

Index

- Abbe's condition 251, 265
- Aberrations 262–267
- Absolute permeability 5
- Absolute permittivity 4
- Active array module 367, 418–421
- Active reflection coefficient 369, 388–393
- Airy diffraction function 276
- Anechoic chambers 604–608
- Angular spectrum 94, 97
- Anisotropic surface admittance 232, 234–235
- Antenna temperature 151
- Aperture angle 248–249
- Aperture antennas 87–101
- Aperture radiation 55–59, 170
- Aplanetism 265
- AR method 559–560
- ARMA model 559
- Arrays 143
 - active 145, 366–368
 - adaptive 363, 570–589
 - circular 425–433, 440–446
 - conformal 433–434
 - frequency-scanned 400–402
 - linear 366, 378–385, 440–446
 - minimum redundancy 561–563
 - multiplicative 545–548
 - planar 364
 - random 434
 - sparse 434
- Array calibration 424
- Array factor 378–379
- Arsac, J. 561
- Astigmatism 209–211, 264
- Atmospheric noise 150
- Attenuation 13–14
- Automatic gain control (AGC) 336
- Axial field 271–272
- Bayes' formula
- Beacon tracking 349
- Beamforming matrices 402–417
 - Blass matrix 411–414
 - Butler matrix 408–410, 428
 - Rotman lens 415–417
- Beamwidth 140, 382
- Beam cophasal excitation 425–426
- Beam waveguides 286
- Bernstein's theorem 505
- Bessel function 111
- Bienvu, G. 564
- Bistatic radar 78–79
- Black body 80
- Blind angle phenomenon 388–393
- Blockage 260–261, 312–316
- Bouguer's law 164–166
- Brillouin diagram 233
- Cassegrain antenna 142, 251, 298–316, 361–362
- Caustic surface 209–211
- Chaff cloud 490–492
- Characteristic function 177
- Circular aperture 59, 68–69, 89, 182–186
- Circular polarization 66, 146, 208, 323
- Circular polarized printed antennas 136–137
- Coherence function 549
 - of the Sun 598–599
- Coherence matrix 322, 469–471
- Coma 265
- Compact ranges 608–610
- Complex notation 2–3
- Conditions for incoherence 544–545
- Conducting media 4, 6–8
- Conductivity 6

- Conical scanning 146, 317, 324–332, 348
- Coplanar line 121
- Corporate feed 373
- Correlogram 555
- Corrugated waveguide 234
- Cosecant-squared pattern 147, 203–204
- Cosmic noise 150
- Covariance matrix 553
- Crossed dipoles 66
- Cross polarization 351
- Cross polarization loss coefficient 254

- Davies beamformer 563
- Decision theory 543
- Delay lines 364
- Dielectric constant 4
- Dielectric media 4
- Difference pattern 333
- Diffraction pattern 207, 270, 275
- Digital beamforming 422–424
- Dipole 101–107
 - Half-wave 101–103, 114
 - Hertzian 102
- Direction finding 431
- Directivity 59–60, 140
- Disk feed network 376
- Distortion 263
- Doppler weather radar 244
- Droitwich 87
- Dunbar's method 353

- Effective area 75–77
- Electric dipole 36, 52–54, 66, 101–107
- Electromagnetic potentials 4, 21
- Elementary dipole 36, 52–55, 63
- Elliptical polarization 456
- Energy volume densities 10
- Entropy and probability 590–596
- Equivalent aperture method 170, 249
- Equivalent focal length 349

- Equivalent primary feed 301–302
- ESPRIT algorithm 567
- ESTEC 609
- Extrapolation method 602

- Fabrication accuracy 150
- Factor of merit 202
- False echoes 522
- Far field 33–37, 46–52, 194
- Far-field ranges 604
- Fermat's principle 159
- Fluctuating radar echoes 319
- Focal plane 91
- Focal length 248–249
- Focused synthetic aperture 535
- Fourier, Jean Baptiste Joseph 25
- Fourier Transform, 2-D 26–28, 44
- Frequency-scanned arrays 400–402
- Frequency-scanning synthetic antenna 537
- Fresnel integral 95
- Fresnel region 194, 237
- Friis transmission formula 77, 601
- Fully polarized waves 455–467

- Gain 60–62, 76, 140, 196–199, 203–204, 206, 222–223
- Gaussian illumination taper 256, 286
- Geometrical optics 141, 157–161
- Gibbs' phenomenon 509
- Glint 320
- Goubeau's waves 286–287
- Grating lobes 382, 383–384
- Green's functions 38–41
- Green's identity 38–41
- Gregorian antenna 298
- G/T ratio 620

- Hankel transform 274
- Helical antennas 112
- Helmholtz equations 6, 28, 124
- Hertz, Heinrich 46
- Hertzian dipole 102
- High resolution imagery 554

- Horns
 - astigmatic 242–243
 - conical 224
 - corrugated 223, 229–240
 - dual-mode 228–229
 - E-plane sectoral 96–99
 - H-plane sectoral 93–96
 - flared 225
 - monomode 223
 - multimode 223, 226–229
 - pyramidal 99–101, 115
 - rectangular 92–101
 - small flare angles 224
- Howells-Applebaum correlation loop 574–578
- Huygens-Fresnel integral 155–157, 200
- Huygens source 88, 189–190, 212, 350
- Huygens coordinates 191–193
- Hybrid modes 216, 220, 229–240, 270
