

Index

- Addition of matrices, 30
 - of vectors, 7
- adjoint matrix, 64
- associative law, 7, 32
- augmented matrix, 46
- Basis, 11
- Cofactor, 58
- column(-vector), 14
- commutative law, 7
- complete solution, 2
- components of a vector, 6
- consistent system, 47
- coordinates of a vector, 6
- Cramer's Rule, 66
- Dependence, linear, 9
- determinant, 54f., 58
- diagonal matrix, 62
- dimension, 6
- disposable unknowns, 44
- distributive laws, 7, 32
- Elementary operations, 16
- elements of a matrix, 27
- equivalent systems, 16
- even permutation, 56
- Homogeneous system, 38
- Independence, linear, 9
- induction, 18
- interchange, 55
- inverse matrix, 40
- Kronecker, 57, 67
- Linear, 28
 - combination, 8
- linearly dependent, independent, 9
- Main diagonal, 63
- matrix, 27
 - minor, 62, 69
- Odd permutation, 56
- order of a regular system, 15
 - of a square matrix, 28
- Permutation, 55
- pivot, pivotal condensation, 64
- principle of superposition, 51
- Rank of a matrix or system,
 - 42
- regular matrix, 39
 - system, 15
- row-vector, 34
- Scalar, 6
- scheme of coefficients (notation),
 - 19
- singular matrix, system, 40
- solution, 2
- space, 8
- span, 11
- square matrix, 28
- subspace, 26
- Transpose, 35
- triangular form, 21, 70
- trivial, 9, 15
- Unique solution, 2
- unit-matrix, 33
- Vector, 6
 - product, 71
 - space, 8
- Zero-matrix, 30
- zero-vector, 7

LIBRARY OF MATHEMATICS

Edited by W. Ledermann

Linear Equations	P. M. Cohn
Sequences and Series	J. A. Green
Differential Calculus	P. J. Hilton
Elementary Differential Equations and Operators	G. E. H. Reuter
Partial Derivatives	P. J. Hilton
Complex Numbers	W. Ledermann
Principles of Mechanics	M. B. Glauert
Vibrating Strings	D. R. Bland
Vibrating Systems	R. F. Chisnell
