 9  
Butter in Norway 98  
Bux 8  
Buzzards 117, 118
- C 140 6  
C 8353, 10015, and 13963 11  
Cabbages 98  
Calabar bean 4  
Calcium arsenite 94  
Calcium cyanamide 94  
Calcium cyanate 94  
Captafol 94, 96  
Captan 94, 96  
Carbamates and cholinesterase 17 ff.  
— and light 64 ff.  
— and pH effects 69—70  
— and temperature 68, 69  
— basic structures 5  
— chemistry (see also specific compounds) 1 ff., 85 ff.  
— conjugate formation (see also specific compounds) 57, 58, 62—64  
— degradation (see also specific compounds) 1 ff., 85 ff.

- Carbamates detection of degradation pathways (see also specific compounds) 21 ff.  
 — environment and metabolism 64 ff.  
 — hydrolysis (see also specific compounds) 54 ff., 88, 89  
 — hydroxylation and dealkylation (see also specific compounds) 56, 57, 89  
 — metabolism (see also specific compounds) 1 ff., 58 ff., 64 ff., 85 ff.  
 — mode of action (see also specific compounds) 17 ff.  
 — naturally occurring 4  
 — nomenclature 3 ff.  
 — oxidation 89  
 — principles of degradation 54 ff.  
 — quantitative metabolism 58  
 — selectivity 2  
 — synthesis (see also specific compounds) 5 ff.
- Carbaminates, see Carbamates  
 Carbamoylation 17, 22 ff.  
 Carbaryl 7, 12, 29, 51, 58, 60, 63  
 — and pH 70  
 — and soil microorganisms 87, 88  
 — and temperature 68  
 — conjugation 57, 59, 62, 63  
 — epoxidation 57  
 — glucuronide 62  
 — hydrolysis 59, 61, 66—68  
 — hydroxylation 58, 62, 88  
 — in Norway 97  
 — in sea water (see also Naphthol) 68  
 — metabolism and degradation pathway 38—46, 87, 88  
 — photodecomposition 65, 66  
 — ring cleavage 57  
 — synthesis 13
- Carbofuran 12, 61  
 — hydrolysis 59—61  
 — hydroxylation 62  
 — metabolism and degradation pathway 38—42  
 — photodecomposition 66
- Carboxin 94  
 Carvacryl *N*-methylcarbamate 8  
 CDEC 19, 21  
 — metabolism 53  
 — photodecomposition 67
- CEPC 16  
 Cepyram 19  
 Chinomethionate 95, 96  
 Chlorbupham 16  
 Chlorfenvinphos 94  
 Chlorophenyl *N*-methylcarbamate, metabolism 88
- Chloropropylate 94  
 Chloroxuron 94  
 Chloroxylyl *N*-methylcarbamates 8  
 Chlorpropham 16, 21, 94  
 — glucuronide 62  
 — hydrolysis 61  
 — metabolism 50, 51  
 — photodecomposition 65  
 Chlorthiamide 94, 96  
 Chlorxylam 8  
 — conjugates 62, 64  
 — glucuronide 62  
 — hydrolysis 55, 59, 60  
 — hydroxylation 56, 57, 62  
 — metabolism and degradation pathway 25, 28—30  
 Cholinesterase 17 ff., 22 ff., 58, 66, 87  
 CIBA 9643 11  
 CIPC, see Chlorpropham  
 Clams 123  
 Cod 123  
 Conjugation of carbamates (see also specific compounds) 57, 58  
 Copper oxychloride 94, 96  
 Corn 21, 87  
 CPA 94, 96  
 CPMC 9, 88  
 — hydrolysis 88  
 CPPC 16  
 Crabs 122, 123  
 Crayfish 121, 122  
 Crimidine 94, 96  
 Crotylphenyl *N*-methylcarbamate 8  
 Cuprame 18  
 Cycloheximide 94, 96  
 Cyclopentylxyphenyl *N*-methylcarbamate 9
- 2,4-D 94, 96  
 Dalapon 94  
 DDD, see TDE  
 DDE 98, 99  
 DD-mixture 95, 96  
 DDT 2, 91, 95, 98  
 — in Norway 96, 97  
 — vapor pressure 105  
 Demeton 95  
 Derris 95  
 Desmetryne 95  
 Diellate, metabolism 51  
 Diazinon 95  
 Dicamba 95  
 Dichlobenil 95  
 Dichlofluanide 95, 96  
 Dichloprop 95, 96  
 Dichlorvos 95

- Dicolfol 95  
 Dicrotophos 25, 31  
 Dieldrin 98  
   — in birds 99  
   — in Norway 96  
 Dimetan 7, 24, 95  
 Dimethoate 95  
 Dimethoxyphenyl *N*-methylcarbamate 9  
 Dimethylaminoisopropylmethylphenyl  
   *N*-methylcarbamate 10  
 Dimethylaminoxylyl *N*-acetyl-*N*-methyl-  
   carbamate 11  
 Dimethyl carbamates (see also specific  
   compounds) 4, 6, 7  
   — synthesis 5 ff.  
 Dimethylphenyl *N*-methylcarbamate 8  
 Dimetilan 7, 31  
   — demethylation 56  
   — hydrolysis 55  
   — hydroxylation 62  
   — metabolism and degradation pathway  
     24—26  
   — photodecomposition 65  
 Dinobuton 95  
 Dinocap 95, 96  
 Dinoseb 95, 96  
 Dioxins in Norway 97  
 Dioxolanylphenyl methylcarbamates (see  
   also specific compounds) 4, 11  
 Diquat 95, 96  
 Diram A 18  
 Dithane 19  
 Dithiocarbamates (see also specific  
   compounds) 3, 4, 18, 19  
   — metabolism 51 ff.  
   — synthesis 14  
 Dithiolanylphenyl methylcarbamates (see  
   also specific compounds) 4, 11  
 DNOC 95, 96  
 Dodine 95, 96  
 Dogfish 99
- Eagles 117  
 Eelpout 124  
 Eels 121  
 Eggs 98, 116—119, 123, 125, 139  
 Egypt, Act 50 167  
   — Agricultural Pesticide Act 165  
   — classes of pesticides 167, 169  
   — Kedivial Act 165  
   — marketing and sale of pesticides  
     167—169  
   — Pesticide Board 165 ff.  
   — pesticide importation control 166, 168  
   — pesticide imports 164  
   — pesticide packaging requirements 169
- Egypt pesticide registration 167, 168  
   — production of pesticides 164, 165  
   — Republican Acts 165  
   — residue regulation 164 ff.  
   — Royal Acts 165  
   — tolerances 167  
   — toxicological requirements 169  
 Endosulfan 95  
 Environment and carbamate metabolism  
   64 ff.  
 EP 474 16  
 Eptam, see EPTC  
 EPTC 18  
   — hydrolysis 61  
   — metabolism 51  
   — synthesis 17  
 Eserin 4  
 Ethoxyphenyl *N*-methylcarbamate 9  
 Ethylenebisdithiocarbamic acid 3  
 Ethylmercury, toxicity 128
- Falcons 117  
 Feathers 123  
 Fenitrothion 95  
 Fenson 95  
 Fenthion 95  
 Ferbam 18, 20, 95  
   — and soil pH 69  
 Finches 117  
 Fish (see also specific kinds) 99, 108, 109,  
   116—127, 130, 135—137, 139, 140, 143  
   — *per capita* consumption 140  
 Flounders 123  
 Flour 110, 111, 129  
 Folpet 95, 96  
 Formamidines 10  
 Formetanate, conjugates 86, 87  
   — hydrolysis 87, 88  
   — metabolism 86—88  
 Fructosyl-penta(*N*-methylcarbamate) 15  
 Furan, see Carbofuran
- G 33 19  
 Geigy 13798 12  
 Goldeye 124  
 Goshawks 118  
 Grebes 123  
 GS-15171, -15195, and -15206 6
- Hawks 117  
 Hay 98  
 Hercules 7522 8  
 Hercules 8717, 9200, 9326, 9485, 9699, and  
   9907 9  
 Hercules AC-5727 8  
 Herring 122, 123

- HRS 1422 8, 35, 46, 57  
 — hydrolysis 55, 60  
 — metabolism and degradation pathway 25, 27, 28, 31  
 HRS 1667 9  
 Human fat 99  
 Hydrogen phosphide, see Phostoxin  
 Hydrol 10, 34
- Ioxynil 94, 97  
 IPC, see Propham  
 Isolan 6, 56  
 — demethylation 56  
 — hydrolysis 55, 60  
 — metabolism and degradation pathway 24, 25, 27  
 — photodecomposition 65, 66  
 — synthesis 7  
 Isopropylphenyl *N,N*-dimethylcarbamate 6
- Landrin 8  
 — hydrolysis 86  
 — hydroxylation 86, 89  
 — metabolism 86, 88, 89  
 — oxidation 89  
 — photodecomposition 86  
 Lannate, see Methomyl  
 Lebaycide, photodecomposition 65  
 Lenacil 94  
 Lindane 94  
 — in birds 99  
 — in Norway 96  
 Linuron 94  
 Lobsters 123
- Malathion 94  
 Manam 19  
 Mancozeb 94  
 Maneb 19, 94  
 — and oxygen 70  
 — and soil pH 69  
 — and temperature 68, 69  
 — metabolism 53  
 Manoc 19  
 Matacil, see Aminocarb  
 MCA-600, see Mobam  
 MCPA 94, 96  
 Mecoprop 94, 96  
 Meobal 8  
 Merbam 19  
 Mercaptodimethur 11, 42, 56, 57, 94  
 — conjugates 88  
 — hydrolysis 55, 59, 60  
 — in Norway 97  
 — metabolism and degradation pathway 37, 38, 88, 89
- Mercaptodimethur oxidation 62, 89  
 — photodecomposition 65  
 Mercaptophenyl methylcarbamates (see also specific compounds) 4, 11  
 Mercury absorption through skin 139  
 — abundance 111 ff.  
 — analytical methods 108—111, 126, 142  
 — and brain injury 131, 132, 134, 138, 139  
 — and chlor-alkali plants 106, 107  
 — and chromosome effects 131, 132  
 — and compounds, toxicity 104, 127 ff.  
 — and genetic effects 131, 132  
 — and hatters 128  
 — and municipal wastes 143  
 — and smog 113  
 — as seed-dressing 117  
 — background levels 105 ff., 113, 115, 116, 119, 135, 142  
 — biological magnification 115 ff., 127  
 — compounds, bans 125  
 — compounds in Norway 97  
 — compounds, microbial degradation 126  
 — compounds, toxicities 127 ff.  
 — consumption in Canada 122  
 — consumption in U.S.A. 106, 108  
 — cosmic abundance 112  
 — distribution 105 ff.  
 — excretion 139, 143  
 — from natural sources 104 ff., 112, 113  
 — history of use 104  
 — in agriculture 106, 116, 119, 144  
 — in air 113 ff., 139, 144  
 — in algae 116  
 — in animal tissues 116—118, 125, 129, 139  
 — in apples 116  
 — in barley 116, 117, 139  
 — in beer 117  
 — in biosphere 115 ff.  
 — in birds (see also specific birds) 107, 116 ff., 123  
 — in blood 130, 131, 143  
 — in brain tissue 134, 138, 139  
 — in brine 112  
 — in burbot 122  
 — in buzzards 117, 118  
 — in chimney soot 112  
 — in clams 123  
 — in cod 123  
 — in crabs 122, 123  
 — in crayfish 121, 122  
 — in dentistry 106, 114, 139, 143  
 — in eagles 117  
 — in eelpout 124  
 — in eels 121

- Mercury in eggs 116—119, 123, 125, 139
- in environment 97, 103 ff.
  - in falcons 117
  - in feathers 118, 123
  - in finches 117
  - in fish (see also specific fish) 104, 108, 109, 116—127, 130, 135—137, 139, 140, 143
  - in flounders 123
  - in foods, increase with time 108, 116, 117
  - in fossil fuels 112, 142
  - in goldeye 124
  - in goshawks 118
  - in grains (see also specific grains) 117
  - in grebes 123
  - in hair 126, 130, 133—138
  - in hawks 117
  - in herring 122, 123
  - in lobsters 123
  - in meat (see also specific kinds) 116—118, 125, 129, 139
  - in milk 117
  - in oats 139
  - in ospreys 123
  - in owls 117
  - in oysters 123
  - in paint 106, 114, 143
  - in partridges 117, 118
  - in perch 120, 122, 124
  - in petroleum 112, 142
  - in pheasants 110, 117, 118
  - in pigeons 117, 118
  - in pike 119—122, 124, 136
  - in pork 129
  - in potatoes 116
  - in rain water 106, 115
  - in rice 116, 137—139, 141
  - in rocks and soil 111 ff., 116, 117, 120, 142, 143
  - in salmon 127
  - in sauger 124
  - in sea-eagles 123
  - in sea water 104, 112, 115, 119
  - in seeds 116
  - in shellfish (see also specific kinds) 121, 122, 126, 130
  - in swordfish 119, 123, 143
  - in tomatoes 116
  - in total diet studies 141
  - in trout 120, 122, 125, 127
  - in tuna 119, 123, 143
  - in walleye 120, 122
  - in water (see also Rainwater, Sea water) 106, 115, 117, 120, 124, 142, 143
- Mercury in water lily 124
- in whales 123
  - in wheat and flour 110, 111, 116, 117, 129, 139
  - maximum allowable concentration in air 114
  - maximum allowable residue in fish 119, 121
  - normal levels in organs and tissues 135 ff.
  - poisoning 104, 107, 113, 114, 121, 125 ff., 130 ff., 143
  - poisoning, biochemical basis 130
  - poisoning, genetic effects 131
  - poisoning, symptoms 127 ff.
  - poisoning, therapy 132 ff., 143
  - properties 105
  - reduction in agricultural uses 116
  - residues, loss from cooking 126
  - restrictions in use 107
  - tolerances 121, 139—141
  - toxic level in brain 134, 138, 139
  - translocation 117
  - uses 104 ff.

 Physostigmine 4  
 Pigeons 117, 118  
 Pike 99, 116, 119—122, 124, 136  
 Polychlorobiphenyls, see PCB's  
 Pork 129  
 Potassium cyanate 96  
 Potatoes 63, 91, 116  
 Promecarb 8  
 Prometryne 95  
 Propachlor 95, 96  
 Propanil 95, 96  
 Propbam 16, 20, 21, 54  
 — hydrolysis 60  
 — metabolism 50  
 — photodecomposition 65  
 — synthesis 14  
 Propinylphenyl *N*-methylcarbamate 9

- Propoxur 9, 56, 57  
 — hydrolysis 55, 59, 60  
 — hydroxylation and demethylation 56, 61, 62, 87  
 — metabolism and degradation pathway 29, 31—33, 87  
 — photodecomposition 65  
 — synthesis 13  
 Propylphenyl *N*-methylcarbamate 8  
 Pumpkins 63  
 Pyramat 7  
 — hydrolysis 60  
 — hydroxylation and demethylation 61, 62  
 — metabolism and degradation pathway 24, 25, 28  
 Pyrazon 95, 96  
 Pyrethrins 95  
 Pyrolan 6  
 — metabolism 24, 25  
 — photodecomposition 65, 66  
  
 Quinomethionate 95, 96  
 Quintozen 95  
  
 Rainwater 106, 115  
 RD 14838 11  
 RE 5030 and 5305 8  
 Rice 51, 63, 116, 137—139, 141  
  
 Salmon 127  
 Sankel 933 18  
 Sauger 124  
 SD 8530, see Landrin  
 Sea-eagles 123  
 Sea water 64, 66—68, 70, 104, 112, 115, 119  
 Sevin, see Carbaryl  
 Shellfish (see also specific kinds) 122, 126, 130  
 Simazine 95  
 Smog 113  
 Sodium chlorate 95—97  
 Soybeans 21  
 Starlings 99  
 Stauffer R-1870, -1910, and -2060 18  
 Stauffer R-2063 18  
 Stauffer R-2964, -2967, -3422, -5976, -5977, and -6032 15  
 Stauffer R-3244 7  
 Sulfotep 95  
 Sulfur 95, 96  
 Sulfurpentafluorophenyl *N*-methylcarbamate 9  
 Swep 16  
 — binding to lignin 35, 51, 57, 63  
 — hydrolysis 61  
 Swep metabolism 50, 51  
 Swordfish 119, 123, 143  
  
 2,4,5-T 95—97  
 Tar oils 95  
 TCA 95  
 TDE 98  
 Tecnazene 95  
 Temik, see Aldicarb  
 Terbutol 8  
 Tetradifon 95  
 Thiola 132  
 Thiolcarbamates (see also specific compounds) 4, 18  
 — metabolism 51  
 — synthesis 17  
 Thiolcarbamic acid 3  
 Thiram 19, 20, 95  
 — and soil pH 69  
 — synthesis 14  
 Tillam, see Pebulate  
 TMTD, see Thiram  
 Tobacco 63  
 Tokisamoto 11  
 — metabolism 37  
 Tolerances 98, 139—141, 167  
 Tomatoes 51, 116  
 Triallate 18, 95  
 Triaram 19  
 Trichloronate 95  
 Trimethylphenyl *N*-methylcarbamate 8  
 Trout 120, 122, 125, 127  
 Tsumacide 8  
 Tuna 119, 123, 143  
  
 UC 8484 2  
 UC 9557 9  
 UC 10854 35, 46, 57  
 — hydrolysis 55, 56, 60  
 — hydroxylation 62  
 — metabolism and degradation pathway 25, 27—29, 32  
 — photodecomposition 27, 65  
 UC 20047 14  
 UC 25074 10  
 Uden, see Propoxur  
 Upjohn U 22241 8  
 Urbazid 18  
 Urethanes 3  
  
 Vancide, see NaDDT  
 Vapam 18, 54  
 — and soil pH 69  
 — metabolism 52, 53  
 — synthesis 14  
 Vegadex, see CDEC

- Vegadex photodecomposition 65  
— synthesis 14  
Vernam, see Vernolate  
Vernolate 18  
Walleye 120, 122  
Water (see also Rainwater, Sea water) 115,  
117, 120, 124, 142, 143  
Water lily 124  
Whales 123  
Wheat (see also Flour) 110, 111, 116, 117,  
139  
Zectran 10, 20, 32, 46, 51, 56  
— and pH 70  
Zectran binding to lignin 35, 57, 63  
— glucuronide 62  
— hydrolysis 55, 59, 60  
— hydroxylation 62  
— metabolism 34, 35  
— photodecomposition 65—68  
— synthesis 13  
Zineb 19, 95  
— and humidity 64, 70  
— and soil pH 69, 70  
— and temperature 64  
— metabolism 53, 54  
Zinoc 19  
Ziram 18, 95
