

# Index

## A

- Application structure creation
  - App.razor component code, 39
  - article manager, 38
  - execution result, 42
  - index.html file, 40
  - project structure, 40–41
  - Razor file, 39
- ASP.NET Web Forms, 2
- Azure web app, 96

## B

- Blazor server application
  - app.UseStaticFiles()
    - method, 13
  - client downloads, 20
  - component, 12
  - countdown code, 13
  - creation, 7
  - definition, 2
  - deployment (*see* Deployment process)
  - DotNetAnywhere, 8
  - download option, 9
  - endpoint.MapBlazorHub()
    - method, 12

- EventSource object, 21
- GitHub repo, 9
- InvokeAsync() method, 15
- long polling communication, 21
- .NET Core 3.1 web project, 10
- RenderComponentAsync()
  - method, 13
- roadmap, 8
- server result, 15, 16
- server-sent result, 21
- startCountdown() method, 14
- startup configuration, 11
- StateHasChanged() method, 15
- WebSocket, 21

Bootstrap modal, 67, 73, 76

## C

- Code nightmares, 3–5
- Component library
  - ArticleCategories page, 77
  - class definition, 75
  - components and models
    - folders, 75
  - Razor class library, 74
  - row creation, 76
  - table headers, 75

## INDEX

### Countdown application

- BlazorHub WebSocket, 22
- server app (*see* Blazor server application)

### WebAssembly

- countdown.csproj file, 24
- CreateHostBuilder()
  - method, 25
- index.html File, 26
- network tab, 27
- project template
  - installation, 23–24
  - web application, 24

- working process, 19–23

### CRUD operations, 52

- article categories, 52–54
- categories, 52
- dependency service, 62
- in-memory implementation, 60–63

- list component, 54

- page component, 53

### service creation

- add category button, 59
- article categories page, 59
- article category, 60
- ConfigureServices()
  - method, 56
- definition interface, 55
- page component, 56
- physical operations, 55
- ShowList() method, 59
- validation rules
  - definition, 57

## D

- Data transfer objects (DTOs), 7

### Deployment process

#### Server app

- Azure web app, 96
- creation panel, 94
- HTTP request-Kestrel, 92
- in-process/out-of-process
  - hosting models, 92
- publish menu, 94, 95
- SignalR, 91
- sticky sessions, 93
- Web sockets option, 94

- scalability, 91

- WebAssembly app, 97–99

### Desktop application

- development, 1

- DotNetAnywhere, 8

- DTOs<sup>7</sup>, *see* Data transfer objects (DTOs)

## E, F

- ECMAScript 6 (ES6), 5

## G, H

- Generic component, 80–83

## I

### Input components

- base class definition, 85
- FieldInputBase class, 86

- FieldSelectInput class, 88
- generic implementation, 87
- input text definition, 84
- source code, 85
- TryParseValueFromString
  - method, 84
- UI library/reuse, 83

## J, K, L, M, N, O

### JavaScript

- ASP.NET Web Forms, 2
- code nightmares, 3–5
- frameworks, 6
- jQuery library, 3
- TypeScript, 5, 6

JavaScript function, 66–70

## P, Q

### Page navigation

- Article.razor file, 48
- layout component markup, 49
- page folder, 47–48
- results of, 51
- router component markup, 50

## R

Release-to-manufacturing  
(RTM), 7

Reusable library, 73

- component (*See* Component library)

- generic components,
  - 73, 80–83
- input components, 83–88
- templated components,
  - 78–80

Rich Internet Application  
(RIA), 2

RTM, *see* Release-to-manufacturing  
(RTM)

## S

Scalability, 91, 98

Server-side application, 1

Server *vs.* WebAssembly

- countdown application (*see* Countdown application)
- differences, 30, 31
- functional/nonfunctional requirements, 19

.NET Core 3, 8

WebAssembly, 28–30

Silverlight, 1

Single-page application, 33

- application structure (*see* Application structure creation)
- components, 33
  - business application structure, 34
  - characteristics, 35
  - component code, 64–66
  - customization, 36
  - independent, 37

## INDEX

Single-page application (*cont.*)  
    logic creation, 38  
    reusing, 37, 38  
    single responsibility  
        principle, 36  
    size of, 35  
    tree of, 35  
CRUD (*see* CRUD operations)  
JavaScript function, 66–70  
main menu component  
    app component, 44  
    markup file, 42  
    official documentation, 45  
OnInitialized  
    method, 45  
OnMenuItemClick  
    method, 46  
    result of, 46, 47  
    source code, 43  
navigation, 33  
page navigation (*see* Page navigation)

## T

Templated component  
    creation, 78–80  
Transpile, 6  
TypeScript, 5, 6

## U, V

User interface, 1

## W, X, Y, Z

WebAssembly  
    browser support, 30  
    definition, 28  
    deployment process, 97–99  
    JavaScript runtime, 28, 29  
    .NET Core 3, 9  
    Server (*see* Server *vs.* WebAssembly)  
Windows Communication  
    Foundation (WCF), 2
