

INDEX

A

- Aberrations, copy number67, 77
- Acetyltransferases, histone.....95, 291, 319, 381, 390
- Acrylamide18, 21, 24, 31, 227, 253, 309, 321, 352, 354, 393
- Albumin, Bovine Serum 3, 6, 7, 13, 18, 19, 45, 49, 72, 73, 100, 101, 112, 118, 128, 233, 235, 236, 239, 250, 263, 278, 283, 309, 323, 329, 340, 342, 359, 365, 367, 380, 381, 403, 431, 436, 437, 451, 456, 461, 466
- Amplification, whole genome..... 153, 448, 449, 455, 464, 465, 467
- Analysis
 - genomewide.....448
 - HMMTiling.....477–479
- Antibody(ies)
 - fluorescein conjugated45
 - fluorescein isothiocyanate conjugated.....45
- Application
 - Biotique Systems XRAY for ChiP-ChIP482–483
 - CisGenome 480–482, 484, 486
 - Cistrome analysis pipeline484
 - Genomatix ChiPMiner483
 - Partek Genomics Suite482
 - R/bioconductor analysis packages.....483–484
 - TileMap479–482
 - Telescope481
 - TiMAT.....480
- Arrays
 - nucleosomal9
 - promoter.....449, 455
- Assay
 - ATM kinase.....322, 326–327
 - chromatin transcription377, 391, 393
 - comet.....363, 364, 366
 - FISH-comet.....364
 - histone deacetylase
 - fluorescent.....104–106
 - radioactive.....96, 97, 103–104
 - histone demethylase.....109–119
 - histone methylation109, 114–115
 - histone transfer376, 377, 380, 381, 387–388, 391
 - Infinium methylation.....145, 147–150, 186
 - replication restart323, 329–330
 - supercoiling.....388, 389, 393
 - telomerase activity305–315
 - telomere length.....305–315

- template relaxation380, 388
- in vitro replication349–361
- in vitro transcription381, 390–391
- Assembly
 - chromatin2, 3, 7, 9, 12, 252, 269–270, 277, 381, 388–389, 391, 393
 - histone octamer30–31
- Autophosphorylation.....318, 324, 332

B

- Baculovirus expression.....98
- BeadChip, Human Methylation450.....143–191
- Beads
 - paramagnetic2
 - Streptavidin coated1, 2
- Biodosimetry59
- Biotin-Streptavidin.....2
- Biotinylation, DNA.....5
- Block, colcemid53, 54, 57–59
- Bromide, ethidium.....4, 18, 20, 22, 49, 73, 84, 85, 130, 197, 207, 221, 222, 251, 253–255, 262, 267, 280, 323, 330, 359, 372, 388–390, 400, 401
- Buffer
 - cell lysis.....45, 97, 98, 100, 101, 127, 132, 440
 - chromatin loading 4X.....19
 - citrate, pH6.0.....233
 - DNA methyl transferase storage128
 - elution.....46, 50, 98, 102, 135, 146, 150, 152, 217, 220, 221, 227, 279, 284, 300, 322, 328, 378, 379, 382, 385, 386, 432, 435, 437, 440, 452, 455, 458
 - extract (EX).....3, 4
 - 4x SDS loading.....4, 9, 13, 111, 114, 117, 248, 380, 384, 390
 - HEPES69, 250
 - high salt7, 45, 378, 383, 441, 442
 - histone ubiquitination and deubiquitination
 - assay.....213–228
 - hybridization.....74, 86, 153, 314, 369, 452
 - lithium chloride46, 50
 - low salt.....7, 45, 378, 383, 441, 442
 - M-binding146, 151
 - M-desulphonation146, 152
 - MNase digestion433, 438, 465
 - NKM70, 78
 - nuclear digestion.....247

- Buffer (*cont.*)
- nuclear lysis45
 - resuspension.....137, 142, 432, 436, 437
 - RIPA lysis..... 250, 262, 320
 - RNA loading 19, 397
 - RSB70, 78
 - sample 2x 46, 50, 248, 258
 - SP619
 - telomerase activity assay.....305–315
 - 10x polymerase3, 5
 - TNN lysis250, 262
 - transcription19, 397
 - transfer.....250, 255, 263, 313, 321
 - Tris233
 - Tris acetate..... 18, 22, 221, 227, 309, 313, 397
 - Tris-EDTA (TE)..... 70, 146, 149, 163, 164, 240, 279, 323, 328, 330, 353, 354, 397, 399, 400
 - wash and binding.....3
- C**
- Calyculin A..... 54–58, 60–62
 - Cas9.....44
 - Cells, SF9 98, 101, 112
 - Chaperone, chromatin.....393
 - Chromatin
 - immunoprecipitation
 - engineered DNA binding molecule
 - mediated43–51
 - locus specific.....43–51
 - interphase53–63
 - Chromatography, gel permeation30
 - Chromosomes
 - mitotic53–63, 263, 264, 351
 - P1 artificial364
 - Column
 - Econoglass.....252, 269
 - quick spin 3, 17, 435, 462
 - Zymo-Spin™146, 151
 - Complexes, pre-replication.....349
 - Condensation, premature chromatin53–63, 330
 - Condensin II60
 - Conversion, bisulfite.....124, 125, 137, 138, 144–147, 150–153, 177, 186, 187, 195–206, 470
 - CPD. *See* Cyclobutane pyrimidine dimer (CPD)
 - CpG islands.....143, 144, 193–195, 201–205, 449
 - shelves.....144
 - shores.....144
 - CRISPR43–52
 - C/T polymorphisms.....144
 - Cyclobutane pyrimidine dimer (CPD)..... 274, 275, 282, 285, 287, 346
- D**
- Deacetylation/deacetylases, histone..... 95–107, 433, 440
 - Decondensation, chromatin.....289–302
 - Demethylation, histone113, 116
 - Detection, chemiluminescence 314, 321
 - Deubiquitinases, histone.....214–216, 225
 - Deubiquitination, histone.....213–228
 - Digestion, DNA 310, 312, 315
 - DNA
 - deaminated template 130, 135–136
 - herring sperm432, 436
 - salmon sperm..... 195, 210, 365, 369, 431, 432, 437, 461
 - Dynabeads 2, 5–6, 11, 13, 49, 278, 466
 - Dynabeads-Protein G45, 49, 420, 422, 466
 - Dynamics
 - chromatin2, 27–29
 - nucleosomes..... 27, 28, 40–41
- E**
- Electrophoresis
 - agarose 4, 12, 13, 84–85, 130, 146, 253, 280, 369, 436, 441, 468
 - alkaline 286, 365, 367
 - native polyacrylamide gel.....222
 - pulse field.....330, 333
 - SDS polyacrylamide gel..... 322, 325, 390, 416
 - Embryos, *Drosophila* 1, 3, 6–7, 13
 - End-labeling, indirect..... 274, 275, 277–278, 281–282, 285
 - Engineered DNA-binding molecule-mediated chromatin immunoprecipitation (enChIP)43–52
- F**
- Fixative, Carnoy's55, 58
 - Forster resonance energy transfer (FRET) 397, 398, 403–410
 - Fractionation, sucrose gradient247–248, 253–255
 - FRET. *See* Forster resonance energy transfer (FRET)
- G**
- Gene, ataxia-telangiectasia mutated (ATM)317–333
 - GenomeStudio 150, 170–185, 191
 - Glycol, polyethylene54
- H**
- Histones, linker 21, 215, 245, 247, 255, 256, 441
 - Hybridization
 - comparative genomic67–93
 - microarray.....468, 473
 - in situ58, 73–75, 85–87, 363–373
- I**
- Immobilization, DNA2–6, 11
 - Immunofluorescence 111, 116–118, 235, 236, 266, 271, 295–297, 299, 302, 322, 340–346

- Immunohistochemistry238–241
- Immunoprecipitation..... 44, 101, 224, 226, 275, 276, 285, 320–321, 324–325, 327–328, 415, 416, 418, 420–422, 425, 434–437, 439–443, 448, 454–455, 460, 461, 465, 466, 468
- Immunoprecipitation, chromatin..... 46, 49–50, 275, 278–279, 283, 287, 322, 327–328, 415, 429–444, 447–470, 473–487
- Index, mitotic54
- K**
- Kinase, T4 polynucleotide 18, 22
- L**
- Ligase
 histone ubiquitin..... 214, 216, 218, 225
 T4 DNA..... 18, 23, 24, 130, 135, 397, 462
- M**
- Media
 cell culture 70, 127, 132
 lymphocyte69, 76
- Methylation
 DNA..... 123–140, 143–191, 194, 204, 214, 215
 histone 109, 114–115, 214
- Methyltransferases, histone109, 112
- Mica, 1-(aminopropyl) silatrane32
- Microdissection 79, 80, 91
- Microscope, inverted phase-contrast71
- Microscopy
 atomic force 27–42, 247, 251–253, 265, 267–268, 270–271
 fluorescence 75, 87–89, 260, 322, 340, 343, 364
- Mononucleosomes
 assembly of399–402
 positioning of..... 15–25, 395
- N**
- Nuclease, micrococcal..... 4, 6, 9–10, 12–14, 20, 21, 111, 113, 114, 123, 217, 219, 226, 247, 251, 253–255, 265–268, 381, 389–390, 393, 430, 432–434, 438–439, 448, 450, 454, 465
- O**
- Oocytes, *Xenopus*..... 1, 351
- P**
- Particle, nucleosome core.....27, 28
- Phosphorylation, histone H3.....232
- Phytohemagglutinin, M form.....69
- Polymerase
 Klenow 10, 11, 18
 Phusion.....45, 47
- Taq DNA 18, 22, 30, 71, 72, 81, 82, 135, 275, 287, 309, 311, 397
- VentR DNA3
- Polymerase chain reaction
 bisulfite sequencing193–211
 degenerate oligonucleotide primed..... 68, 72, 81–82
 methylation specific.....193–211
 real-time quantitative.....275, 284
- Proteins
 chromatin associated.....2, 13, 246, 256, 376
 high mobility group245, 256
 minichromosome maintenance.....349
- Purification
 chromatin2
 core histones 7, 12, 103, 393
 histone deacetylase 2..... 97, 98, 101
- Pyrosequencing..... 145, 184, 208
- R**
- Reassembly, chromatin338
- Reconstitution, chromatin1–4, 6–10
- Repair
 nucleotide excision.....273, 274, 338, 343, 346
 transcription coupled273–287
- Response, DNA damage 109, 317–333, 337
- RNA
 guide (gRNA).....44–47, 51
 immunoprecipitation-sequencing.....415–416, 419–421, 425, 470
 long non-coding414, 415
- S**
- Saline
 phosphate buffered 18, 19, 45, 48, 71, 79, 97, 100, 102, 103, 112, 117, 118, 127, 132, 133, 138, 219, 224, 233–236, 238, 239, 242, 247–249, 251, 252, 254, 255, 257, 260–265, 267–269, 278, 283, 285, 292, 293, 295, 296, 298, 299, 302, 308–310, 312, 321–323, 325–327, 329–331, 340–343, 345, 346, 353, 355–357, 364, 366, 367, 378, 379, 382, 386, 420, 421, 431, 433, 436, 439, 441, 450, 453, 466
 Tris buffered 233–235, 248, 257, 258
 Tris buffered with Triton X-100233
- Sequences, autonomously replication (ARS)350
- Sequencing, next generation50, 51, 194, 447, 469
- Sirtuin 1..... 96–98, 101–102, 106
- SNAP-tag..... 339–341, 343–345
- Software
 primer design..... 196, 204–205
 Tiling Analysis 475–483, 485
- spFRET..... 395–410
- Stable isotope labeling using amino acids in cell culture (SILAC)51
- Stain, Giemsa 57, 58, 62
- Substrates, histone deacetylase96

T

Telomerase.....305–315
 T4-endonuclease V..... 275, 277, 281, 365
 Tiling arrays
 Affymetrix473–487
 model based analysis of.....478
 Transcription factors..... 2, 194, 246, 256,
 275, 350, 429–444, 447–470, 473, 483–485
 Transfer, Southern 282, 307, 313
 Trypsin-EDTA..... 71, 127, 247, 254, 261, 310, 325

U

Ubiquitination, histone.....214, 216, 219, 225, 226

V

Virus, sendai54

W

Western blotting.....8, 9, 104, 105, 116, 218,
 250–251, 254–258, 262–263, 271, 321–322,
 324–326, 329, 387
